ACCOMPANYING NOTES

1. These statistics refer to removal of sand and gravel from the bed of the English and Welsh Territorial Sea and Continental Shelf, under licence from The Crown Estate Commissioners. Removals from areas not in The Crown Estate ownership are not included in these statistics, nor area dredged materials removed purely for navigational reasons and not used beneficially.
2. All the statistics relate to royalty returns for the 2023 calendar year.
3. All permitted and actual extraction figures are expressed in metric tonnes. A conversion factor of 1.73 for aggregate and 1.5 for sand, has been applied where necessary, to convert cubic meters to metric tonnes.
4. The reported permitted removal tonnages shown within this report refers to the tonnage permitted within The Crown Estate production agreement. This is correct as at 31st December 2023.
5. The tonnages exclude corrections relating to late declarations and those identified during the audits.
6. The regional landing statistics totals will not equate to the amount dredged from each region, due to the presence of the export market and movement of aggregate to meet differing home market demands.
7. The county landing statistics for England are based on ceremonial counties and preserved counties for Wales.
8. An Official Port Listing is included (pages 16-17), which illustrates the individual landing locations (current and historic) and the standard name used within this document.

Humber / North East Total	1,174,528

During 2023 material extracted from the region delivered to:

3.46

million tonnes of primary aggregate were extracted out of the permitted **6.87 million tonnes** from **10 licences***

0.64

million tonnes of aggregate were extracted for **Beach Nourishment**

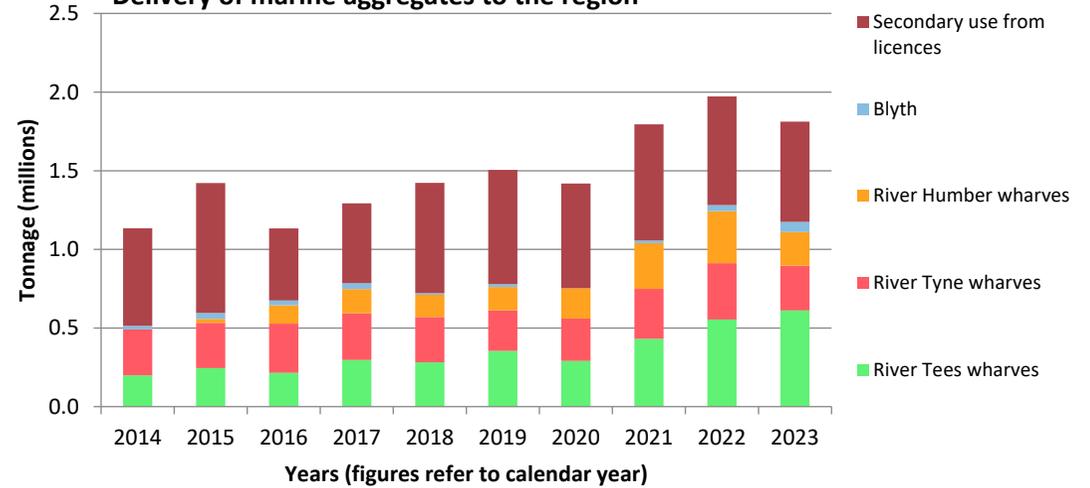

14

Current estimates suggest there are **14 years** of primary aggregate production permitted *

