

Kōura

Freshwater crayfish

— Cut Line

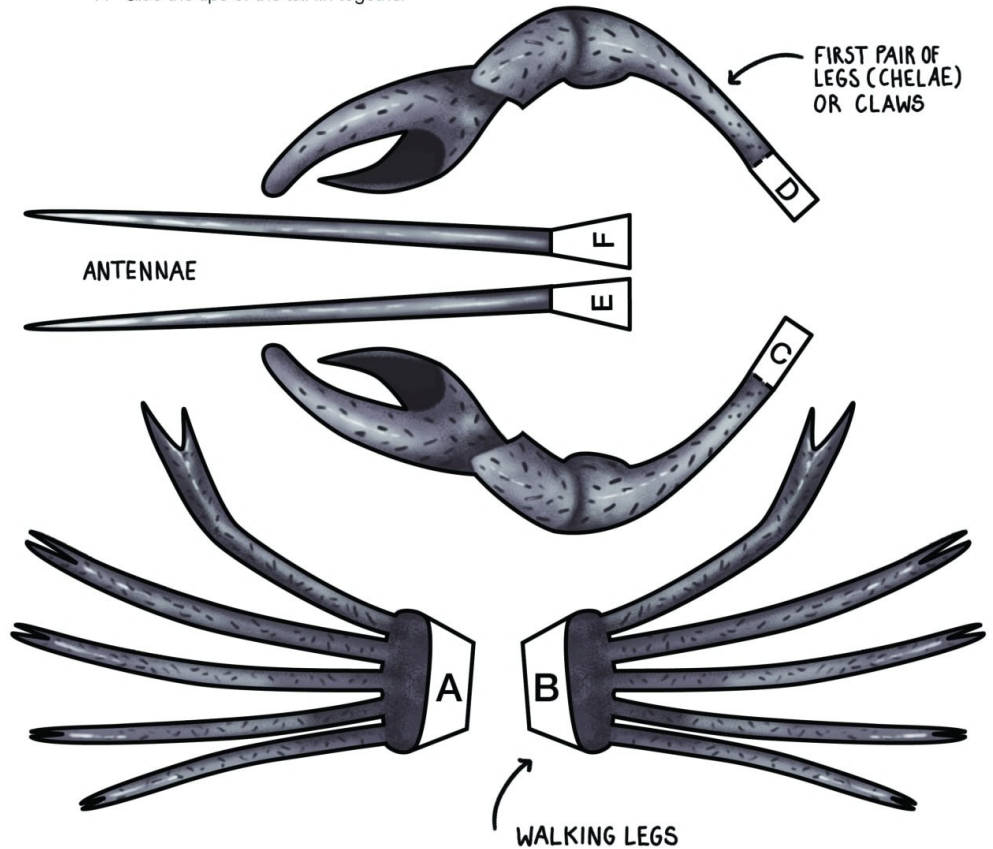

- - - Fold Line

Instructions:

1. Cut out the kōura body, legs and antennae along the solid black lines.
2. Fold inwards along the dashed lines
3. Fold all the tabs inwards
4. Glue the antennae (E and F) in place on the body
5. Glue the main body together along the tabs
6. Attach the claws (C and D) and legs (A and B) to the under side of the body
7. Glue the tips of the tail fin together

Did you know?

The skeleton of a kōura is on the outside of its body. It is called an exoskeleton and is shed as the kōura grows bigger.
