Carbon Reduction Plan

Supplier name: Supercharge London Ltd

Publication date: November 2026

Commitment to achieving Net Zero

Supercharge is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint *(applicable to the whole Supercharge Group)*

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2020 (Reporting period January 2020 - December 2020)	
Additional Details relating to the Baseline Emissions calculations.	
First year of emission calculations according to methodology and tool provided by Climate Neutral (The Change Climate Initiative)	
Baseline year emissions: 924 tonnes of CO2e	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**12.1 tCO_2e**
Scope 2	**32.4 tCO_2e**
Scope 3 **(Included Sources)**	**879.52 tCO_2e** - **Purchased goods and services: 678.89 tCO_2e** - **Capital goods: 124.87 tCO_2e** - **Fuel- and energy-related activities: 29.57 tCO_2e** - **Upstream transportation and distribution: 8.13 tCO_2e** - **Waste generated in operations: 4.81 tCO_2e** - **Business travel: 23.81 tCO_2e** - **Employee commuting: 7.72 tCO_2e** - **Downstream transportation and distribution: 1.73 tCO_2e**
Total Emissions	**924 tCO_2e**

Current Emissions Reporting *(applicable to the whole Supercharge Group)*

Reporting Year: 2025 (Reporting period January 2025 - December 2025)	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**37.8 tCO_2e**
Scope 2	**31.3 tCO_2e**
Scope 3	**423.7 tCO_2e**
Total Emissions	**492.8 tCO_2e**

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **450** tCO_2e by **2030**. This is a reduction of **51**% against the 2020 baseline.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the **2020** baseline. The carbon emission reduction achieved by these schemes equates to **431** tCO_2e, a **47**% reduction against the **2020** baseline, and the measures will be in effect when performing the contract.

- Decrease the avg. number of miles travelled on business trip (abroad) per employee by 30% by end of 2025
- Increase the energy efficiency of our office space by replacing gas boiler with electric heat pump, installing new thermometers and upgrading window insulation in the head office.
- Reduce share of (petrol/diesel) car usage in employee commuting by 10-20%, by providing incentives for more green commuting options

In the future we hope to implement further measures such as:

- Replace all single-use plastics materials at company events with re-usable items made from sustainable materials.
- Introduce sustainability criteria into vendor selection process, built into the company's procurement policy.

- Move from dedicated office space to shared desks where local footprint allows.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[1] and uses the appropriate Government emission conversion factors for greenhouse gas company reporting[2].

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard[3].

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
