

Agile Table

A symbol for collaboration¹

The will to connect with others is an intuitive action, and it's this connection that invariably leads to collaboration. Whether collaboration is planned or occurs spontaneously, the positive result of people working with one another can be witnessed in the remarkable accomplishments humanity has achieved together.

schiaavello

The Knowledge collection

Schiavello’s Knowledge collection is comprised of cutting-edge products that are based on extensive research conducted by our Schiavello Design Studio and People and Culture Consulting teams. Led by strategic research into how businesses and employees function, these products help achieve goals and solve problems within the workspace furniture industry.

AMANDA STANAWAY

Amanda Stanaway, Principal of Woods Bagot Sydney, sits at the forefront of workplace design, currently working with a broad portfolio of corporate clients worldwide. Her role encompasses strategy and interior design across the commercial, lifestyle and public sectors and this mix of skills and diversity of knowledge provides a unique, comprehensive and innovative approach to projects for her clients. Amanda has been instrumental in creating some of the most cutting-edge workplaces in Australia – workplaces that have delivered real business advantage and positive change for their organisations.

Together with Amanda, Schiavello’s People and Culture and Product Development teams identified a gap in the market for a team table that fostered active interactions while supporting an overall agile mindset within the workplace. The initial phase of the design process saw Amanda develop a brief, identifying the various work modes and flows that an agile team table should support. Enabling forming and reforming working environments and activating communication, the outcome from the partnership led to the development of the Agile Table. The table re-defines the way in which people interact and activate spaces by allowing them to choose their preferred work mode, and enabling them to transition from group work to independent work seamlessly.

KETI MALKOSKI

As Principal of Schiavello’s People and Culture Consulting, Ketí Malkoski assists clients through workspace change.

Understanding change management and how people use workspace enables businesses to define successful strategies that harness the workspace as a tool for work. An expert in people and culture considerations to the workspace, Ketí’s ongoing research aims to understand diversity in people and the impact of workspaces on employee attitudes and behaviour.

With a Bachelors and Honours in Psychology and Masters of Organisational Psychology, Ketí assists clients in optimising their future workspace strategy to ultimately improve employee and business effectiveness. Collaborating with global organisations, she has extensive experience in leadership development, creating and executing attraction and retention strategies, culture assessment and development, change management and diverse personality and aptitude assessments.

NICK TENNANT

Nick Tennant is a lead designer within the Schiavello Design Studio.

With 15 years’ experience in interior design, Nick’s distinctive work is informed by his time collaborating on award-winning projects for leading Australian and international architecture and interior design firms. A value-adding resource for clients, Nick consults on producing tailored solutions including workspace planning and bespoke product design.

Nick grew up in Melbourne and studied industrial design at RMIT University and is proficient in a diversity of sectors including large and small-scale workplace design. His experience and collaboration with the Schiavello Research Hub ensure he is attuned to current as well as future needs of workplace environments.

With an astute eye for balancing aesthetics and pragmatic functionality, Nick has been instrumental in the concept and design development of the Climate workplace furniture platform and the Focus program of work settings.

The collection

The Agile Table consists of two different tables – the **Storming Table** and the **Work Table**. Each table can be used separately, or joined together to become the Agile Table. Available in single, dual-height fixed or height adjustable configurations, Agile Table fosters greater agility across a wide range of spaces. With the option to add multiple workpoints, tools and accessories, the collection supports both dynamic collaboration and focused concentration.

Working for effectiveness

The way we switch between independent and group work greatly affects our productivity and memory retention.

The human brain can only hold between five and nine items of information at any time, before we need to disengage from a group setting and engage in independent work. This independent work may include taking part in focused solo thinking or note taking to retain the items of information longer term. Therefore, being able

to effectively switch back and forth between group and individual work without distraction in transition allows employees to take those items of information and process them alone, creating the greatest level of efficiency in the workplace.

The Agile Table allows for seamless flows back and forth from collaboration to independent work, allowing employees to get the most out of every interaction.

A table to meet all needs

Agile Table’s design considers all ways in which employees may work and meet, and all factors that can affect the space they choose to work within. Factors such as whether a meeting is face-to-face or virtual affect the choice of location, as audiovisual technology may or may not be required. Similarly, the duration of a meeting will need to be considered – a short meeting could happen at a standing-height table, whereas a longer meeting would need to occur

where employees can be seated. During the creation of the Agile Table, all these factors were considered and unified into a dynamic table that not only meets the needs of the contemporary workspace, but also has the ability to cater to almost every one of the aforementioned factors. The result is a table that supports all needs with the right space and tools for any task.

Agile Table: supporting different meeting settings

Interaction

Either face-to-face, over the phone or digitally via audiovisual equipment, facilitated through the Agile Power Totem.

