

# Vecos Smart Locker System

VECOS 

schiaavello

# Introduction

Schiavello continues to grow a successful partnership with Vecos of 10 years, producing and servicing over 150,000 lockers in this time.

Schiavello are the only company in Australia that can provide a full turn-key solution as illustrated below. The end to end process begins with the initial design and build including tailored joinery manufactured locally in Tullamarine, Melbourne. Delivery and on site installation includes integrating both hardware and software into all joinery. And finally ongoing training and technical support with the Releezme software for both day to day user experience and data reporting, as well as any hardware upgrades or replacements.

# Making workplace storage work better

**Vecos** began in 1996, with a determination to harness the true potential of workplace storage. And although still headquartered in Brainport Eindhoven, The Netherlands where they started – they’ve come a long way since then.

They were the first to see the huge potential of the often-overlooked category of lockers – and their essential role in creating successful dynamic workplace. They created the world’s first and only smart locker platform. A self-service, hassle-free, SaaS based system powered by data, and fully integrated into any IT ecosystem.

# The smart locker system for the hybrid workplace

The way we work is changing and flexibility is now expected. With our self-service smart locker system, your people can work how they want, with secure storage when and where they need it. Make your workplace more flexible, employee and resource-friendly.

As the world's workplace becomes more and more technology-driven – we're more focused than ever on helping as many people as possible access our solution.

# The power of smart lockers

**Our smart workplace lockers helps you save on space, time and costs – while inspiring your people and making sure you're ready for anything.**

**Don't pay for air**

Did you know that 40% of office lockers go unused?

With our smart system, locker usage is optimized so all your lockers get used. As a result, you'll need fewer lockers and save on space.

**Self-serve lockers are hassle-free**

Your people can help themselves to more than just coffee.

Smart lockers mean your people have access to storage without facility management intervention. So no more lost keys or wasted time – hello to frictionless freedom of movement.

**Remote support**

Sometimes employees still need a level of support to answer questions or improve their experience.

Luckily you can remotely support your employees even when you're not on site.

**Better for the finance team and the planet**

A more flexible and sustainable approach to workplace storage.

By encouraging a more optimal application of resources, you'll use less space and energy, keeping everyone happy.

**Retrofit to support a circular economy**

Supply and install a retrofit solution to activate existing storage.

Not only does this create a better experience for the user but also reduce unnecessary contribution to landfill.

**Flex to be future ready with real time data**

Adapt quickly when your workplace needs change.

The smart system is designed to flex to changing needs - user data and insights support real-time business decisions which you can adapt to instantly, however also enable forecasting for future asset management.

We help people  
and workplaces  
to flex

Hassle free user-experience:  
A smarter system that's easy,  
seamless and scalable

Super easy to use - open lockers via  
app driven experience or swipe card

Save facilities on management time

Security is top priority

# One Smart System, multiple solutions

With just the one smart system, you can help your people feel at home on every floor, empower collaboration, improve internal logistics and make visitors feel welcome.

## EMPLOYEE DAY LOCKER

### Work comfortably, anywhere

Flexible offices are inspiring places to work – and with our Day Locker configuration, your people can feel at home on every floor. With settings for single-day use or fixed usage time windows, you remove all barriers to flexible working and support total freedom of movement.

## EMPLOYEE PERSONAL LOCKER

### A personal, secure space

With offices moving to hybrid ways of working, shared spaces are on the rise – and personal desks are disappearing. A smart locker is a great way to give employees the personal, secure feel of a fixed desk, while allowing them to move around more freely.

## TEAM LOCKER

### Share and collaborate easily

With a smart Team Locker configuration, employees, can create a self-service team storage solution. Handing over documents and using shared materials made easy, with little to no dependence on other team members' schedules.

## PARCEL LOCKER / COLLECTION

### A central place for parcels

More employees are ordering parcels to be delivered to their office. With a smart Parcel Locker configuration, the delivery staff simply place the parcel in a locker, and the recipient is automatically notified. The entire process is streamlined, with security ensured and no more lost or missing post.

## VISITOR LOCKER

### Visitors feel welcome

It's not just your people who want secure, flexible storage. When guests visit, you can make them feel instantly comfortable, with an assigned locker for their personal items.

This allows you to flexibly allocate a certain number of lockers to visitors, so you'll always have plenty available when you need them. It's just as easy to re-allocate them back to employees, too.

## CHANGING ROOM LOCKER

### Encourage health and fitness

A good balance is key to happy, motivated employees. So, whether your people are coming in straight from the gym, have a lunchtime class, or need to change after work for a session – a smart Changing Locker configuration makes it easy and accessible.

Using smart changing lockers means you can dynamically allocate facilities to different employees, supporting more of your people, while using fewer resources.

## IT SPARE PARTS LOCKER

### Better manage and track equipment

With teams working remotely, or between home and the office, you can help with remote IT asset distribution and management.

With our IT spare part configuration, employees can receive, manage and track IT equipment or inventory across the organization, with end-to-end access tracking.
