

What makes up soil? – graphic organiser

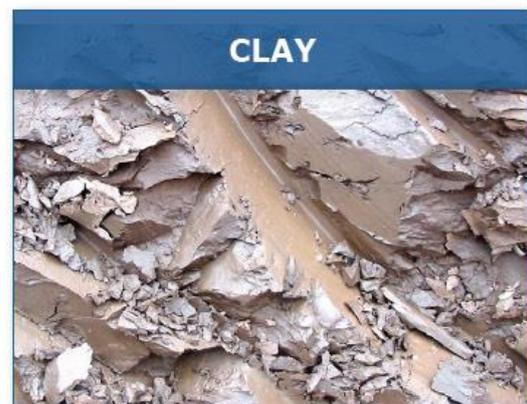

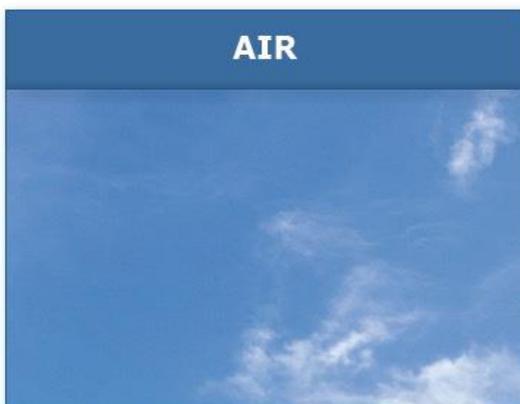

WHAT MAKES UP SOIL?

The graphic organizer consists of three vertical panels, each with a rounded top and a green border. The background of the entire graphic is a cross-section of soil with green grass at the top and a rocky subsoil layer at the bottom. Plant roots are shown extending into the soil. The three panels are labeled as follows:

- Is part of the soil**: The top panel, with a light green background for the text.
- Is not part of the soil**: The middle panel, with a light green background for the text.
- Not sure**: The bottom panel, with a light green background for the text.
