SCHIAVELLO *DESIGN STUDIO*

The Schiavello Design Studio is made up of a number of multi-disciplinary designers and engineers with expertise in industrial design, interior design and product engineering. Supported by an array of trade-based professionals, the technically focused team brings a diverse expertise to new and evolved product development.

Maintaining thoughtful, innovative and research-driven outlooks on design trends, the Schiavello Design Studio has been the driving force behind a number of the company's most successful designs. Some of the team's most notable concepts include Krossi in 2013 – the first and only Australian made and designed sit/stand desk – and the pioneering Climate workplace system in 2010, which is still one of the most malleable products of its kind. In addition, the studio continues to develop Schiavello's furniture offering, catering to changing typology trends, business and people needs and technology requirements, while maintaining product quality, longevity, effortless visual appeal and environmental sustainability.

Introducing Focus Quiet Room

Meet the latest generation of Focus Quiet Rooms

With a refined façade, advanced tech integrations and new sizes, the award-winning Focus Quiet Room collection now provides more room and function for any purpose.

Providing a place of uninterrupted focus and privacy within your office space with industry-leading acoustic performance. The collection of six precision engineered rooms are powered, ventilated and equipped to function comparably with any architectural structure, yet mobile in nature for ease of future reconfiguration or relocation.

A new lighting system extends light throw, whilst a new flexible door system enables inward and outward swinging doors, as well as inter-room adjoining doors.

Alongside globally recognised quality safety certification bodies UL & BIFMA, the Focus Quiet Room collection is built to best practice accessibility standards.

Leading acoustic performance

With an insulated ceiling, walls and 10.38mm thick laminated glass, paired with an automatic drop seal at the door base, Focus Quiet Room achieves an exemplary acoustic rating of DW 32. Allowing minimal opportunity for sound to intrude or escape, this premium piece of considered engineering results in a room where employees can go to focus, connect and collaborate with minimum disruption.

Improve productivity

Distracting and intrusive noise can lead to poor concentration and is a costly problem for many businesses. Research suggests that office workers lose over an hour per day due to uncontrolled interruptions. Focus Quiet Rooms create a place of solace from the bustling surrounding environment – a place where concentration can occur without distraction.

Optional integrated technology features can enhance the users experience further, including video conferencing functionality, height-adjustable worktops and meeting room booking panel, FQR NX.

More room for any purpose

Available in a range of sizes, including two recent ‘expanded’ additions, Focus Quiet Rooms offer a private space to stay connected, both inside and out.

The classic **Phone Room** is designed to fit a work shelf and stool to create a low footprint space for private calls, while the new **Phone Room Plus** offers even more space for confidential phone and video calls, alongside a new optional height-adjustable worktop.

The mid-size **Work Room** has increased in size and is ideal for video conference calls, longer phone calls or high concentration solo work. It can accommodate a generously proportioned lounge chair and side table, or a task chair and 1270mm (50”) wide workpoint.

For added functionality with a similar footprint – 300mm (11.8”) deeper – the **Gather Room** (formerly Duo Work Room) now delivers an even larger haven for seamless collaboration and connection. It also offers space for a 90-degree wheelchair turning circle, providing best practice accessibility.

The new **Gather Room Plus** delivers exceptional accessibility, with space for a wheelchair 180-degree turning circle. Suitable for confidential meetings, phone and video calls and collective brainstorming sessions of two-four people, Gather Room Plus has versatility at its core.

Meanwhile, the generous sized **Meeting Room** now boasts even more space, supporting a combination of furniture options including a sofa and executive desk for a private office, or a table with chairs to create a confidential meeting room.

Gather Room Plus

Meeting Room

Complete comfort

Focus Quiet Rooms come with integrated, motion-sensor lighting and ventilation services in the ceiling, with wall mounted switches offering manual control of lighting and ventilation in the meeting room (an optional add-on for all other room sizes). Quiet and seamless, the integrated fans circulate air flow maintaining office temperature inside of the room.

