

About

Dr. Daniel J. Liebertz

Honing his skills as a double board-certified facial plastic and reconstructive surgeon to provide beautiful outcomes, Dr. Daniel J. Liebertz is known for “You, Only Better” results.

“My formal training in sculpture and figure drawing has leaned my aesthetic ideal toward ‘natural beauty,’” he explains. “When performing delicate facial surgery, subtlety is key to achieving a youthful, natural look without appearing overdone. Less filler, less Botox, and even less surgery can often result in a more nuanced outcome.” Ensuring a smooth experience from start to finish, his highly skilled staff provides the utmost professional care before, during and after all treatments. “Patient safety is of utmost importance,” he says. “Aside from offering a never-overfilled or overdone look, we have an on-site state-certified operating suite and a medical spa to enhance our patients’ unique beauty.”

“Subtlety is key to achieving a youthful, natural look without appearing overdone.”

A Younger, Fresher Look

To refresh this 57-year-old patient, Dr. Liebertz performed a mini-facelift and necklift, which tightened loose skin around her jawline, and an upper blepharoplasty to rejuvenate her eyes.

Subtle Makeover

This 29-year-old patient underwent a revision rhinoplasty to address concerns about the shape of her nose. The procedure narrowed her nose and refined the dorsal hump and tip, resulting in a more proportionate look.

How do you know when it's time for a facelift?

When there is skin laxity, jowling, midface descent, and a loss of contour under the chin and jawline, it may be time for a facelift.