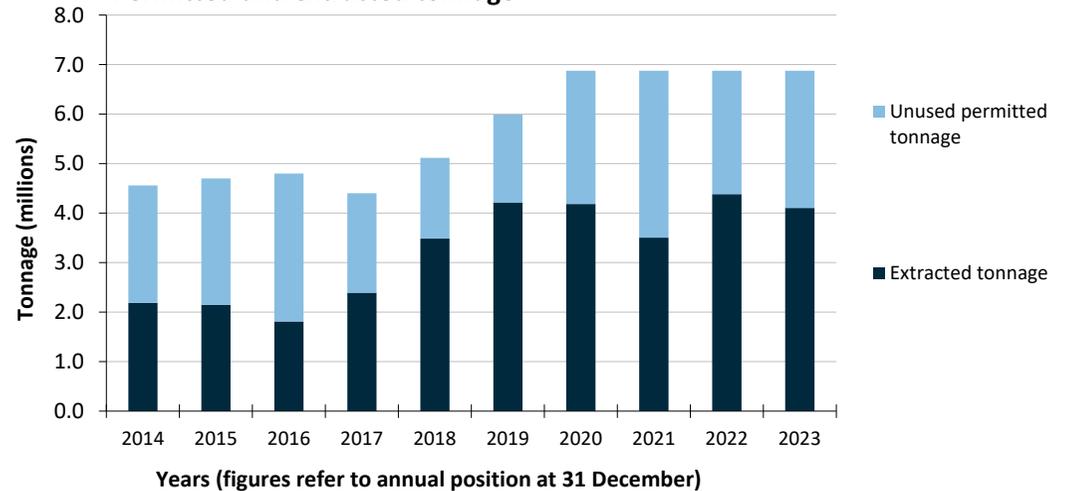

1

Current application for a licence could, if approved **increase** the permitted tonnage by **0.5 million tonnes** annually *

