# FACIAL OPTIMIZATION

## UNDER EYES

Under-eye filler is a cosmetic procedure that uses hyaluronic acid injections to improve the appearance of the under-eye area. Hyaluronic acid is a naturally occurring substance in the body that helps to retain moisture. When injected under the eyes, it can plump up the skin and fill in any hollows or wrinkles, making the eyes look brighter and more youthful.

## CHEEKS

Cheek filler is a non-surgical cosmetic procedure that uses dermal fillers to add volume to the cheeks. This can help to create a more defined cheekbone structure, plump up the cheeks, and reduce the appearance of wrinkles and fine lines.

## LIPS

Lip filler is a cosmetic procedure that uses injectable dermal fillers to add volume to the lips. This can help to create a fuller, more pouty appearance, and can also be used to correct asymmetry or improve the shape of the lips.

## JAWLINE

Jawline filler is a cosmetic procedure that uses injectable dermal fillers to add volume to the jawline. This can help to create a more defined and sculpted jawline, and can also be used to correct asymmetry or improve the shape of the jawline.

## TEMPLES

Temple filler is a cosmetic procedure that uses injectable dermal fillers to add volume to the temples. This can help to create a more youthful appearance, as the temples tend to hollow out with age. Temple filler can also help to improve the overall balance of the face.

## NOSE

Non-surgical rhinoplasty, also known as liquid rhinoplasty or a liquid nose job, is a cosmetic procedure that uses injectable dermal fillers to change the shape of the nose. This can be done to correct minor imperfections, such as a crooked nose or a bump on the bridge, or to enhance the nose's natural beauty.

## BROW

Brow filler is a cosmetic procedure that uses injectable dermal fillers to add volume to the eyebrows. This can help to create a fuller, more defined brow shape, and can also be used to correct asymmetry or improve the shape of the brows. Filler can be used to enhance the look of the upper face by lifting the brow to a higher position.

## CHIN

Chin filler is a cosmetic procedure that uses injectable dermal fillers to add volume to the chin. This can help to create a more defined and projected chin, and can also be used to correct asymmetry or improve the shape of the chin.

## INJECTABLES

- JUVEDERM® • SCULPTRA® • RESTYLANE®
- RADIESSE® • RHA® COLLECTION • KYBELLA®

 Juvéderm

*Restylane*

 RHA®  
Collection

Sculptra

RADIESSE®

kybella™

## WRINKLE RELAXERS

Neurotoxins are injectable treatments that create smoother, younger-looking skin by temporarily weakening the muscles that cause facial wrinkles. The treatment can be performed on its own to address a single area of the face where signs of aging are especially visible, or it may be combined with other options for an overall rejuvenated look.

- BOTOX® • DYSPORT® • JEUVEAU® • DAXXIFY®

# SKIN TEXTURE AND TONE

## MICROGOLD DERMAL INFUSION

Dr. Sunder's signature Microgold treatment involves a micro-channeling device that assists with plumping and rejuvenating the skin. This device also allows you to apply products like hyaluronic acid or BOTOX® through the device in order to address certain skin problems. Microgold is the perfect complimentary treatment to other in-office procedures such as BOTOX®, fillers, and lasers.

## MICRONEEDLING

Microneedling is a minimally invasive treatment that is safe for all skin types and colors. PRP and Exosomes are available as add-ons.

## MORPHEUS8

Morpheus8 pairs microneedling with radiofrequency energy by using tiny needles not just for creating micro-channels, but also to deliver radiofrequency energy deep into the skin, prompting your own skin cells to repair and remodel more efficiently.

## CO2 LASER RESURFACING

CO2 laser skin resurfacing is a procedure that involves the use of carbon dioxide (CO2) and a skin resurfacing laser (ablative laser) to remove fine lines and wrinkles, scars, sun damage, texture problems, and other skin conditions. It also offers the benefits of skin tightening, a smoother and more even complexion, and a youthful glow with just one session.

## PICOWAY

PicoWay laser treatment targets darker pigment and shatters it into tiny particles that are no longer seen through the skin.

## CUSTOMIZED PIGMENTATION PEELS

A customized liquid exfoliation is applied to treat specific skin concerns and continue the cell turnover process. These processes create a more even tone, addressing skin pigmentation & fine lines. The result is a smoother and brighter complexion.

