

## COMPOUNDED POST-OP EYEDROPS

These compounded drops combine three (or two) medications in one convenient bottle. These are not available at retail pharmacies.

**\*Day before Surgery** Use the drops 4 times/day starting with the morning before surgery.

**Day of Surgery:** Use the drops two times after the surgery, i.e afternoon and evening

**After Surgery:** Use the drops for four weeks as per the tapering schedule below

 <p>Prednisolone 1% Moxifloxacin 0.5% Nepafenac 0.1%</p>	Week 1	Use One Drop <b>4</b> times per day In the Operated Eye
	Week 2	<b>3</b> times per day
	Week 3	<b>2</b> times per day
	Week 4	<b>1</b> times per day

\*If you have the drops in advance, start the day before surgery, otherwise it's ok to start right after your surgery.
