***Zeekr 7GT Energy consumption combined in kWh/100km: 16.6 – 19.8 (WLTP), CO₂-emissions combined in g/km: 0, fuel consumption combined l/100km: 0. The figures are based on WLTP homologation. The electric range is influenced by factors including but not limited to driving style and road conditions.*

Charging times may vary based on the power supplied. Maximum DC charging power of up to 450kW (LFP) and 420kW (NCM) represents the vehicle's peak technical charging capability under specific test and operating conditions. Achieving this charging power requires compatible high-power DC charging infrastructure with enhanced cooling capabilities, which is expected to become more widely available as charging networks continue to develop across Europe. Actual charging performance will vary on charger capability, battery temperature, ambient conditions, and other factors.

5year/100,000 km vehicle warranty, extendable up to an additional 5 years/100,000 km by following the Zeekr recommended service and maintenance schedule at Zeekr Hi-Tech Service Centers or Zeekr authorized Service Workshops. Terms and conditions apply.

The availability of vehicle models, options, specifications and colours may vary from market to market and Zeekr reserves the right to make changes without notice. Vehicles shown may include optional equipment not available in all markets and/or additional features that differ from the standard version. Images are for illustrative purposes only
