

## SMART UTILITY

# SMART SOLUTIONS THAT HAVE YOU COVERED.

Our specialist Smart Metering team works closely with utilities and municipalities, empowering them to operate more efficiently and sustainably by leveraging state-of-the-art smart water meter technology — from advanced leak detection sensing to precise pressure management systems.

We specialize in the supply and install of world-class Automated Meter Infrastructure (AMI) solutions designed to reduce Non-Revenue Water (NRW). These systems enhance overall infrastructure performance and deliver real ROI for authorities and communities.

We're your one-stop solution for smart metering and can customize programs that evaluate your system's condition, address immediate issues, and ensure smooth, long-term operation. This means you can focus on your core operations while we handle the technical details.
