

## MICRONEEDLING PRE-CARE:

- If you are prone to herpes simplex outbreaks, such as cold sores, consult your provider prior to your treatment to ensure you are pre-treated with anti-viral therapy.
- If your face or treatment area has irritated skin (sunburn, open wounds, sores) the day preceding your appointment, please contact our office as we may need to postpone your treatment.
- This procedure may not be performed on active breakouts or open lesions.
- Wait at least 6 months post isotretinoin (ACUTANE) use before your microneedling procedure as isotretinoin may impair proper wound healing.
- If you have recently used spray or self-tanning lotions on treatment areas before your procedure, discuss them with your provider.
- Avoid sun exposure for 24 hours prior to your procedure.
- Discontinue the use of topical products containing AHAs, retinol or vitamin A for 24 hours prior to your procedure.
- If on autoimmune therapy, ask your provider if the procedure is appropriate for you.
