**KMC  
DRIVE TRAIN  
SOLUTIONS**

*For any system.  
For any bike.  
For any purpose.*

#### **COMPATIBLE**

KMC chains are available for all common derailleur systems and they are compatible with the systems of all major manufacturers. The product names clarify this: the chains of the X11 series, for example, fit all 11-Speed systems and are suitable for all cycling disciplines.

#### **STRAIGHTFORWARD**

Almost all boxed KMC chains come with a MissingLink. The installation is very simple and a secure lock always guaranteed. With a standard chain de-riveter, each chain can be shortened to the correct length. For closing and opening the MissingLink we recommend our pliers.

#### **DURABLE**

The many field tests we have conducted, clearly show that KMC chains last much longer than comparable chains from other brands. We support this statement with our unique satisfaction guarantee Durability Warranty, proving the trust we put in our products.

# KMC-Product features

## UNIQUE GUARANTEE

The life of a KMC chain with this quality warranty is guaranteed to last longer than other brands. This durability treatment includes all DLC, e-Bike, XSL, XEL and X101 chains. If you are not satisfied with the durability of your chain, fill out the form on [www.kmcchain.eu/service/warranty](http://www.kmcchain.eu/service/warranty).

## E-BIKE

Our e-Bike chains are specially designed for use in combination with strong mid motors. Optimized pin power and unsurpassed durability are the key features of our e-Bike chains.

10,000km+

## 10,000 KM+

For e-Bikes with internal gear hubs and strong mid motors we perfectly matched all drive train components. KMC's e101 EPT or eCargo1 chain in combination with KMC's 3 mm wide chainring/sprockets ensure a lifespan of over 10,000 km - guaranteed!

3,500km+

## 3,500 KM+

KMC's e1 EPT chain in combination with KMC's narrow chainrings and sprockets for e-Bikes with internal gear hubs ensure a distance of over 3,500 km - guaranteed!

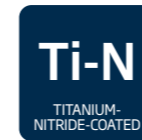

## EPT

KMC's latest breakthrough in rust protection. EcoProTeQ treatment doubles the rust resistance compared to KMC's RB Anti-Rust treatment. Benefits of the smoother coating are less noise, optimum performance, maximum rust resistance and great look.

## DLC

Unsurpassed durability for all DLC12, DLC11 and DLC10 chains due to precisely hardened and carefully polished pins and inner plates. Our DLC chains are coated with Diamond-like Coating ensuring very long lasting optical black beauty. Even more so the coating makes the surface of the chain very smooth giving it excellent shifting performances.

## TI-N

KMC's special Titanium Nitride coating not only looks fantastic, it has an ultra- smooth surface and is extremely durable.

## SUPER LIGHT

Slotted inner- and outer plates and hollow pins are our way to reduce the weight of the chain to the maximum. KMC's X11SL weighs 225 grams per 110 links only, being the very lightest of all 11-Speed chains.

## EXTRA LIGHT

Slotted inner- and outer plates save weight without compromising the smoothness and durability of the XEL Series.

## DOUBLE X-BRIDGE

Specially designed outer plate to enable fast, smooth and precise shifts.

## NON DIRECTIONAL

Our chains are compatible with all major shifting systems, there is no given direction to mount the chain.

# e-Bike Solutions

KMC is the first chain supplier offering specific chains for e-Bikes with mid motors. Our analysis of power transmission on e-Bikes with mid-motors showed that conventional chains are not up to these extreme forces. The critical part is the pin which connects all the individual parts of the chain. It is exposed to the most extreme forces during shifting. Our revolutionary riveting technology sets a new standard in e-Bike chains for derailleur systems. The e-Series KMC chains are extremely durable and offer unsurpassed durability for derailleur- and gear hub systems.

**eGlide**  
SHIMANO LINKGLIDE  
COMPATIBLE

The **eGlide** is a premium e-bike chain compatible with SHIMANO LINKGLIDE technology, which sets a new standard for smooth and reliable shifting. We developed a chain that fully supports these characteristics while meeting the high demands for use on modern e-bikes. The patented Shield-Tech riveting and large-dimension, reinforced rivets provide superior strength that can withstand high lateral shear forces.

**NEW!**  
**eCargo1**

**eCargo1** - the heavy-duty chain for the highest demands. With a tensile strength of 1,350 Nm, the **eCargo1** is 150 % of the required standard. Thus, the chain defies the enormous forces that act on the drive train of a cargo bike due to high engine torques and heavy loads. Combined with the constructively matched KMC sprockets and chainrings, this is the perfect solution for tough everyday use - even on non-motorised cargo bikes.

# Bike Solutions

From trekking bike to road bike, derailleur shifting systems are the classic when it comes to sporty rides. As the developments in the market continue, we too keep developing. The innovative surface treatment of titanium nitride for example: this extremely smooth and hard surface reduces friction and ensures smooth shifting.

Our products for 1-speed drives from BMX, dirt, track to hub gears are extremely robust and available with different product features. The golden K1SL has outstanding running properties thanks to its smooth coating and is a real eye-catcher. The models of the X-Series for single speed are designed as bush chains and are characterised by optimal power transmission at low weight.

# KMC REACT CASSETTES

Carefully crafted shift ramps ensure smooth and steady chain control and improve shifting performance and efficiency.

## LIFTING RAMPS

The unique lifting ramp design carries the chain smoothly upward on the cog.

## LOWERING RAMPS

align the chain save and quickly.