Quality & safety assured

The Focus Quiet Room range has been engineered to meet *Global Building and Furniture Standards across stability, ventilation, lighting; DDA compliance (AS1428) and fire safety compliance*. The following certification has been achieved;

UL (Underwriters Laboratories) Certification

Under standard UL 962. Certificate download available online. Founded in 1894, UL is a global safety certification company, headquartered in Northbrook, Illinois.

Special Seismic Certification

Qualified in accordance with International Building Code (IBC) 2018 and California Building Code (CBC) 2019.

Seismic certification ensures components will withstand and operate after an event such as an earthquake.

*Please ensure relevant certifying bodies are consulted prior to specification and purchase.

Designed to support all abilities

A step-free floor and engineered door handle design and height position offer increased accessibility across the entire Focus Quiet Room collection, while the generous proportions of Gather Room, Gather Room Plus and Meeting Room deliver ample opening and circulation space for wheelchair access.

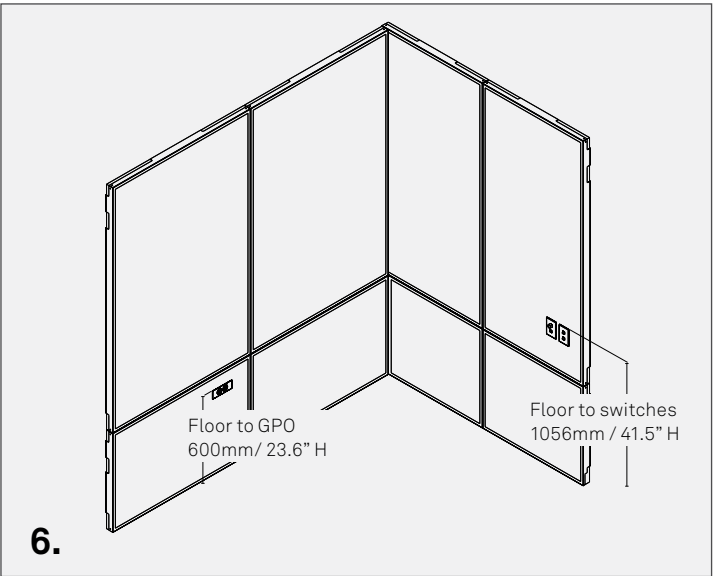

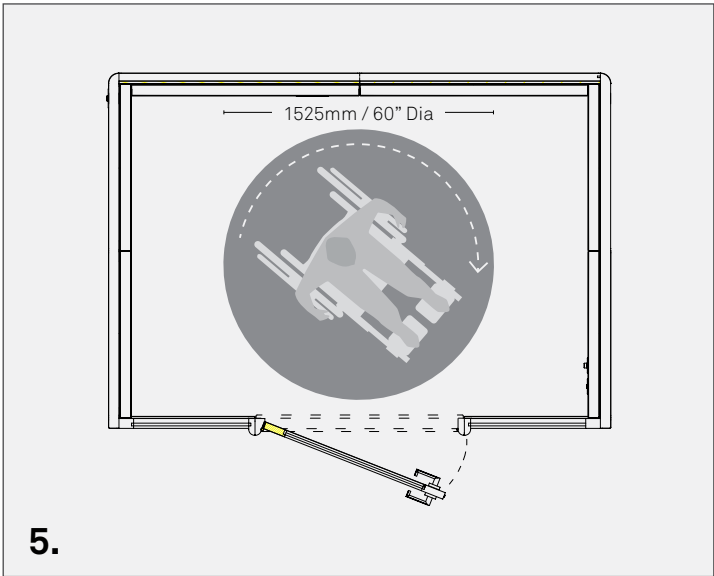

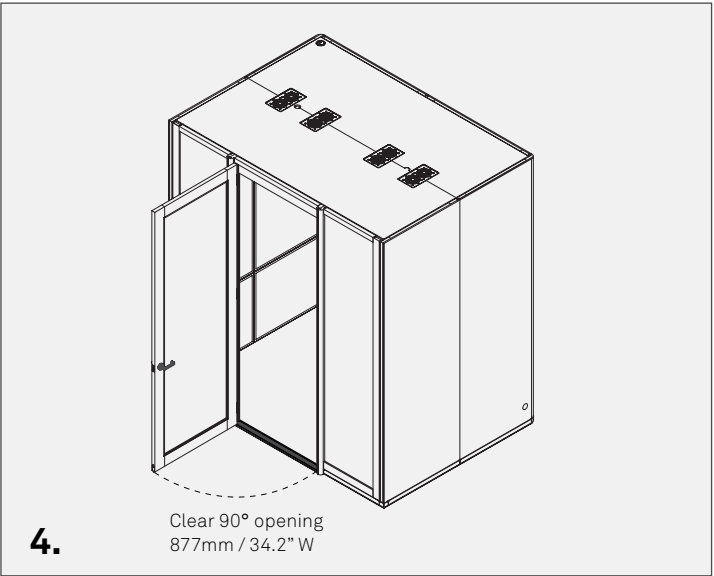

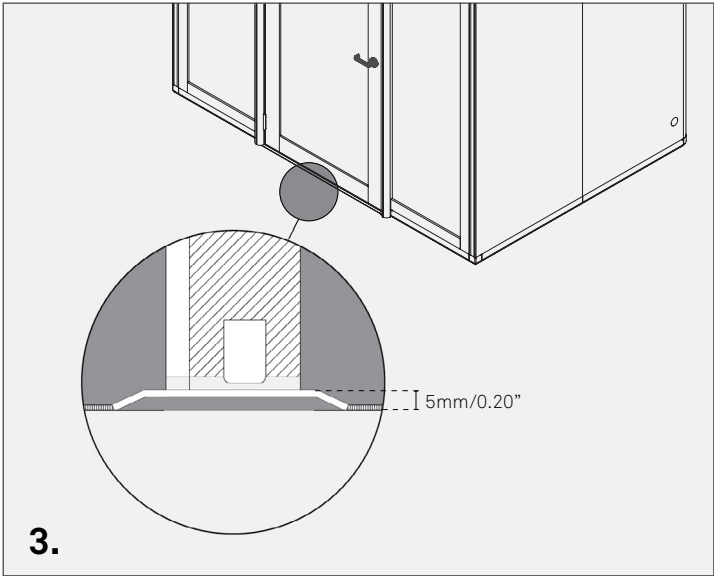

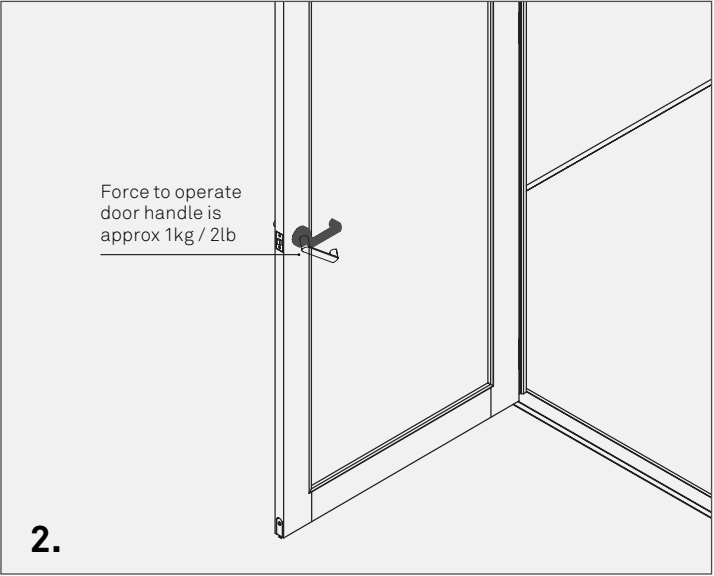

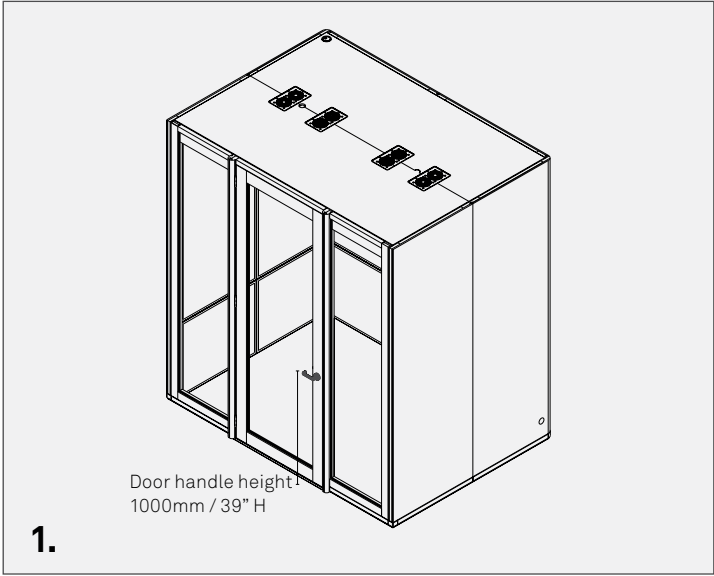

For those with neurodiverse needs, Focus Quiet Rooms can also offer a quiet, private space to retreat within open plan workspaces. Finishes across the Focus Quiet Room range can be tailored, with colour ways and textures used to evoke a variety of emotions and moods.

Sector-leading accessibility

Specific features that enhance Focus Quiet Room’s accessibility, include:

