

LAPIPLASTY 3D BUNION CORRECTION

Modern Surgical Bunion Solution

Premier Orthopaedic Associates | poasnj.com

📞 Call or Text: 856.690.1616

🦶 What is Lapiplasty?

A 3D surgical correction for bunions that addresses the root cause by realigning the metatarsal bone at the base joint.

🔧 What Makes it Different?

- Fixes the deformity in 3 planes
- Uses titanium plates for stability
- Reduces risk of recurrence

✅ Ideal Candidates

- Moderate to severe bunions
- Failed conservative care
- Desire for long-term correction

🎯 Benefits

- Faster recovery
- More reliable results
- Return to walking in weeks (boot)

⚠️ Considerations

- Requires post-op boot
- Full recovery takes 3–6 months
