

CHEMICAL PEEL PRE-CARE

- Discontinue use of isotretinoin for 1 year (Sotret, Claravis, Amnesteem, and Accutane).
- Discontinue use of topical prescriptive medications for 48 hours (Retin-A, Tazorac, Differin, Epiduo, Ziana).
- Refrain from any type of exfoliating treatment(s) (glycolic acid, enzymes) to the area of treatments for 48 hours.
- Refrain from any medium/deep chemical resurfacing and laser treatments for 1 month.
- Refrain from waxing and use of depilatories for 48 hours.
- Discontinue use of OTC acne medication (Benzoyl Peroxide, Salicylic) for 72 hours.
- If you are prone to cold sores, chemical peels may cause a breakout; contact Elevé for a prophylactic treatment, such as Valtrex, if you did not receive this at your consultation.
- Avoid sun tanning or tanning creams/lotions for at least 72 hours.
- Refrain from any injections (Dysport, Botox, Juvederm) for at least 2 weeks.
- On the day of your appointment, a full consultation will be provided. However, feel free to contact us with any questions/ concerns at 715-847-0000

Leave us a review

We work hard to perfect the patient experience at Elevé MedSpa and would love to hear your feedback.