# NEW!

The KMC cog teeth design perfectly pairs with KMC chains - the reduced friction leads to a perfect drivetrain coordination and increased durability.

## REACT Cassettes

- > Perfectly matched to KMC chains
- > Compatible with Shimano HG
- > High tensile steel

#LimeHasTheLead

Enthusiastic about new experiences in mountain biking, the collaboration with the KMC Team, and the results achieved together, Ridley has decided to intensify its partnership with the KMC Team. Ridley will become the second name sponsor of the KMC MTB Racing Team in 2024 and 2025. Christ Bakker, Managing Director of KMC Europe, and Team Manager Bart Brentjens welcome this more intensive collaboration with Ridley.

This partnership signifies that the Team can expand towards the Paris 2024 Olympic Games. KMC, Ridley, and Bart Brentjens MTB Sports are working together with a long-term plan focused on the Olympic Games of Paris 2024 and Los Angeles 2028.

FOLLOW THE TEAM ON

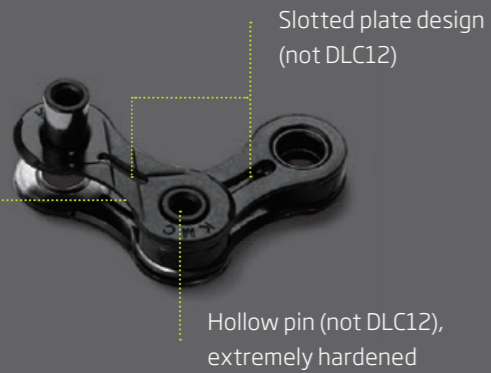

**RIDLEY**  
MTB RACING TEAM

# DLC-technology: extremely durable, extremely precise.

Unsurpassed durability due to precisely hardened and carefully polished pins and inner plates. Our DLC chains are coated with diamond-like coating ensuring very long lasting optical black beauty. Even more so the coating makes the surface of the chain very smooth giving it excellent shifting performances.

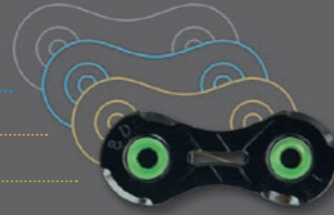

**Extremely light, extremely precise**  
2.05 grams per link (DLC11)

KMC Double X-Bridge:  
Precisely chamfered inner and outer plates for perfect shifting performance

**Powerful protection**  
based on advanced treatments

1. Heat treatment
2. Surface treatment
3. Nickel coating
4. DLC coating

KMC MTB Racing Team

*It doesn't  
just look great.  
It is.*

**X12**

Thanks to the KMC titanium nitride coating, the X12 for 12-speed systems looks great - and the special treatment of the pins ensure long life, while precisely chamfered inner and outer plates provide extremely accurate and fast shifts. You don't have 12-speed yet? The X-Series is also available for 8 to 11-speed systems.

BIKE SOLUTIONS

## DERAILLEUR X-Series

Regarding the specific characteristics of Shimano, SRAM and Campagnolo systems we developed a series meeting the highest demands. Precisely engineered, our dynamically chamfered plate angle provides a perfect shifting performance and a smooth transmission.

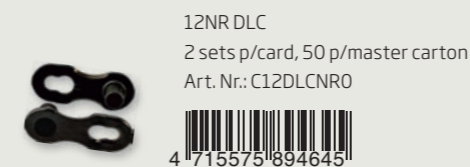

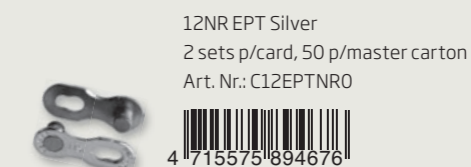

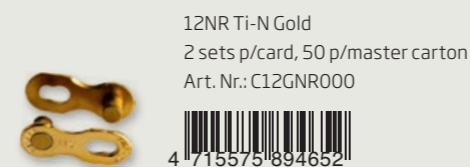

- Perfect shifting thanks to Double X-Bridge
- Non directional
- Includes a MissingLink

## DERAILLEUR X-Series SL

We have the outstanding characteristics of the X-Series united in the SL variant with weight optimization. Slotted inner and outer plates and hollow pins are our way to reduce the weight of the chain to the maximum, without compromising the smoothness and durability.

- Perfect shifting thanks to Double X-Bridge
- Non directional
- Includes a MissingLink
- Durability ●●●●●

Compatible with all 11-speed systems (Weight per 110 links: 225 g)

# Workshop Solutions

## 50 meter reels for the efficient workshop

For professional dealers with a busy workshop, we offer many chain models on workshop reels. Because of the increasing difference in chain lengths, especially for e-Bikes, a dealer has to hold more stock or order more regularly. The 50 meter reels offer the advantage of flexibility, you can shorten to the desired length with less waste and lower cost.

The key models are available packed on 50 meter reels, ranging from Single Speed up to 12-Speed chains. Obviously, KMC will include the right connecting links for proper and secure assembly.

## Reel Center Pro

Size: H 90 x W 60 x D 40 cm

- Height adjustable
- For up to three reels
- Unroll, shorten and connect without waste
- Clear identification by barcode-enabled labels

**RESPONSIBILITY:** KMC is constantly striving to manufacture the best possible quality products with minimal environmental impact. On top of meeting European standards, KMC is the first and only chain manufacturer to measure their carbon footprint. In order to reduce emissions, energy intensive processes constantly undergo optimization. Also more obvious steps are taken like solar panels at our factories reduce, or even neutralize electricity consumption from our European operation.
