# SALARY GUIDE

2023

PERSOLKELLY is a joint venture established in 2016 between PERSOL HOLDINGS (previously Temp Holdings) and Kelly Services to cater to the rising workforce employment needs of the emerging Asia Pacific market. We are one of the largest workforce solutions providers in the region, spanning over 45 offices across 13 markets, including Australia, China, Hong Kong, India, Indonesia, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, Thailand and Vietnam.

Our reach, scope, and scale of operations have set the industry standard for cross-border recruitment and holistic workforce solutions. Since its inception, PERSOLKELLY has placed over 59,000 positions across the region and works together with 98% of Fortune 100™ companies for their workforce solution needs.

In Australia and New Zealand, the PERSOLKELLY brand is owned and operated by Programmed after they acquired Kelly Services in April 2020.

# Executive Overview

On the back of strong economic growth in 2022,<sup>1</sup> Indonesia's economy is expected to maintain resilient in 2023 in spite of global uncertainty.<sup>2</sup> Since its post-COVID-19 reopening, Indonesia's economy has remained stable amid global shocks.<sup>3</sup>

Bank Indonesia projects an optimistic growth outlook of 4.5-5.3% for the economy in 2023, and an acceleration of growth to 4.7-5.5% in 2024, fueled by private consumption, investment and positive export performance.<sup>4</sup>

Inflation is also expected to ease, with Consumer Price Index (CPI) inflation projected to track downwards to its 3.0%  $\pm$  1% target in 2023.<sup>5</sup> Core inflation may return to this target in the first half of 2023, in line with the monetary policy to manage inflation and maintain a stable rupiah.<sup>6</sup>

In addition, the government is focusing on four other growth-oriented policies – namely macroprudential policy, payment system policy, money market deepening policy as well as inclusive and green economic-financial policy – that are expected to aid national economic recovery.<sup>7</sup>

## Executive Overview

As Indonesia looks beyond COVID-19, synergy and innovation have been called out as key to the country's economic resilience and revival.<sup>8</sup> Accelerating digital transformation will be critical for Indonesia's long-term development and ability to reach its potential in global competitiveness.<sup>9</sup>

To drive inclusive and sustainable economic transformation in Indonesia, the National Development Planning Ministry has unveiled the Indonesia Digital Industry Development Master Plan for 2023 to 2045.<sup>10</sup>

As part of this plan, the government is expected to embark on initiatives that will strengthen the support system for the digital industry's development, expand digital products and services in priority sectors, and bolster the digital industry's contribution to economic growth.<sup>11</sup>

Given that infrastructure is the foundation of inclusive digital transformation, the government is furthermore expediting the development of information and communication technology infrastructure.<sup>12</sup> This move is expected to bring affordable and quality Internet connectivity to all regions in Indonesia.<sup>13</sup>

With these developments, Indonesia's workforce can look forward to fully benefiting from the digital economy, and gaining access to new job opportunities that emerge.

At PERSOLKELLY, our team takes pride in being a strategic recruitment partner to companies in Indonesia, both large and small.

In the coming year, employers and HR leaders will need to navigate a rapidly changing employment landscape and uncertain macroeconomic conditions. We hope that this guide will serve as a valuable resource to help companies adapt their approach to talent attraction, retention, and development, and build a future-proof workforce.

Director, PERSOLKELLY Indonesia

# Our Services

We are well-equipped to respond to your staffing needs.

With our extensive experience and innovative staffing solutions, we will prepare your business for tomorrow's workforce, today.

Reach out to us with your specific workforce needs on the right, or find out more about our areas of expertise.

## Temporary Staffing

Whether you are looking for temporary manpower to cope with seasonal demand or employee shortages, you can count on us to provide only the highest quality temp staff in the quickest, most efficient manner.

## Permanent Recruitment

Looking for talent to take your business to the next level? With our fully integrated recruitment and selection process, you can rely on us to source and shortlist candidates of the highest calibre for your organisation.

## Contract Administration

Whether you are facing an increased workload or require more headcount for a major project, you can rely on us to manage and administer projects on your behalf, recruit staff on short-term contracts and oversee the admin and logistics throughout the agreed term, freeing you to focus on your core business.

## HR Advisory

We help you craft a better experience, customise your approach and coach your team through change through our HR advisory and learning academy services.

## Regional Talent Solutions

In meeting the Future of Work, we offer borderless solutions, leveraging our capabilities as Regional Specialist in End-to-End HR Solutions. We want to partner with you in your journey to build a workforce solution to meet your business needs.

# Life Science

As part of government efforts to unlock Industry 4.0 growth, Indonesia's medical equipment and pharmaceutical industries have been designated priority sectors.<sup>14</sup> The government seeks to increase these sectors' competitiveness by encouraging digital transformation.<sup>15</sup>

Due to Indonesia's high population density and increasing demand for pharmaceutical products, the pharmaceutical industry shows strong signs of promise.<sup>16</sup> Today, there are already as many as 220 pharmaceutical companies in the country, majority of which are focused on the downstream production of medicine.<sup>17</sup> The government's emphasis on reducing pharmaceutical imports will also bolster the standing of Indonesia's pharmaceutical industry products on the international market.<sup>18</sup>

Medical equipment production facilities are also on the rise in Indonesia, growing from 193 to 891 companies between 2015 to 2021.<sup>19</sup> This burgeoning demand for advanced medical equipment can be attributed to heightened public awareness of the importance of healthcare, the expansion of hospitals, and the implementation of Indonesia's public health insurance system in 2014.<sup>20</sup>

# Engineering

Following Indonesia's post-pandemic recovery in 2022, the construction industry is expected to record an annual average growth of 5.8% until 2026, driven by the government's commitment to public infrastructure development and work on its Electricity Supply Business Plan.<sup>21</sup>

Indonesia's carbon neutrality ambitions are also expected to have a significant influence on sectors including oil and gas industry, energy, and more.

