

MEDINA BEDHEAD

schiaavello
Wellness

Bringing comfort to care

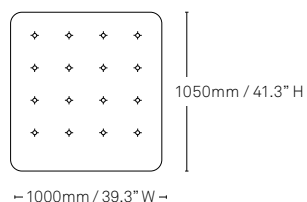

A bedhead system designed specifically for the healthcare and aged care sector, Medina Bedhead subtly incorporates electrical services such as lights, nurse call systems, power, data, and gas terminals.

Studies consistently conclude that the visual design of a place of care has a measurable effect on a resident's experience and recovery. Making the care facility less cold and clinical, Medina Bedhead features a soft, upholstered exterior, providing residents with the gentle familiarity of home, aiding in their recovery and care experience.

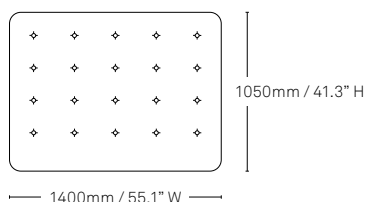

Medina Bedhead is also a completely customisable system. Integrate the tech systems you need and change them over time, add sensor lighting in a variety of colours, and customise the bedhead to complement the interior palette. Medina is also available in a range of sizes.
