*For any system.
For any bike.
For any purpose.*

COMPATIBLE

KMC chains are available for all common derailleur systems and we have solutions for all major manufacturers. The product name clarifies the compatibility: the chains of the X11 series, for example, fit 11-speed systems and are suitable for all cycling disciplines.

STRAIGHTFORWARD

Almost all boxed KMC chains come with a MissingLink. The installation is very simple and a secure lock always guaranteed. With a standard chain de-riveter, each chain can be shortened to the correct length. For closing and opening the MissingLink we recommend our pliers.

DURABLE

The many field tests we have conducted, clearly show that KMC chains last much longer than comparable chains from other brands. We support this statement with our unique satisfaction guarantee Durability Warranty, proving the trust we put in our products.

KMC-Product Features

UNIQUE GUARANTEE

The life of a KMC chain with this quality warranty is guaranteed to last longer than other brands. This durability treatment includes all DLC, e-Bike, XSL, XEL and X101 chains. If you are not satisfied with the durability of your chain, fill out the form on www.kmcchain.eu/service/warranty.

E-BIKE

Our e-Bike chains are specially designed for use in combination with strong mid motors. Optimized pin power and unsurpassed durability are the key features of our e-Bike chains.

10,000km+

10,000 KM+

For e-Bikes with internal gear hubs and strong mid motors we perfectly matched all drive train components. KMC's e101 EPT or eCargo1 chain in combination with KMC's 3 mm wide chainring/sprockets ensure a lifespan of over 10,000 km - guaranteed!

3,500km+

3,500 KM+

KMC's e1 EPT chain in combination with KMC's narrow chainrings and sprockets for e-Bikes with internal gear hubs ensure a distance of over 3,500 km - guaranteed!

KMC GO WAX

That's our long lasting dry lube reducing friction and improving shifting while prolonging the life of the drive-train. Compared to oil-based lubricants waxed chains are less susceptible to dirt build-up, which is the main cause of poor running characteristics and high wear on the drive train. KMC GO WAX is biodegradable, PFAS- and solvent-free.

DOUBLE X-BRIDGE

Specially designed outer plate to enable fast, smooth and precise shifts.

EPT

KMC's latest breakthrough in rust protection. EcoProTeQ treatment doubles the rust resistance compared to KMC's RB Anti-Rust treatment. Other benefits of the smoother coating are less noise, optimum performance and a great look.

DLC

Unsurpassed durability for all DLC12, DLC11 and DLC10 chains due to precisely hardened and carefully polished pins and inner plates. Our DLC chains are coated with diamond-like coating ensuring very long lasting optical black beauty. Even more so the coating makes the surface of the chain very smooth giving it excellent shifting performances.

Ti-N

KMC's special Titanium Nitride coating not only looks fantastic, it has an ultra-smooth surface and is extremely durable.

SUPER LIGHT

Slotted inner- and outer plates and hollow pins are our way to reduce the weight of the chain to the maximum. KMC's X11SL weighs 225 grams per 110 links only, being the very lightest of all 11-speed chains.

EXTRA LIGHT

Slotted inner- and outer plates save weight without compromising the smoothness and durability of the XEL Series.

NON DIRECTIONAL

Our chains are compatible with all major shifting systems, there is no given direction to mount the chain.

Welcome to the Wax Age!

Experience the next level of chain performance with our new, advanced dry wax formula. Designed to significantly reduce friction, enhance shifting and providing optimum efficiency, KMC GO WAX extends the life of your drivetrain by creating a durable microfilm on your chain that repels water and resists stickiness.

DURABILITY: Once applied, the wax dries to form a protective barrier that outlasts oil-based products.

CLEANER PERFORMANCE: Our waxed chains attract less dirt, minimizing the common causes of wear and ensuring smoother operation.

MAINTENANCE MADE SIMPLE: With minimal dirt accumulation, your drivetrain requires less frequent care. Refreshing the wax is straightforward—simply use a dry brush or cloth. No degreasing necessary, on a simple touch up with KMC's GO WAX.

