

Product and Trademark Piracy

10 REASONS TO AVOID COUNTERFEITS

1. You endanger the life and safety of all road users by using a tool that provides inaccurate or even false information and is not verified by qualified personnel.
2. It is illegal and supports organized crime.
3. There are no technical updates, so the software is very outdated.
4. There is no warranty.
5. There is no customer service or technical support.
6. There are economic damages for company and customer:
 - Additional financial expense for property damage or even personal injury.
 - Software damage in the car due to hidden viruses in the counterfeit software.
 - Jobs will be lost.
 - Public authorities must be paid for the purpose of criminal prosecution.
7. The quality of the counterfeits is inferior and susceptible to damage to cables and hardware.
8. Bad for your company's image and damages your credibility.
9. You support the theft of intellectual property and disregard the life and work of other people.
10. You support poor working conditions in Asian countries, where the counterfeits come from.