Delivery of marine aggregates to the region

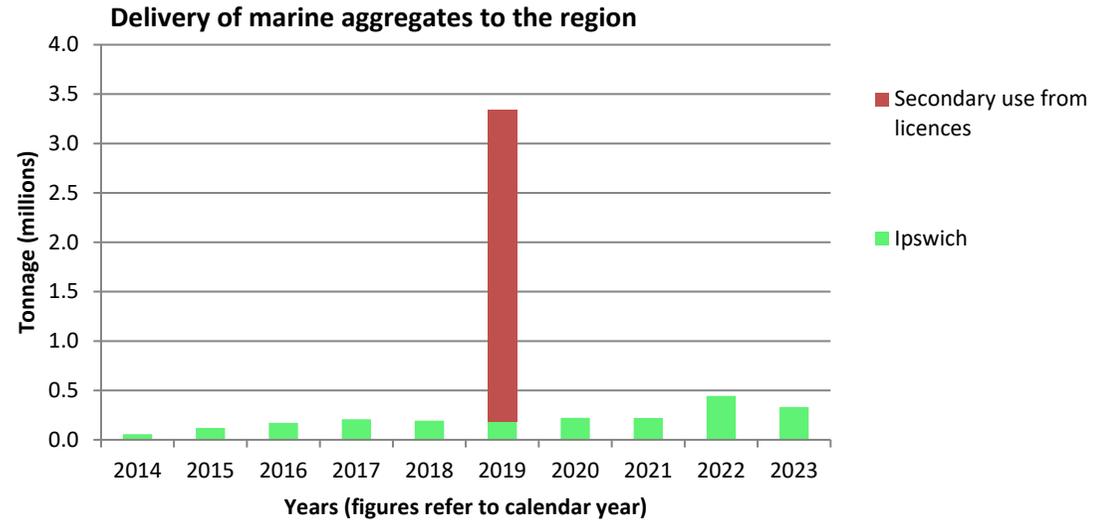

Permitted and extracted tonnage

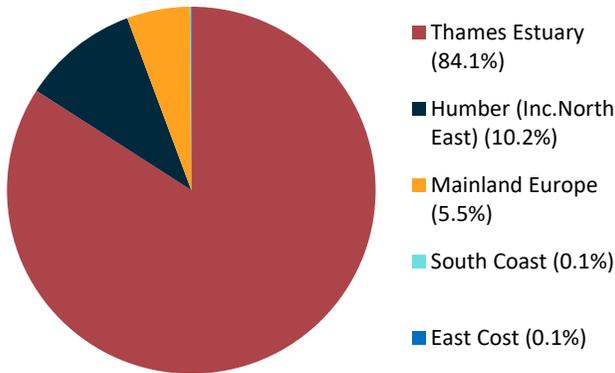

The East Coast region

Tonnage delivered to landing locations in the region

Landing locations	2023 tonnages
Ipswich Wharves	331,843
East Coast Total	331,843

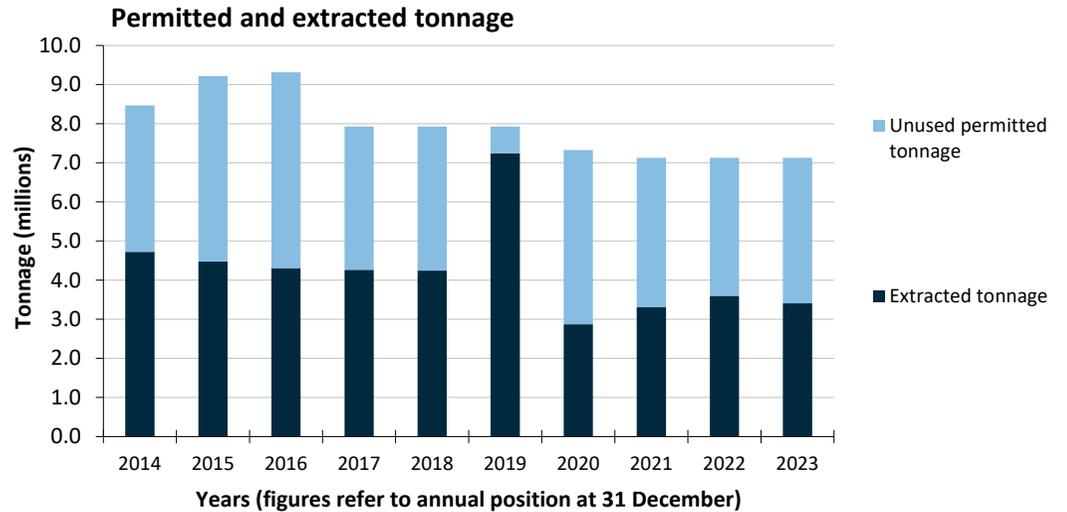

During 2023 material extracted from the region delivered to:

3.4

million tonnes of primary aggregate were extracted out of the permitted **7.1 million tonnes** from **11 licences***

No marine aggregate was extracted for **Beach Nourishment**

9

Current estimates suggest there are **9 years** of primary aggregate production permitted *

1

Current application for a licence could, if approved **increase** the permitted tonnage by **0.65 million tonnes** annually*

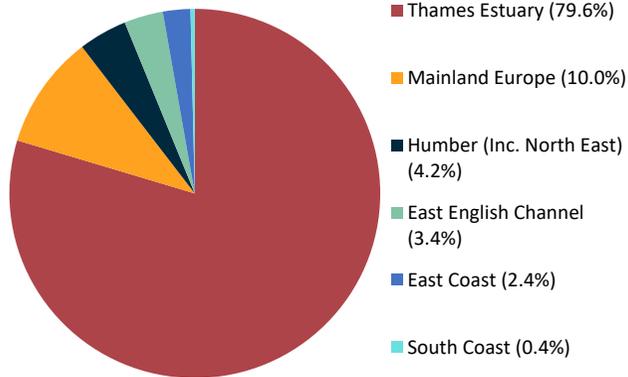

The Thames region

Tonnage delivered to landing locations in the region

Landing locations	2023 tonnages
Cliffe	1,463,300

East English Channel Total	663,749

During 2023 material extracted from the region and delivered to:

3.5

million tonnes of primary aggregate were extracted out of the permitted 9.1 million tonnes from 9 licences*