ECO-FRIENDLY: KMC GO WAX is biodegradable and free from PFAS and harsh solvents, making it a responsible choice for both your bike and the environment.

e-Bike Solutions

KMC is the first chain supplier offering specific chains for e-Bikes with mid motors. Our analysis of power transmission on e-Bikes with mid-motors showed that conventional chains are not up to these extreme forces. The critical part is the pin which connects all the individual parts of the chain. It is exposed to the most extreme forces during shifting. Our revolutionary riveting technology sets a new standard in e-Bike chains for derailleur systems.

Next to our e-Series that was especially designed for the use on e-bikes we reworked our classic premium 12-speed chains for the use on e-bikes. Watch out for the e-icon in the bike solutions segment.

eGlide

SHIMANO LINKGLIDE
COMPATIBLE

The **eGlide** is a premium e-bike chain compatible with SHIMANO LINKGLIDE technology, which sets a new standard for smooth and reliable shifting. We developed a chain that fully supports these characteristics while meeting the high demands for use on modern e-bikes. The patented Shield-Tech riveting and large-dimension, reinforced rivets provide superior strength that can withstand high lateral shear forces.

eGlide

NEW! eCargo1 now available as customised chain on demand. Simply contact us with the required length, and we'll supply it directly and invoice through your distributor.

eCargo1 - the heavy-duty chain for the highest demands. With a tensile strength of 13,500 N, the **eCargo1** is 150 % of the required standard. Thus, the chain defies the enormous forces that act on the drive train of a cargo bike due to high engine torques and heavy loads. Combined with the constructively matched KMC sprockets and chainrings, this is the perfect solution for tough everyday use - even on non-motorised cargo bikes.

E-Bike Technology

Our e-Bike chains are specially designed for use in combination with strong mid motors. To achieve the high standards for an approval on modern e-bikes, we spent a lot of energy in the development of chains that even surpass the requirements guaranteeing an extra safety reserve. Our e-bike specific construction features that enable this.

Shield Tech by KMC – patented riveting achieving industry-leading pin power to withstand lateral stress.

- ▶ cold forged pin
- ▶ stronger: 450 kgf pin power
- ▶ smoother and harder surface

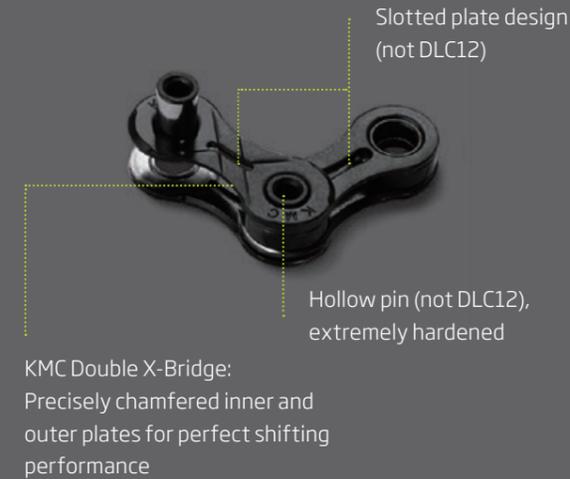

DLC-Technology: Extremely Durable, Extremely Precise.

Unsurpassed durability due to precisely hardened and carefully polished pins and inner plates. Our DLC chains are coated with diamond-like coating ensuring very long lasting optical black beauty. Even more so the coating makes the surface of the chain very smooth giving it excellent shifting performances.

Extremely light, extremely precise
2.05 grams per link (DLC11)

Powerful protection
based on advanced treatments

1. Heat treatment
2. Surface treatment
3. Nickel coating
4. DLC coating

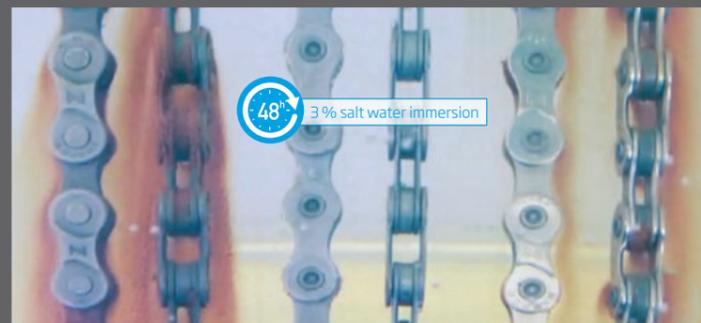

EPT: Rust Protection Redefined.

