Contract Hiring – IT

Work, and Smile

PERSOLKELLY is a joint venture established in 2016 between PERSOL HOLDINGS (previously Temp Holdings) and Kelly Services to cater to the rising workforce employment needs of the emerging Asia Pacific market. We are one of the largest workforce solutions providers in the region, spanning over 45 offices across 13 markets including Australia, China, Hong Kong, India, Indonesia, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, Thailand and Vietnam.

Our reach, scope, and scale of operations have set the industry standard for cross-border recruitment and holistic workforce solutions. Since inception, PERSOLKELLY has placed over 59,000 positions across the region and works together with 98% of Fortune 100™ companies for their workforce solution needs.

In Australia and New Zealand, the PERSOLKELLY brand is owned and operated by Programmed after they acquired Kelly Services in April 2020.

CONTENTS

Work, and Smile

Working life is a journey of growth and creation.

We all have big dreams, and there are many different paths to success.

Thus, we need to make our own choices
from a range of diversified work opportunities.

Our vision is to enrich society so that all work leads to lives of happiness.

SALARY GUIDE

Methodology: Salary figures included in the 2023 India Salary Guide (Contract Hiring - IT) are derived by combining the expert market knowledge of senior recruitment professionals within the PERSOLKELLY India network, as well as job placement data recorded on the PERSOLKELLY India database.

6 Trends Businesses Need to Know About

The IMF predicts that 1/3 of the world will soon enter a recession. Michale Burry, one of the predictors of the 2008 financial crisis, also has warnings to offer. Even billionaire investor Charlie Munger said, "What we're getting is abject excess and danger to the country." And yet, India's economy remains idiosyncratic. Despite lowered growth forecasts, India's GDP will grow at 7.4% in 2022-23.

India's Contract Hiring Landscape

A major reason for this continued resilience is the world's dependence on India's contract workforce. Whether it is offshoring processes or recruiting gig workers, global companies continue to rely on Indian talent. A [PERSOLKELY report](#) found that India is among the top three most popular offshore locations because it has a large talent pool, a large English-speaking population, and a strong focus on technological modernisation. In this context, we will discuss six trends that will be most important in 2023.

Before we delve deeper into them, we should first understand what temporary work is and why it is growing so rapidly.

What is Contract Hiring and Why is it Relevant?

Contract hiring is the hiring of talent for a short and predetermined period of time. There are several reasons for employers to do this. Some of them are:

- Testing applicants before making them an offer for a full-time position
- Saving costs in the long run
- Managing seasonal peaks in workloads
- Acceleration of value creation
- Increasing flexibility through temporary employees

India is among the top three most popular offshore locations because it has a large talent pool, a large English-speaking population, and a strong focus on technological modernisation.

Since COVID-19 changed work models around the world, contract labour has been gaining momentum. Coupled with the uncertain economic climate facing the world, it is becoming one of the most important tools for companies to stay afloat.

Trends Shaping Contract Hiring in India

1 The Rising Gig Economy
Recent data published by the [Niti Aayog](#) outlines the meteoric rise of India's gig economy. It predicts that the nation will have more than 23 million gig workers by 2029-30.

Events in recent years provide compelling support for this prediction.

First, COVID-19 has highlighted the fragility of traditional employment. It became clear that the notion of a stable income can be completely divorced from a steady job.

In addition, movements such as the Great Resignation and "Quiet Quitting" have left a lasting impression. Work-life balance remains an important consideration for India's robust and skilled talent pool. Project-based work that meets the needs of today's workforce is also on the rise.

India's Contract Hiring Landscape

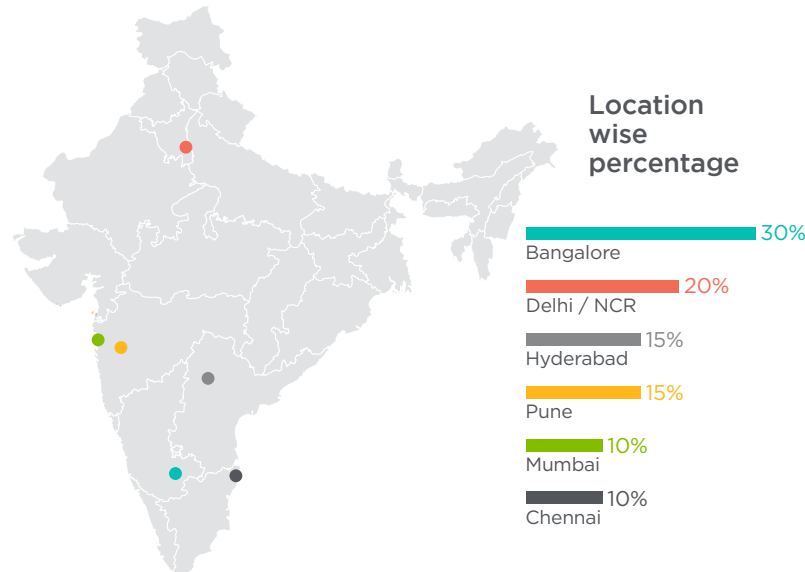

2 Increasing Offshoring

In a report titled 'Why This is India's Decade', Morgan Stanley expressed high hopes for the country's future. The brokerage house predicted that India would become the world's third-largest economy by the end of the decade.

