

# MAINTAIN THE FRESHNESS AND NUTRITIONAL VALUES OF YOUR HARVEST ALL YEAR LONG WITH JETSİL AJ MISIR!

Your silage gets active  
protection within just 48 hours,  
keeping it harvest fresh.

JetSilaj Mısır maintains the freshness and nutritional values of your silage throughout the year, and prevents economic losses by minimizing wastage.

## JETSİL AJ MISIR

It is a complex of 5 types of lactic acid bacteria and 2 types of enzyme specially developed for silage production conditions in Türkiye.

Bacteria and enzyme content	Amount	Unit
Lactobacillus buchneri	84x10 <sup>9</sup>	cfu/g
Lactobacillus plantarum	65x10 <sup>9</sup>	cfu/g
Lactococcus lactis	55x10 <sup>9</sup>	cfu/g
Lactobacillus diolivorans	15x10 <sup>9</sup>	cfu/g
Lactobacillus paracasei	1x10 <sup>9</sup>	cfu/g
Alpha-amylase	4.350	AU/g
Cellulase	2.000	CU/g

## BENEFITS

- Maintains nutritional values.
- Prevents economic losses.
- Protects from oxygen and molding.
- Prevents silage heat up.
- Provides instant and good quality energy.
- Gives an appetizing color and flavor.
- Minimizes wastage.
- Achieves a proper pH level for the covered silage within 48 hours.

## DOSAGE

Recommended to use 1 gram of JetSilaj Mısır per 2 tons of corn silage.

Calculation table for intermediate quantities:

Clover silage quantity	JetSilaj Mısır dosage recommended	Volume of dilution water
10 tons	5 gram	20 liters
20 tons	10 gram	40 liters
50 tons	25 gram	100 liters

## CAUTION!

### To use JetSilaj Mısır:

- Be sure to use fresh and chlorine-free dilution water at a temperature below 30°C.
- Do not add any acid or salt in the mixture or silage material.
- Consume the mixture within 24 hours after preparing it.
- If you will use it after harvest, apply it to each compaction layer.
- If you will use it during harvest, transfer the silage quickly into a silo and compact it.

Then the silage must be covered airtightly.

## HOW TO PREPARE

- Add 50 grams of JetSilaj Mısır in 2 liters of water and stir until the mixture is completely dissolved.
- Dilute this mixture up to 200 liters of water. This volume may be increased or decreased depending on the time of harvest and the dry matter content of the product to be used.

## APPLICATION

Spray the mixture homogenously over 100 tons of corn silage by means of a sprayer.