0.4

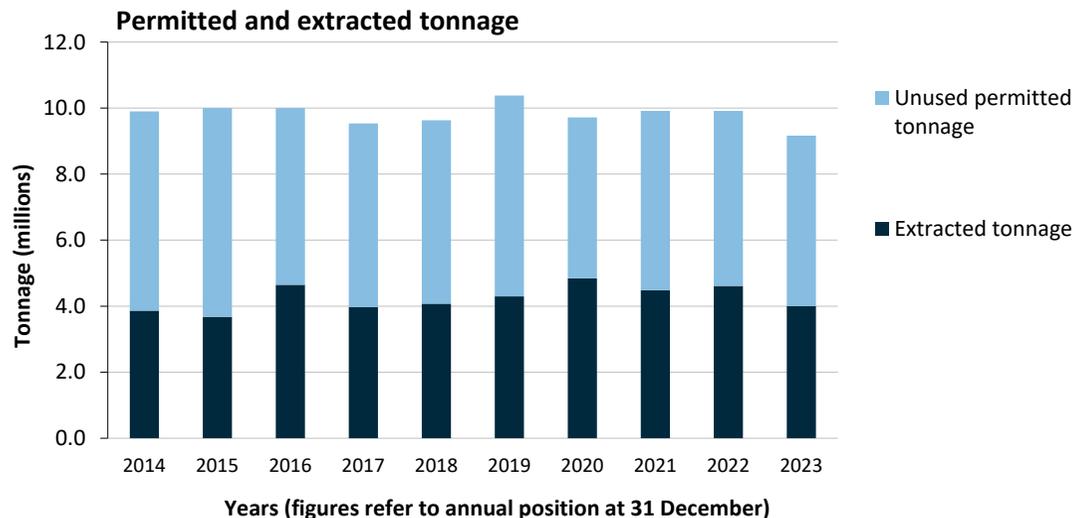

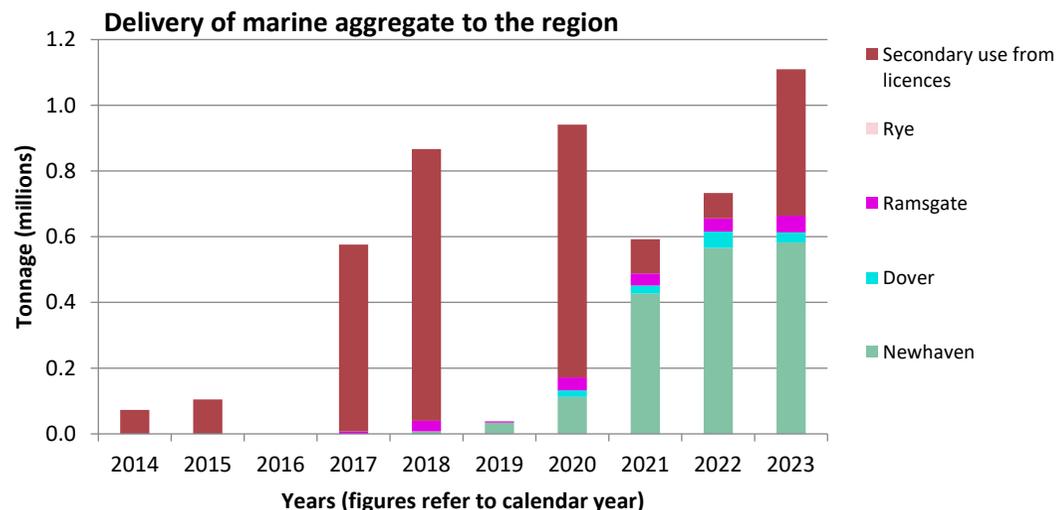

million tonnes of aggregate were extracted for **Beach Nourishment**

34

Current estimates suggest there are 34 years of primary aggregate production permitted *

5

Current applications for licences could, if approved **increase** the permitted tonnage by **3.4 million tonnes** annually *

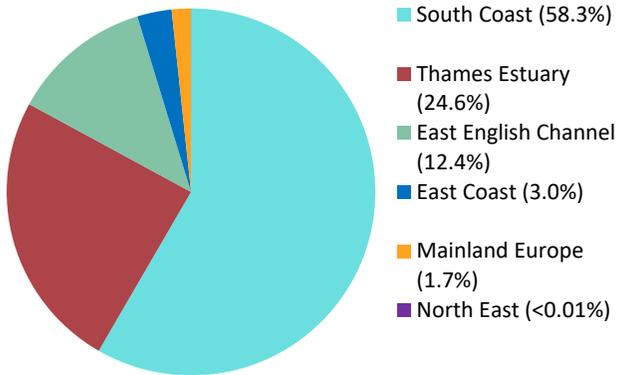

The South Coast region

Tonnage delivered to landing locations in the region

Landing locations	2023 tonnages
Cowes	41,162