Offshoring will be a critical part of that success story. With an influx of offshoring opportunities, the income of the average Indian will rise and contribute to GDP growth. Regulations support this new shift. The government's Make in India initiative has helped improve India's ease-of-doing business ranking. The change has been worth 79 positions from 142 in 2014 to 63 in 2020.

As this trend continues, growth-oriented companies will increasingly look to Indian talent. Recruiters from North America, Europe, and other parts of the world will hire more Indian contract workers than ever before.

India is a leading offshoring destination, with several cities known for their skilled IT workforce. The current talent distribution across various locations provides valuable insights into the concentration and availability of skilled IT professionals. Among the most popular cities for IT contract hiring in India are Delhi/NCR, Bengaluru, Chennai, Mumbai, Pune, and Hyderabad.

3 Borderless Hiring

The post-COVID-19 business world is the sudden and unexpected antithesis of traditional work models. There are companies that have no qualms about announcing a permanent shift to location-independent working. Dozens, if not hundreds, of forward-thinking companies have followed suit.

In the midst of this cultural shift, leaders are warming up to the idea of building truly global teams. Thinking outside the box when hiring talent also helps promote diversity in the workplace, which is another current concern. Meanwhile, technology to support working

India's Contract Hiring Landscape

from home has matured. From advanced HRMS to competency-based testing platforms, much has evolved to help employers hire across borders.

So, it's only logical that contingent workers have greater access to global opportunities.

4 Employee Experience Matters
Gen-Zeers are more attuned to working in an environment that gives them meaning. They value work-life balance, gender parity in pay, and other characteristics of a good employee experience. Even 80% of employees in India were vocal about not wanting to go back to the office just to appease employers.

This ideological concept can also be applied to temporary workers. When looking for work, temporary workers place just as much emphasis on employee experience. The existence of an employee brand is therefore also crucial for hiring high-quality temporary workers.

5 Specialised Skills in High Demand
One of the main drivers of IT contract hiring in India is the need for specialised skills and expertise. With the rapid pace of technological change, many companies are looking to bring in experts who can help them stay ahead of the curve. Contract hiring allows

organisations to bring in this expertise on a project or task-specific basis, rather than hiring full-time employees.

The AI (Artificial Intelligence) uprising in tech no longer remains in the background. ChatGPT, a tool with widespread public usage, is set to receive a \$10 billion investment from Microsoft. Allied tech like Midjourney and Dall-E show further signs of an upcoming disruption.

Alongside advances in AI, areas like the Metaverse, Web3, and Industry 4.0 are set to enter the mainstream. Even 5G rollout has

commenced in major cities in India and will transform access to fast internet.

With the climate conducive for increasing tech adoption, the need for specialised skills is blooming. Upwork's In-Demand Skills 2023 report detailed how full-stack developers will be most in demand, followed by frontend and backend developers. Tech contact workers specialised in machine learning, low-code no-code, blockchain, AR & VR, and cybersecurity will also have work offers lining up.

Gen-Zeers are more attuned to working in an environment that gives them meaning. They value work-life balance, gender parity in pay, and other characteristics of a good employee experience.

India's Contract Hiring Landscape

Among the most sought-after skill sets in contract hiring are those related to data science, DevOps, Full Stack development, Back End development, Front End development, Robotic Process Automation (RPA), and SAP. These skill sets are in high demand due to their criticality in driving digital transformation and innovation across various industries.

Companies seek to hire professionals with these skills on a contractual basis to enable them to complete projects within the specified timelines and budgets, while maintaining high levels of quality and efficiency. In this context, individuals possessing these skill sets have significant opportunities to develop their expertise, while companies can leverage the talent pool to drive business growth and success.

IT Contract Talent

- Data Scientist
- DevOps
- Full Stack
- Back End
- Front End
- RPA
- SAP

Key Takeaways

Recruitment protocols have changed seismically since the pandemic. Some things have changed for the better, while new challenges have emerged.

Flexible work has taken hold. Workers have a greater say in how they are treated. Conversations about diversity and inclusion have become more commonplace.

At the same time, a global economic downturn is inevitable. Mass layoffs are commonplace. The gender wage gap remains a reality. And at the end of the day, the future of many companies is uncertain.

In a dynamic world of workforce, the growth of temporary work is a decisive factor. At PERSOLKELLY, we recognise that the future of work is dynamic and that attracting and recruiting talent is no longer dependent on location. We offer borderless customised solutions, leveraging our capabilities as Regional Specialist in end-to-end HR (Human Resources).

With a proven track record in temporary and contract staffing, we connect our clients with the best talent and deploy technological solutions to efficiently manage these contractors.

6 Temporary Hiring in Leadership Roles

Interim positions are not limited to low-stakes functions. In 2023, filling interim leadership positions is no longer a one-off. More and more companies are considering hiring interim Chief Executive Officers (CEOs) and Chief Experience Officers (CXOs).

For startups with scarce resources looking for quality insights, this is a great prospect. They can find someone to steer the ship for a while before they become a fixed cost.

Larger companies have also taken advantage of this opportunity for interim leadership positions. They can rely on temporary leaders to fill efficiency gaps before hiring a full-time C-level executive.
