

Asvallalaug - Health and Sport Centre

Project description:

The design of the building is based upon a 1st prize entry in an invitational total enterprise competition held by the Municipality of Hafnarfjörður in the year 2006. The building contains a 50m swimming pool (FINA standard), a smaller teaching pool and a children's pool, a slide, hot tubs and a steam bath. The building also contains a health centre with physiotherapy and training facilities. The Swimming Association of Hafnarfjörður and the Swimming Association for Handicapped are also located in the building.

The big lobby area therefore serves as a multi-use space for all different functions depending on the program each day.

The planned outdoor area contains a 25m swimming pool, children's pool, two slides, hot tubs, steam bath and a sauna.

Good accessibility was a keynote in the design of the building.

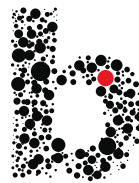

Project information:

Project name	0617 Asvallalaug- Health and Sport centre
Address	Asvellir 2, Hafnarfjörður
Client	Municipality of Hafnarfjörður
Architect	Batterið Ltd.
Landscape architect	Landform Ltd.

Consultants:	
Civil engineer	Strendingur Ltd.
