# FONTANA, A DREAM PROJECT IN CASCADA DE CAMOJAN

## We attended...

The glamorous launch of the luxurious Fontana development of five villas that is being built in the prime location of Cascada de Camojan. Funded by Pacific Investment, masterminded by Christian Penna of Penna Properties and designed by Torres y Sierra Architectes, these residences will be the most exclusive on the coast.

## We were thrilled by...

The designs of the villas and the attention to detail that has gone into the project, including the landscaping, security and concierge features that will make this development one to rival both La Zagaleta and Sierra Blanca.

## We thoroughly enjoyed...

The entire party that included live music from singer Laura Wright, the flowing drinks and the delicious sushi and canapes.

## Congratulations and thanks to...

The Fontana team for organising such an entertaining and inspiring launch for the project. We know we'll have to wait at least 18 months to see them finished, but they will be worth the wait!
