The impact of SUPERSUPER

Claire is a typical Child Care Super member. She's 34, earns \$34K a year and has a current super balance of \$18K. She is currently projected to retire with a superannuation balance of \$141K – which is not great.

However, if Claire was to spend what she normally does using SUPERSUPER for a quarter, half or all of her shopping (without spending any more than she already does), Claire could add as much as an additional 75% to her retirement balance. That's huge!

Figures at right are based on 34 year old, \$34,011 p.a. salary, current super balance \$17,761, retirement age 67, household spending of \$633.66 per week, average SUPERSUPER reward calculated at 7.59%, Contributions of SG, Govt Co-Contribution and SUPERSUPER only, 4.8% p.a. gross return, 1.6% yearly fee on balance, Insurance premiums not included, 2% p.a. price inflation and 3.2% p.a. wage inflation. Figures are displayed in today's dollars.