- 1. Door handle design, height placement within reach
- 2. Handle operation, minimal force/strength to open
- 3. No-step floor, minimal change in level (5mm high door threshold)
- 4. Doorway access and opening, ample width (full width opening 906mm/34.2")
- 5. Internal space, room for 90-degree wheelchair turning circle within Gather Room, and 180-degree in Gather Room Plus and Meeting Rooms (pending furniture selection)
- 6. Interior power unit and switches, height position within reach

Your curation

Focus Quiet Rooms can be tailored to suit a range of interior palettes, thanks to the contemporary range of ColourLab finish options available. Select colours and finishes across beech timber applied washes, fabric and leather upholstery, laminate and veneers to create a room as unique as the space it's in.

A new flexible door system allows the choice of either inward or outward swinging doors, as well as inter-room adjoining doors for room clusters with shared walls.

Features & accessories

Advanced technologies and functional improvements enhance the user experience with access, control and comfort benefits through the use of optional features and accessories.

FQR NX Integrated Technology

FQR NX offers a WiFi-enabled meeting room booking tablet that is integrated with the Nura Space workplace management platform.

How to Select Finishes

1. Exterior Side Walls

- _ Solid timber, Beech or Walnut Milano
- _ Upholstered fabric panels
- _ Laminated timber

2. Interior Side Walls

- A. Solid acoustic wall panels
- _ Upper tile: fabric wrapped
 - _ Lower tile: metal powder coat
- B. Other full height wall panels
- _ Fabric wrapped

3. Window and door frame*

- _ Solid timber, Beech or Walnut Milano with clear finish