Duration

A 15 minute standing meeting, facilitated through the Storming Table’s standing height, or a longer, seated meeting at the Work Table.

Posture

Varying postures for varying levels of formality – a casual standing meeting at the Storming Table, or a formal or casual seated meeting at the Work Table.

Ideation surfaces

Use Agile Table’s generous surface for spreading out plans or drawings, roll a whiteboard over to take notes, or utilise the Agile Power Totem for presentations or virtual note taking.

Capacity

Agile Table’s varying heights allows for easy separation of multiple users. A number of people engaging in solo work can share the table, or bring a group together to surround the table for a larger meeting or huddle.

Privacy needs

For a private meeting table, position Agile Table in a meeting room; for use for non-confidential meetings and work, position it anywhere within a workspace; for flexibility between non-confidentiality and semi-privacy, surround Agile Table with soft architecture such as Vertical Gardens or Soft Boundaries.

Introducing Agile Table

Take a stand

The Agile Table responds to the need for a team table that truly supports agile mindsets and working styles within the office. Designed by Schiavello's Principal of People and Culture Consulting Ketí Malkoski in collaboration with acclaimed Australian designer Amanda Stanaway and Schiavello Design Studio's senior designer Nick Tennant, the table features unparalleled variety in formality and work points.

Agile Table's height adjustability and flexible configurations work to meet a team's exact needs at any time.

Freedom in variety

The design of Agile Table promotes alternative interactions between people and teams. Research suggests that a standing meeting can stimulate a positive change in communication, thinking and idea sharing. By using Agile Table, employees can engage in various types of interactions via its varying heights, including casual lounging, group or independent working, formal or informal standing or seated meetings, standing huddles and swarming.

Agile Table also encourages people to consider their health and wellbeing at work. By supporting their comfort needs with dual-height capabilities, the system fosters movement and prompts people to alter their postures throughout the day.

An agile state of mind

The Agile Table supports agile and flexible workplaces, empowering employees with the freedom to choose the space they need, along with the tools they require, in order to feel connected and stay highly effective.

Agile's malleable design means it is a suitable workpoint for a number of tasks, including collaboration, standing meetings, individual focused work or presentations, playing a role in empowering people's choices and positioning itself as an paramount element within the contemporary workspace.

A unique collaborative experience

Today's open plan workplace aims to support and promote interaction and collaboration, however the need for areas that support independent work is also essential for teams to be successful.

Schiavello's research suggests that in a typical week, employees spend **42% of their time collaborating** and **58% working independently**. In addition, not only planned, formal interactions need to be considered, but also informal and ad-hoc collaborating. Agile Table embraces these different modes of working and, with its length and varying heights, enables teams to alternate from group collaboration to independent work without the need to move elsewhere in the office.

The Agile Power Totem

Complement flexible working with audiovisual capabilities. The Agile Power Totem brings integrated power, data and an optional screen to the tabletop, adding new levels of interactivity and connectivity to employee meetings.

Specifications

Specifications

Agile Table / Work Table and Storming Table

Fixed Height Storming Table

Height Adjustable Storming Table

Fixed Dual Height Agile Table

Height Adjustable Agile Table

Fixed Single Height Agile Table

Agile Power Totem Height Adjustable

Agile Power Totem Fixed Height

Agile Screen Arm

Accessories

The Agile Power Totem provides power and data capabilities as well as an optional 180° monitor/TV/screen arm to allow for video conferencing or sharing of presentations and video. An optional screen back hides unsightly bolts and cables at the rear of the screen from view and is available in linear or dashed slot styles. With a drop down lid and spring return, cables are kept orderly, while customisation allows for the choice of power/USB/HDMI outlets.

The Totem is easily clipped into place and clipped out again, with the standard totem cap replacing it for a neat and seamless finish.

Ecology and sustainability

Schiavello's most important commitment to sustainability is the company-wide Environmental Management System under ISO 14001. The environmental design principles realised means we design for the environment, focusing on efficient energy use and minimum emissions, longevity and durability, re-use and recycling of our products.

Our principles of ME WE (Materials, Energy, Waste Emissions) give us a simple way to think about how our operations impact the environment.

Our brochures are printed on an Australian made paper stock that is PEFC Certified and made from elemental chlorine-free bleached pulp, sourced from sustainably managed forests and non-controversial sources. The paper is manufactured by an ISO 14001 certified mill using renewable energy sources.

About Schiavello

Schiavello is a multi-disciplinary company dedicated to developing intelligent, inspiring, ecological and resilient solutions for the office, the home and public spaces.

Schiavello's concepts and products are developed in Australia by applying a design process that brings together the company's core design principles and engineering with the creativity of local and international designers.

The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation's needs and people, allowing us to consistently achieve our philosophy that 'Anything is possible'.