# SKIN LAXITY

## FACETITE & NECKTITE

InMode's Facetite + Necktite is a highly effective skin rejuvenation treatment that uses radio-frequency beneath the skin to tighten and firm the skin while stimulating collagen.

## SOFWAVE™

Experience the cutting-edge power of Sofwave™, the pinnacle of skin revitalization technology. Its innovative Synchronous Ultrasound Parallel Beam Technology is FDA cleared for eyebrow, submental, and neck lifting, and reduces fine lines & wrinkles by stimulating the production of new collagen, revealing a youthful and vibrant complexion.

## PROFOUND®

Profound® is a nonsurgical treatment for addressing facial wrinkles and cellulite by combining radiofrequency (RF) energy with ultrafine needles to renew skin from within. Each needle triggers collagen production and more healing benefits, further enhanced by the RF energy.

## ULTHERAPY®

Ultherapy® uses ultrasound technology to non-surgically tighten and lift the tissues of the face and neck. Ultherapy® is perfect for individuals who have started noticing that their brows are lower than they were a few years ago and those who have started to see some mild to moderate sagging of the skin of the neck.

## VENUS LEGACY™

The revolutionary Venus Legacy™ is the first FDA-cleared aesthetic technology powered by the technology (MP) that combines Multi-Polar Radio Frequency, Pulsed Magnetic Fields, and VariPulse™ requiring no downtime.

## VENUS VIVA

The Venus Viva is a non-invasive treatment that stimulates fibroblasts in the skin to make new collagen, while simultaneously tightening the existing collagen fibers to improve skin laxity, texture, lines, and wrinkles. It is used to treat acne scars, improve texture, tighten skin, reduce wrinkles, and rejuvenate skin.

## FACIALS

# hydracial

**3 STEPS. 30 MINUTES.  
THE BEST SKIN OF YOUR  
LIFE!**

Only HydraFacial uses patented technology to cleanse, extract, and hydrate. HydraFacial super serums are made with nourishing ingredients that create an instantly gratifying glow in just 3 steps:

- **CLEANSE + PEEL**
- **EXTRACT + HYDRATE**
- **FUSE + PROTECT**

## KERAVIVE

Keravive by HydraFacial offers a unique, 3-step treatment designed to cleanse, exfoliate, nourish, and hydrate the scalp stimulating healthier, fuller-looking hair.

# ABOUT DR. SARMELA SUNDER

Dr. Sunder studied at Johns Hopkins University and continued her medical education at Cornell Medical College. In addition to earning her medical degree, she spent years doing extensive research, and published several articles in leading scientific journals. Her academic excellence took her to an elite residency program at Stanford University culminating with her serving as Chief Resident. During her residency, she trained under the mentorship of a pioneer in Rhinoplasty who is a former president of both the American Academy of Otolaryngology - Head & Neck Surgery and the American Academy of Facial Plastic and Reconstructive Surgery. Dr. Sunder was able to merge her artistic ability with her passion for medicine when she was accepted to a prestigious fellowship accredited by the American Board of Facial Plastic and Reconstructive Surgery. She trained under an internationally renowned facial plastic surgeon and past president of the American Academy of Facial Plastic and Reconstructive Surgery.

With over 13 years dedicated to studying the face and neck, she specializes in advanced techniques for optimal results for mid-face lifts, facelifts, neck lifts, eyelid lifts and rhinoplasty. Her extensive training and educational background make her a true master at her field and patients from around the world come to her for facial plastic surgery procedures. Dr. Sunder prides herself on providing patients with the most natural-looking surgical results possible. Combining her superb skills as both an artist and a surgeon, Dr. Sunder is able to achieve results that truly bring balance and harmony to her patient's face.

Dr. Sunder believes that you should put your best face forward. She dedicated years of training to the face and neck, knowing that a surgeon should properly focus on one field in order to be truly exceptional. Her extensive training combined with her innate sense for aesthetics gives her a distinctive approach for patient counseling and management. Additionally, Dr. Sunder represents a woman's perspective, allowing her to offer her patients a unique and exclusive experience.
