

# Step by step

In the video, you watched each step of the process, from the pre-sort to baling and storage. Fill in the diagram to show the steps. Draw a picture and explain how each kind of material is sorted from the rest.

# Closing the loop

- 1 Complete the diagram below to show how we can close the loop.
- 2 Cut out the seven pictures and labels from Picture Set 2B.
- 3 Work out where each picture and label fits in the cycle, or loop.
- 4 Glue in the pictures and labels, and compare your work with a friend.

# Closing the loop

Recycling truck collects the packaging.

Put recyclable packaging in the recycle bin.

New products made from the new materials.

Processing the sorted materials.

Sorting of materials into separate groups, such as plastic, paper, and steel.

Delivery of materials to the MRF.

Making the new materials into new packaging.
