

CANVA MADE FOR QUICK & EASY

PRINT OPTIMIZATION NOT AVAILABLE, INCONSISTENT PRINT RESULTS

1. UPLOAD PDF TEMPLATE IN CANVA

2. CREATE GRAPHICS

Create design in "Your Design" page

WARNING: Free Canva accounts are set up in RGB
Our technology prints CMYK only

Image resolution 300 to 600 DPI

3.1 FULL GLOSS / FULL MATTE / NO WHITE DESIGN

Nothing to do! Select the finish at submission

3.2 SELECTIVE GLOSS SET UP

Add a page and name it "Selective Gloss"

Copy Paste "Your Design" elements onto the new page

Use color magenta to identify gloss location. Delete the rest

Matte will be applied in unidentified areas

3.3 METALLICS SET UP

Add a page and name it "Metallic Base"

Copy Paste "Your Design:" elements onto the new page

Use light gray to identify metallic location. Delete the rest

White ink will print in unidentified areas

SET-UP IN FILE SHOULD LOOK LIKE THIS

HOW DOES IT WORK? WATCH THIS VIDEO

NEED MORE HELP? USE OUR PORTAL TOOLS

Use our "Need help with your artwork" tool at submission and our professionals will create these layers for you

RECOMMENDATIONS: COURTESY OF HART Lab

Barcode: Grayscale, vertical orientation

Text size: Body = 5pt min. Neck = 7pt min.

Design Effects: Some effects may not print as displayed. Flatten/rasterize transparencies and others effects for better results

Edge-to-edge coverage: Extend your graphics beyond the artboard to get a full wrap around effect

4. SAVE THE PDF

Paid account? download as **PDF Print - CMYK**
Free account? **RGB** is only available for download.
Please note, colors WILL auto adjust to CMYK causing unpredictable results

DO NOT add cropmarks/bleed

Save one design per PDF
