

Energy Market Forecasting

Advanced API

StormGeo is pleased to announce the launch of its cutting-edge API for the Energy and Power Markets Portal.

Here are the benefits:

Energy Market Forecasting

Advanced API

The new API from StormGeo is valuable to traders, portfolio managers, production planners, investors, and other clients as it **provides direct access to critical market data**, enhancing their ability to make informed decisions.

Informed by nature,
powered by technology.

Energy Market Forecasting

Advanced API

Real-time Price and Balance Forecasts: Our clients can respond swiftly to market changes and optimize their trading strategies by providing up-to-date price and balance forecasts.

Informed by nature,
powered by technology.

Energy Market Forecasting

Advanced API

Weather forecasts and indices: Access to a wide range of weather data allows traders to anticipate market fluctuations influenced by weather conditions, a critical factor in energy supply and demand.

Informed by nature,
powered by technology.

Energy Market Forecasting

Advanced API

Comprehensive Cost and Switching Prices Analysis:
The API offers cost fuel switching calculations that enable assessing potential expenses accurately and identifying opportunities for cost-saving measures.

Informed by nature,
powered by technology.

Energy Market Forecasting

Advanced API

Historical Data for Trend

Analysis: Historical records empower traders to analyze past trends and forecast future market movements, aiding in developing long-term strategies.

Informed by nature,
powered by technology.

Energy Market Forecasting

Advanced API

Improved Efficiency:
Automated data retrieval through the API reduces manual data processing time, allowing clients to focus on analysis and decision-making.

Informed by nature,
powered by technology.
