

Food Safety and Quality Policy Statement

The strength and success of our business is based on trust. Customers and consumers trust us to provide authentic, safe, quality products, which meet the needs of consumers and comply with all relevant customer/third-party standards and legislation. By working closely with our employees, customers and suppliers, our objective is our commitment to continual improvement in: our services, our products; our food quality and safety culture; and the development of our people.

All employees are made aware of our commitment to food safety and quality and with relevant ongoing training they will work to consistently achieve the Company's aims. Through management leadership, all personnel will accept their responsibilities for ensuring that the Company's quality, safety and hygiene standards are met.

We will employ suitable people and provide necessary resources to seek ways of further improving our products and services, thereby underpinning long-term trading relationships. We are committed to socially responsible sourcing, using suppliers who adhere to relevant legislation and International Labour Organisation (ILO) conventions.

We recognise the effect we can have on the environment, but through conscious raw material sourcing and programmes of reduction, reuse and recycling we aim to minimise the impact.

Chris Hall

CEO
