

Suicide Data: New York

Suicide is a public health problem and leading cause of death in the United States. Suicide can also be prevented – more investment in suicide prevention, education, and research will prevent the untimely deaths of thousands of Americans each year. Unless otherwise noted, this fact sheet reports 2022 data from the CDC, the most current verified data available at time of publication (May 2024).

14th leading cause of death in New York

- 3rd leading cause of death for ages 10-24
- 2nd leading cause of death for ages 25-34
