Cataract Surgery Journey

We look forward to improving, restoring, and transforming your vision with your upcoming cataract/ lens replacement surgery.

Tal Raviv, MD, FACS

Paul S. Lee, MD

Melissa Sherman, OD

1.Pre-Op Medical Clearance

We have a form for your doctor to fill out and send back to our office. NY State requires it be completed within 30 days of your surgery. Plan accordingly if both eyes are scheduled within a few weeks of each other.

2. Prescription Post Op Eye Drops

We recommend compounded eyedrops. We call them "3 in 1", as they have three prescription medications in one bottle. If you purchase these, you'll receive them right after your surgery. (These are not available in retail pharmacies)

If instead, you opted for the generics (which may be fully covered by your Rx insurance, subject to copays &/or deductibles), we will e-prescribe them to your local pharmacy. There will be three eye drop prescriptions sent. You will start using them the day before your surgery date.

3. Payment for Refractive Services

If you've selected premium refractive services (such as laser or advanced lens implants), we will collect payment in advance. Kindly remit payment either at the office, or via a secure, encrypted emailed invoice. Payment is due one week prior to the surgery date.

Our goal is to provide you with a seamless experience from scheduling through surgery and into your new healthy vision. At any point, please feel free to contact us:
