

Cataract Evaluation Questionnaire

Name: ₋	Date:
	see well enough to do things I need or like to do, even with glasses. (i.e. reading, driving at night, using er, hobbies, balance, sports, TV) True False
	et surgery can almost always be safely postponed until you feel you need better vision. Do you feel sion problem is bad enough to consider cataract surgery now? Yes No
Do youi	r eyes experience grittiness, burning, dryness or irritation? ☐ Yes, most of the time ☐ Yes, occasionally ☐ No
Do your	r eyes become uncomfortable in windy, air conditioned or low humidity conditions? ☐ Yes ☐ No
Do you	use any over-the-counter or prescription eyedrops for dry eye? ☐ Yes, daily ☐ Yes, occasionally ☐ No
Current	ly, I wear the following type(s) of glasses (select all that apply) □ Distance glasses □ Progressives (or bifocal) glasses (for distance and near) □ Reading glasses only □ I rarely use glasses □ Other
l wear t	he following type(s) of contact lenses (select all that apply) Distance contacts Multifocal contacts (for distance and near) Monovision (One eye for distance and the other for near)
Modern catarac	day cataract surgery offers the chance to fix near sightedness, far sightedness and astigmatism. After t surgery (select one): ☐ I would prefer to see well for distance without glasses ☐ I would prefer to see well for near without glasses ☐ I would prefer to see well for distance and near without glasses
enhanc	cataract surgery, there are advanced technology options such as using a laser, and customized ed lens implants for treating astigmatism or minimizing the need for reading glasses. Such additional in treatments at the time of cataract surgery are not covered by insurance. Does this interest you? Yes, I would like to use this opportunity to use advanced technology to correct long-standing vision problems such astigmatism and/or presbyopia No, this doesn't interest me. I do not mind wearing glasses full time. I'd prefer the simplest and least expensive operation I can have.
