AI for Law Professionals

Use AI in legal work. **Your judgement still leads.**

Designed by legal experts. Delivered by AI experts.

Apply AI to the work you already know

- Live, instructor-led training
- Applied to real legal work
- Foundational and Practitioner levels
- From single tasks to a workflow
- Guided practice and expert review

Bring sharper thinking to legal work and technology

Develop the skills to apply AI to legal tasks and evaluate where technology can genuinely improve legal service delivery.

Why this matters now

AI can support legal research, review and drafting, but legal value comes from knowing what the authorities and material facts actually support. It also requires sound decisions about where technology belongs in a legal process. These courses help you use AI in matter work and assess opportunities for wider improvement, without losing sight of accuracy, confidentiality, privilege or the needs of the client.

Course 1

Foundational

Use AI more effectively in your own legal work

Work you'll recognise: organising a legal research brief; checking an AI-assisted draft against its sources.

You'll leave able to

1. **Use AI to support legal research, document review, drafting and communication**
2. **Verify legal sources, material facts and omissions before relying on an AI draft**
3. **Protect confidentiality and privilege, keeping professional judgement over advice and decisions**

Course 2

Practitioner

Evaluate legal technology and improve how legal services are delivered

Work you'll recognise: comparing AI assistance with a simpler matter-intake change; mapping a legal process and planning a small pilot.

You'll leave able to

1. **Evaluate a legal technology against a defined practice or client need**
2. **Map a legal process and propose a focused improvement with clear ownership**
3. **Plan a small pilot with review, staff support and measures of quality, time and risk**

At a glance

Learn

10 hours over two days
Live online and instructor-led

Apply

Within two weeks
In the workplace
One approved task based on real legal work
Instructor feedback

Review in group

1 hour group clinic
Live online and instructor-led
Shared peer learnings

Ongoing support

Templates, checklists and case examples available from day one, plus 90 days of support.

Ways to join

Courses run in cohorts of 15 learners.

Have enough people for a full cohort? Train your team together, on your own legal work and review standards. We can even explore tailoring.

Not quite enough people, or want to test it first? Talk to us about your team's needs.

£7,000
Full closed cohort

Cost is per course. Prices exclude VAT.

What you'll learn

Practical skills to bring AI into your role, whatever your starting point.

Course 1: Foundational

You'll learn to use AI in your own legal work, and verify the answer before you rely on it.

1. Gain confidence with AI in legal practice

Know where AI adds value across the matter lifecycle and where solicitor judgement is needed, and prompt for research and drafting.

2. Use AI for everyday legal work

Choose the right tool for each task, verify research against authoritative sources and keep client drafts subject to review.

3. Use AI tools with legal data

Understand legal data types, ask better questions of documents and matter information, and support judgement rather than replace it.

4. Use AI responsibly in legal practice

Protect confidentiality and privilege, validate accuracy, spot deepfakes and fake evidence, and challenge outputs before use.

Course 2: Practitioner

You'll learn to evaluate legal technology, improve a legal process and plan a small, responsible pilot.

1. Legal technology and innovation
Explore legal tech in practice and use design thinking to frame a client or practice problem.

2. Choose tools and plan adoption
Compare tools on fit, security, integration and cost, then plan a pilot with staff support and measures.

3. Map and improve a legal process
Map the current process, capture variation and exceptions, and design a better workflow with clear ownership.

4. AI in legal practice
Examine AI in research, review and drafting, with the hallucination, confidentiality and oversight risks.

5. Evaluate emerging technology
Build a horizon-scanning habit and separate genuine value from hype.

6. Case management and workflows
Review case-management tasks and spot low-risk automation and the training it needs.

7. Technology in litigation
Explore e-discovery, digital evidence and virtual hearings, with the verification each needs.

8. Make an informed AI decision
Weigh use case, security, accuracy, cost and accountability, including pricing and client service.

Who it's for

Roles

Law professionals, including solicitors, paralegals, legal executives, regardless of seniority or time in role.

Starting knowledge

Complete an AI skills diagnostic before the course begins to benchmark your current capability.

Foundational requires no previous AI experience. Practitioner is for people who already use and check AI on individual tasks.

Not sure which course?

Course 1: Foundational
"I want to use AI confidently and responsibly in my own legal work."

Course 2: Practitioner
"I help shape how our legal services, technology or processes are delivered, and want to evaluate AI and improve a process."

Choose by responsibility, not seniority.

Time and support

Learn live for 10 hours

Training, guided labs and feedback take place over two days. Materials available from day one; no advance study is required.

Apply one task

Within two weeks, try a suitable task using an approved tool and permitted information, or use a supplied case. Keep your reviewed work and a question for the instructor.

Return with your questions

Join a one-hour group clinic around day 30. Use the templates, checklists, worked cases and feedback for 90 days.

See your progress

Ongoing capability diagnostics show where your skills and confidence are growing, and where to explore and practise next.

Not sure where AI fits in your work?

Here's what you could learn to do.

Foundational

Organise a legal research brief

- Frame an AI research-support task and inspect how it uses sources
- Verify authorities, material facts and omissions
- Keep legal judgement with you

Practitioner

Compare AI assistance with a simpler matter-intake change

- Evaluate a specific AI use alongside process improvement
- Map the current process, including variations and exceptions
- Plan adoption and a small pilot
