VIGNETO LA CASUCCIA 2018

Chianti Classico Gran Selezione DOCG

The La Casuccia vineyard covers 12.58 hectares, six planted in 1978 and the rest in 2007. The plot has been terraced to improve aspecting and ensure more uniform ripening. La Casuccia is split into nine parcels of land and in the best vintages it is typically parcel numbers 49, 46 and 45 which contribute to producing the limited quantities of this vineyard selection.

CLIMATE

The great difference in temperature between day and night we had in Autumn allowed a good development of aromas. That is why wines from 2018 vintage are going to be fruity with an excellent freshness and a good balance of alcohol. The extraordinary polyphenols content will provide thoroughbred wines, elegant, powerful and with a good body. What we have always liked. After several samples and organoleptic analysis in our vineyards and laboratory, harvest have been carried out by hand in 10-12-kg crates on August 29th and it ended up on October 15th.

VINIFICATION

Fermentation was started using ambient yeasts, separately for each variety and in steel tanks at a controlled temperature of 30-33 °C, with manual pumpovers and total cuvaion of 27 days for the Sangiovese and 25 days for the Merlot. After first racking, the wine was transferred to barriques for malolactic fermentation.

REFINEMENT

The assemblage of the two grape varieties takes place at the end of the malolactic fermentation. Afterwards the wine is transferred into fine grain oak barrique of which 40% are new and the rest one year old, for approximately 14 months.

TECHNICAL DATA OF THE WINE

First release 1985
Grapes: 80% Sangiovese, 20% Merlot
Alcohol: 13,5%
Total Acidity: 5 g/l
Residual Sugar: <0,5 g/l
Extract: 32,4 g/l

Colour: pure ruby-red with purplish notes.

Nose: closed at this step, tertiary notes of pipe tobacco and leather.

Taste: tannic flavor. Tannins are ripen armonic and delicate.

TECHICAL DATA OF THE VINEYARD

<p>Exposure: North-East/South-Ovest</p> <p>Soil: clay and calcareus</p> <p>Altitude: 470-495 AMSL</p> <p>Vine Density: from 5.200 vines/ha</p>	<p>Training system: vertical trellis with single Guyot in 8.04 ha and open Lyra in 4.54 ha.</p> <p>Clone selections: Sangiovese CC2000 1, CC2000 2, CC2000 4CC2000 5, Merlot 343 e 347. Rootstock: 420°A.</p>
