Breast Cancer Research Foundation transforms lives through research

The Mission of the Breast Cancer Research Foundation (BCRF) is to prevent and cure breast cancer by advancing the world's most promising research. It all started in 1993 at Evelyn H. Lauder's (daughter-in-law to the cosmetic industry mogul, Estée Lauder) kitchen table. She and her dear friend Dr. Larry Norton began a conversation that

would, over time, change breast cancer history. Recognizing the power of research and its potential to change the lives of millions of women and men worldwide, they realized that to tackle this disease a new approach

was critical.

Mrs. Lauder, along with Dr. Norton and her husband, Leonard, committed then and there to change that. They believed research was the way forward and founded BCRF on the belief that funding was the only obstacle standing between breast cancer and a cure. They commit a record \$58.6 million dollars in

THE WISE CENTER FOR PLASTIC SURGERY

is one of the first and only practices in the area to offer...

kybella™

The first FDA approved nonsurgical treatment that contours and improves the appearance of submental fullness (also known as double chin).

Kybella causes the destruction of fat cells so the area cannot store or accumulate additional fat and tightens the skin. *The results are permanent!*

Are you tired of bothersome chin fat?