To realise Indonesia's key climate target of achieving net-zero emissions by 2060, 32 older-generation coal-fired power plants have been identified for possible closure.<sup>22</sup> Indonesia also plans to establish a nuclear power plant in 2039 to provide new and renewable energy, and is seeking investors to finance the plant's construction.<sup>23</sup> Furthermore, Indonesia is building lithium and anode production facilities as it looks to become an Electric Vehicle production hub.<sup>24</sup>

As oil companies seek to incorporate carbon reduction and renewable energy into their strategies, oil and gas investment is also set to increase.<sup>25</sup> An estimated US\$179 billion investment will be needed to meet the high demand for new and renewable energy.<sup>26</sup>

# Banking & Finance

Disruption has created opportunities and challenges for Indonesia's banking and finance players.<sup>27</sup> Although traditional banks remain consumers' preferred primary financial relationship, new digital banks are quickly gaining ground, driven by the fast-evolving financial services landscape.<sup>28</sup>

The digital payment landscape is also becoming increasingly fragmented, with more than 48 licensed e-wallet platforms led by domestic players.<sup>29</sup>

Over the past few years, Indonesia has seen double-digit growth in digital banking transactions.<sup>30</sup> In 2022, these transactions are set to grow 30% to 53,144 trillion rupiah.<sup>31</sup> Bank Indonesia has also announced plans to introduce a digital rupiah currency that will use blockchain technology.<sup>32</sup>

As new fintech and challenger players enter the market, consumers will benefit from new lending, investments and insurance products.<sup>33</sup> Neobanks may also become the primary financial relationship of previously underserved and unserved groups.<sup>34</sup>

To grow sustainably into the future, traditional banking institutions will be expected to evolve to meet heightened customer and investor expectations, and reshape their operational and business models.<sup>35</sup>

# Consumer Goods & Services

Indonesia's fast moving consumer goods (FMCG) industry is exhibiting signs of optimism.<sup>36</sup> Today, FMCG sales have recovered above pre-pandemic levels.<sup>37</sup>

While rising prices haven't heavily impacted consumer confidence yet, the majority of consumers are being cautious when it comes to spending – in terms of FMCG category growth, the value-for-money segment is growing faster than mainstream and premium segments.<sup>38</sup>

Indonesia continues to see growth in e-commerce too, particularly due to upper and middle class consumers turning to online shopping to seek better value in their purchases.<sup>39</sup> More and more consumers are also displaying omnichannel shopping behaviours; as such, having a strong presence across both online and offline stores is now non-negotiable for FMCG companies.<sup>40</sup>

In 2023, inflationary pressures may lead to further price increases, and Indonesian consumers' consumption habits and priorities will continue to evolve.<sup>41</sup> It will be imperative for companies to fully understand these shifts in the retail landscape, and adapt their strategies to target and continuously drive value for consumers.<sup>42</sup>

# Hi-Tech

Indonesia's digital industry grew rapidly during the COVID-19 pandemic, from US\$41 billion in 2019 to US\$77 billion in 2022.<sup>43</sup> The industry continues to hold significant growth potential, with growth expected to increase to US\$130 billion by 2025.<sup>44</sup>

In addition, Indonesia's Ministry of Finance and the Asian Development Bank predict that the economy could gain \$2.8 trillion by 2040 through technology adoption, adding 0.55 percentage points to GDP growth annually between 2020 and 2040.<sup>45</sup>

Technology trends such as clean tech, the future of connectivity integrating 5G and the Internet of Things, distributed infrastructure such as cloud and edge computing, and next-level process automation, could be key drivers of growth for Indonesia's economy.<sup>46</sup>

Technology adoption is expected to have a profound impact across sectors, though specific implications can vary widely from sector to sector. A tech savvy workforce will be vital to unlock this growth, so that companies and workers can take full advantage of the opportunities offered by new technologies.<sup>47</sup>

# Native Japanese

Over the past few years, Japan has been a significant source of foreign direct investments in Indonesia, consistently ranking among the country's top ten largest investors each year.

Japanese companies invested \$1.75 billion in 2,821 projects in the first half of 2022 – the fourth largest investment in Indonesia from a single country or special region.<sup>48</sup>

More recently, ten Japanese companies pledged a total of \$5.2 billion in July 2022 for the development of electric vehicles, basic materials, and other industries in Indonesia over the next few years.<sup>49</sup>

To allow Japanese investors to stay longer in Indonesia and contribute positively to the economy, the Indonesian government has also enhanced its immigration policy by introducing a second home visa.<sup>50</sup> As Japan-Indonesia relations strengthen, and Japanese companies deepen their investments in Indonesia, professionals with Japanese language skills and familiarity with Japanese work culture will benefit from new career opportunities that will emerge.
