

WD-40 SPECIALIST® ROLLER CHAIN LUBRICANT

PRODUCT DESCRIPTION

WD-40 Specialist Roller Chain Non-Fling Lubricant sprays on thin to penetrate deep into roller chains, inner chain links, pins and bushings, and then dries to provide long-lasting lubrication, even with chains operating at high RPMs. By penetrating deep into crevices, this formula helps protect the chain from rust and breakage¹. This roller chain lube's ceramic-reinforced formula resists dirt and helps keep the lubricant from flinging off the chain during use.

Safe on most metals, chains, sprockets, chain links and O-Ring chains when used as directed. If unsure, test on a small area first.

¹Based on proper chain maintenance extending the life of a chain. Proper maintenance for roller chain is cleaning and lubricating not only the external parts (chain and sprockets) but also the internal parts (chain links) of the chain.
