

BBL (BROADBAND LIGHT) PRE-CARE

- Use sunscreen and physical sun protection, like hats, for 2 weeks prior to treatment.
- Avoid extended sun exposure for 2 weeks prior to treatment.
- Inform your provider if you have been on Accutane in the last 6 months.
- Inform your provider if you have a history of cold sores.
- Inform your provider if you have any medical conditions or are taking medications that make you sensitive to light, affect wound healing or affect coagulation.

WHAT TO EXPECT DURING YOUR TREATMENT

- The treatment is generally gentle and safe.
- There is no need for topical anesthetic, but it will feel like a rubber band snap.
- Your eyes will be protected with safety shields, but you may still see a flash of bright light.
- Your skin may feel like mild to moderate sunburn immediately after the treatment pulse, but a cooling crystal will help soothe this feeling.

Leave us a review

We work hard to perfect the patient experience at Elevé MedSpa and would love to hear your feedback.
