

Jacob Martinez

Front-end developer and designer with Agency experience and a passion for building digital experiences for the web.

Experience

Frontend Web Developer

Traina | Creative Branding Agency

August 2023– Current

- Leveraged frontend technologies to craft visually stunning and user-centric web interfaces that embodied the agency's vision for a wide range of clients and industries.
- Streamlined the client documentation template into reusable components, drastically reducing time spent publishing documentation on client sites by over 50%.

Web Developer and Designer

ANML | Creative Design and Development Agency

November 2021– May 2023

- Developed web application features, components, and pages on various projects for enterprise brands, global non-profits, and startups that lead to a +40% growth in revenue.
- Migrated anml.com from a static, hard coded site in to a Next.js application with dynamic content; Increased content velocity by 400%, which led to a significant boost in web traffic, session durations, and prospect conversions.
- Reduced development hours by 30% on all web projects by implementing a Storybook component library, which benefited collaborating teams by lowering communication overhead.
- Collaborated closely with the design team to build a multitude of new modular React components that would be shared across an array of projects that improved scalability, reliability, performance, and optimized team dynamics.

Graphic Designer

Decca Design | Full Service Design Agency

February 2021– November 2021

- Designed graphics and various visual assets for a variety of client marketing campaigns such as landing pages, presentation layouts, and social media graphics.

Web Developer

Freelance Developer

January 2019– February 2021

- www.cineo.la – A platform for Latin American short films. Responsible for the site's development and deployment including but not limited to a responsive landing page using HTML, CSS, and JavaScript.
