

1 - The evaluation of suppliers shall be carried out annually on the basis of the following criteria:

Neadvance, SA informs its suppliers that they are subject to performance evaluation in terms of non-compliance with: Purchase specifications, deadlines, quantities and applicable documentation/legislation."

2- Suppliers, subcontractors and service providers who carry out work for Neadvance must comply with the following rules:

Quality		- Comply with the legislation applicable to the product or service provided, including the company's qualifications and technicians if applicable or required. - Ensure the quality of the product/service provided. - Meet the agreed delivery times. - Provide technical and after-sales assistance when necessary and applicable.
Environment	General	Comply with applicable environmental legislation within the scope of the product/service provided.
	Gaseous Emissions	Ensure the good condition of vehicles and equipment, in order to minimize the gases emitted.
	Waste	- The waste generated in our facilities is the responsibility of the company providing the service, unless otherwise stated in the established contracts. - It is the responsibility of the Suppliers/Subcontractors to follow up on the waste in accordance with the Environmental Legislation in force. Documentation proving this must be provided whenever requested. - Service providers are not allowed to burn or abandon waste.
	Environmental Accidents	- The good condition of the vehicles/equipment must be ensured in order to avoid spillage. - Whenever an environmental accident occurs (spill, fire outbreak, water leak) at Neadvance, it must be immediately reported to the Head of the SHEQ area.
	Noise	- The good condition of the vehicles/equipment must be ensured in order to avoid excessive noise. - Avoid unnecessary noises (honking; accelerating sharply; etc.). - All equipment used outdoors must comply with the rules regarding noise emissions. (CE marking and declaration of conformity)
	Chemicals	- It is mandatory to present the Safety Data Sheets of all chemicals used in our facilities. - Chemical packaging must be labelled. - Chemical containers must remain closed after use.
	Water, energy and fuel consumption	The consumption of these resources should be minimized as much as possible. Situations such as unnecessarily connected equipment, open taps, clearly visible leaks, etc., should not occur.
Security		- Comply with the applicable legislation within the scope of the service provided related to Safety, Hygiene and Health at Work. - The use of personal protective equipment appropriate to the service provided is mandatory, as well as the continuous training of the employees in question. This training must be registered and, when requested, must be provided. - Smoking is expressly prohibited inside the company. - It is mandatory to report all incidents/accidents at work that occur during the provision of the service at our facilities.