- _ Solid timber with applied wash in a range of colours
- _ Option to select contrasting door finish or door feature trim

**Front only for Phone Room*

4. Exterior Front/Rear Walls (left or right)*

- _ Glazed panel
- _ Solid acoustic panel
 - Solid timber, Beech or Walnut Milano
 - Upholstered fabric panels
 - Laminated timber

**Rear only for Phone Room*

5. Ceiling Panels

- _ Perforated metal powder coat
- _ Option to fabric wrap

Ecology and sustainability

Schiavello’s most important commitment to sustainability is the company-wide Environmental Management System under ISO 14001. The environmental design principles realised means we design for the environment, focusing on efficient energy use and minimum emissions, longevity and durability, re-use and recycling of our products.

Our principles of ME WE (Materials, Energy, Waste Emissions) give us a simple way to think about how our operations impact the environment.

Printed on an Australian made paper stock that is PEFC Certified and made from elemental chlorine-free bleached pulp sourced from sustainably managed forests and non-controversial sources. It is manufactured by an ISO 14001 certified mill using renewable energy sources.

About Schiavello

Schiavello is a multi-disciplinary company dedicated to developing intelligent, inspiring, ecological and resilient solutions for the office, the home and public spaces.

Schiavello’s concepts and products are developed in Australia by applying a design process that brings together the company’s core design principles and engineering with the creativity of local and international designers. The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation’s needs and people, allowing us to consistently achieve our philosophy that ‘Anything is Possible’.