- ▶ non-toxic, environmentally friendly
- ▶ 100 % coating: each component of a link is treated separately
- ▶ first traces of rust only after 650 h of salt spray test (twice as long as conventional rust protection)
- ▶ smooth surface > excellent running qualities.
- ▶ minimized dirt buildup
- ▶ relieved maintenance, reduced wear

e1 EPT

no anti-rust treatment

Narrow-Wide Chainrings

Narrow-wide is a new type of tooth profile for chainrings in which narrow and wider teeth alternate. The idea behind it: a more stable toothing of chain and chainring or sprocket.

A look at the details of a chain reveals the problem. The distance between the inner plates is smaller than the distance between the outer plates. On a conventional chainring, the width of the teeth is chosen so that the teeth fit into the space between the inner plates. This inevitably leads to greater play in the wider outer plates. With narrow-wide, on the other hand, the space between the plates is perfectly filled and the drivetrain is less susceptible to chain drop, a specific problems with 1x systems, where the chain lines have become extreme.

Bike Solutions

The new KMC X Flat/XSL Flat chains for SRAM open up fresh opportunities for dealers. With growing demand in the flat-top segment, KMC now offers a strong alternative for a broader customer base. Like many other KMC premium series they come waxed straight from the factory – setting new benchmarks in efficiency, easy maintenance, and sustainability. From trekking bikes to racing machines, derailleur gears remain essential – now with even more choices to meet your customers' needs.

Our products for 1-speed drivetrains – from BMX and dirt to track and hub gears – are built for maximum durability and available with a range of features. The golden K1SL stands out with its smooth coating, delivering exceptional running performance and a striking look. The X-Series single-speed models, designed as bushed chains, ensure optimal power transmission while keeping weight to a minimum.

TT CHAINRING

KMC introduces a new chainring series for time trial and triathlon - tested and approved by Pro Teams. Precision CNC-machined in Europe from high-strength AL7075-T6 aluminum, these chainrings deliver maximum stability, efficiency, and aerodynamics. The narrow-wide tooth profile ensures secure chain retention and reduces friction - essential for race performance.

TT CHAINS

The TT series combines the key design features of our premium series. What sets the TT chains apart from the other series is the absolute care taken during production. Only unused tools are used in all production steps. In combination with the consistent selection of components with the lowest manufacturing tolerances, this results in an end product of the highest precision and maximum strength. Enlarged rollers improve the fit of chain and chainring - the sum of our efforts has resulted in a high-end chain with the best shifting characteristics and unrivalled power transmission. The chain for situations where every watt counts.

#LimeHasTheLead

In 2025, the KMC RIDLEY TEAM launched Mission 5, a four-year plan for the 2028 Olympic Games in Los Angeles. These summer games will bring mountain biking back to its roots in California. After Atlanta 1996, where mountain biking became an Olympic discipline and team leader Bart Brentjens won the first Olympic gold, the 2028 Games will be held in the USA for the first time again.

4 715575 200200

Table Adapter

Art. Nr.: DISREEL3

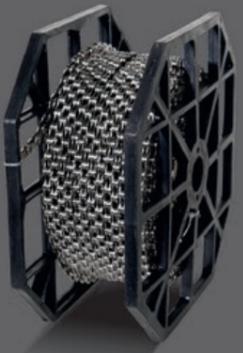

4 715575 200194

Table Adapter

50 meter reels for the efficient workshop

For dealers with a busy workshop, we offer many chain models on workshop rollers. Due to the different chain lengths, especially for e-bikes, dealers need to keep more products in stock or order more frequently. The 50 metre rolls offer an advantage here: flexibility, as they can be shortened to the desired length. This means less waste and lower costs. The most important models from single-speed to 12-speed are available as 50 metre reels. The correct connecting links for secure installation are included.

Reel Center Pro

Size: H 90 x W 60 x D 40 cm

- Height adjustable
- For up to three reels
- Unroll, shorten and connect without waste
- Clear identification by barcode-enabled labels

Disreel Tool Holder

Reel Center Pro

Art. Nr.: DISREEL1

4 715575 200187

Disreel Tool Holder

Art. Nr.: DISREEL4
