

General safety warnings

- The TFR-3 is intended exclusively for use in measurement and testing applications on motor vehicles. The operator is responsible for any damage resulting from improper or unintended use.
- Use of the device requires automotive technical knowledge on the part of the user, including an understanding of general sources of danger and risks in the workshop and on motor vehicles.
- Before using the device, the user must read the quick start guide as well as the operating instructions and safety information for all accessories completely and carefully.
- Throughout the entire period of use, all notices and instructions provided by the diagnostic software must be strictly observed and followed.
- In addition, all applicable general regulations issued by trade supervisory authorities, employers' liability insurance associations, motor vehicle manufacturers, environmental protection requirements, as well as all laws, regulations, and codes of conduct that apply to the operation of a workshop must be observed.

Safety instructions – TFR 3

- To avoid improper operation and the resulting injury to the user or damage to the TFR-3, the following instructions must be observed:
- Protect the TFR-3 from strong impacts, such as those caused by dropping the device.
- Protect the TFR-3 from prolonged exposure to direct sunlight to prevent deformation.
- The TFR-3 is not waterproof and must therefore be protected from rain and other liquids.
- After use, the TFR-3 must be removed immediately from traffic and access areas.

Warning: laser radiation

- Do not look directly into the laser beam and do not unnecessarily aim the beam at other persons.
- Direct exposure of the eyes to the laser beam may be hazardous.
- Viewing the laser beam with optical aids [e.g. binoculars, telescopes] may be dangerous.
- Before putting the laser into operation and using it, the user must have fully read and understood the manufacturer's operating instructions and safety information.
- This product is classified as a Class 2 laser.

Warning: risk of crushing

- When adjusting and tightening the flexible mounts, ensure that no limbs are within the hazard area to prevent crushing injuries

Care and maintenance

- The TFR 3 must be cleaned with a soft cleaning cloth and mild cleaning agents if it becomes dirty.
- Damaged accessories must be replaced immediately.
- Use only original spare parts.
- A visual inspection must be carried out at regular intervals, and if necessary, readjustment of the vertical alignment of the mounting rod using a line laser is recommended.

Disposal

- The device must not be disposed of with household waste.
- Disposal must be carried out in accordance with the laws and regulations applicable at the place of use.
