

SEE VISION EYE INSTITUTE IN WELLINGTON CELEBRATES THE  
OPENING OF THEIR NEW LOCATION!

**FOR IMMEDIATE RELEASE**

**Wellington, Fla (April 21, 2025)** – See Vision Eye Institute is proud to announce the opening of its new, state-of-the-art 15,000 sq ft facility in Wellington. The expansive location features fourteen advanced exam lanes, a cutting-edge laser suite, two office-based surgical suites, and a full-service optical department. More than just a new building, this facility represents a renewed commitment to delivering world-class eyecare to the community.

"This practice began as a vision—my dream to create a space where patients could access the most advanced eye surgery in a setting that reflects precision, efficiency, and care. With the opening of our new building and the upcoming launch of our surgery center, that dream is now a reality. We're proud to support the residents of this community with the sophisticated care they deserve—and we're just getting started." Jason Gorscak, MD, Founder and Owner

Jason Gorscak, MD's training includes undergraduate studies at Johns Hopkins University, medical school at the University of Miami School of Medicine, and residency at the University of Medicine & Dentistry of New Jersey. While in South Florida, he fell in love with the area and the people and decided to bring his vision of offering cutting-edge cataract care and next-gen technology to fruition by creating See Vision Eye Institute. Dr. Gorscak achieves remarkable outcomes by combining his exceptional surgical expertise with an emphasis on creating strong patient-doctor relationships.

At See Vision Eye Institute, the team is committed to delivering the most advanced vision correction available today. The new facility and surgery center will feature the latest in cataract surgery technology, including image-guided systems and femtosecond laser-assisted techniques for unmatched precision and safety. We offer a full range of premium intraocular lenses (IOLs)—including toric, multifocal, and light-adjustable options—allowing patients to reduce dependence on glasses and achieve customized visual outcomes. For those seeking an alternative to LASIK, we specialize in refractive lens exchange (RLE) and the implantation of collamer lenses (ICLs), which provide a safe, effective solution for patients with high refractive errors or thin corneas. Every technology we adopt is chosen with one goal: to help our patients live better by seeing better.

"Opening our new facility—and soon, our surgery center—is more than just growth; it's the realization of our purpose. From cataract surgery to refractive lens exchange, we deliver solutions that empower people to live their best lives. As we expand, we remain deeply committed to becoming an employer of choice—investing in great people, great outcomes, and a facility where excellence is the standard. This expansion reflects our long-term vision for leading ophthalmic care in Palm Beach County." Myra Cherchio, CEO

The See Vision Eye Institute team is ready to welcome you into a space that reflects the way they care—clearly, intentionally, and without compromise.
