PERFORMANCE RESULTS

EXTREME CLEANING SCORE

This test evaluates the cleaning ability of a fluid by using a mechanical device, the Gardner Scrubability Apparatus, that pulls a sponge across a tile that has been soiled with a choice of substances. The soil tested is A3 – Industrial Soil (a vinyl composite). WD-40 Specialist Electrical Contact Cleaner removes over 10% more soil than leading competitors!

DIRECTIONS

Shut off all power and allow any hot surfaces to cool. Make sure all stored power is drained from the system. **Shake Can Well** for 20-30 seconds before each spray. Flip straw up for pinpoint **STREAM** or down for wide angle **SPRAY**. Hold can 6 to 8 inches away from the surface and spray directly on to the electronic device or circuit board to eliminate and remove any contaminants that may cause loss of electrical contact. Tilt surface while cleaning and allow any excess cleaner to run off. Allow product to dry completely and thoroughly vent the system before restoring power.
