

HELPING YOU NAVIGATE THROUGH THE ARCTIC:

TAILORED TRANSPORTATION & SERVICES IN THE ARCTIC

70+

YEARS OF EXPERTISE

WHAT WE DO

With offices on five continents and a reputation built on customer care, Fednav leads international shipping on the Great Lakes and the Canadian Arctic, operating the **world's largest fleet of ice-class bulk carriers**.

Fednav has been the leading shipping company for Canadian Arctic projects since the 1950's and is the only operator sending ships to the Canadian Arctic year round. Fednav owns a fleet of ice-breaking bulk carriers which provide transportation solutions to Canada's northern nickel, zinc, lead, copper, and iron ore mines. The company also provides port management services to Arctic mines and has a team of ice experts dedicated to assisting ships with safe and efficient navigation.

TAILORED TRANSPORTATION AND SUPPLY-CHAIN SUPPORT FOR ARCTIC MINES

With **over 70 years** of expertise, Fednav's Arctic Operations manage transportation activities, port and traffic management, agency services, and support resource development in the North American Arctic. We excel in developing shipping solutions for companies establishing mine sites in polar regions.

HELPING YOU NAVIGATE THROUGH ICE

Fednav Ice Services offers sea ice assessments and marine accessibility studies for current and projected shipping operations in remote polar waters and winter zones. Our proprietary shipboard navigation system, **IceNav™**, is used **by vessels worldwide in ice-covered waters**. This innovative system provides satellite imagery and an enhanced marine radar for sea ice detection, delivering real-time ice and weather information for route planning.

OUR FUTURE IN THE ARCTIC

Fednav is committed to collaborating with northern communities and resource developers to provide innovative, customized solutions for various projects in the Arctic. Our service offering is tailored to the needs of our customer and the project.
