

Vertical Garden 3

More than a garden

Vertical Garden 3 brings nature indoors while integrating storage, shelving and visual privacy to create a versatile workplace solution.

JOOST *BAKKER*

Vertical Garden was designed by Schiavello Design Studio in partnership with creative visionary Joost Bakker in 2004.

A fifth-generation tulip farmer, Joost Bakker is a discipline-crossing creative and visionary known for his celebrated plant-based installations that combine nature with a raw, industrial sensibility while emphasising sustainable design principles. He utilises everyday items teamed with natural, living elements, reusing discovered objects and combining them with the colour of fresh flowers and foliage for a dramatic effect.

Through his work and collaboration with like-minded people, Joost seeks to inspire others to think differently about a sustainable future. His past work includes the design and installation of the highly publicised Joost's Greenhouse, a temporary café and bar structure erected at Federation Square, Melbourne, made from light gauge steel, straw and plywood. The structure included a roof garden designed to grow organic vegetables to be served to diners inside the café.

Introducing Vertical Garden 3

Function, with purpose

Storage can play an important role in creating an organised and considered workplace. Vertical Garden 3 integrates shelving into its framework, providing practical space for books, objects and everyday essentials, complemented by integrated planters that introduce biophilia and a sense of natural connection.

The result is a solution that brings organisation, visual structure and natural elements together.

Flexible by nature

Workplaces are rarely one-size-fits-all, requiring solutions that can respond to different settings and layouts. Vertical Garden 3 can be used as a stand-alone element, at the end of a desk or against a wall, with dual-column and grid configurations available. This flexibility allows the system to support a range of workplace applications.

Made to Integrate

Thoughtful proportions allow Vertical Garden 3 to integrate naturally into a variety of workplace environments. Its 800mm depth aligns with standard back-to-back workstation dimensions, while its considered scale allows it to function as a cohesive screening, storage and planting element.

Designed to grow

Biophilia brings a natural element into the workplace, helping to create visual interest within the working environment. The integrated planter provides a dedicated setting for greenery within the Vertical Garden 3 framework. Combined with shelving, it allows functional and natural elements to sit together within a single solution.

Specifications & Accessories

Specifications

Dual Column (2 x columns)

Grid Unit (2 x 2 columns)

Accessories

A range of accessories are available, including various shelf options and a planter.

Shelf

Shelf with Upstand

Book Shelf

Planter

ColourLab

Curated by Giulio Ridolfo and developed by Schiavello, Colourlab brings a considered and cohesive palette of finishes suited to the needs of working and living environments. The palette beautifully balances colour, texture and layering across a variety of materials.

- 1. Laminate
- 2. Timber Natural
- 3. Timber Paint
- 4. Timber Wash
- 5. Leather
- 6. Fabric
- 7. Metal Powder Coat

Ecology and sustainability

Schiavello's most important commitment to sustainability is the company-wide Environmental Management System under ISO 14001. The environmental design principles realised means we design for the environment, focusing on efficient energy use and minimum emissions, longevity and durability, re-use and recycling of our products.

Our principles of ME WE (Materials, Energy, Waste Emissions) give us a simple way to think about how our operations impact the environment.

Our brochures are printed on an Australian made paper stock that is PEFC Certified and made from elemental chlorine-free bleached pulp, sourced from sustainably managed forests and non-controversial sources. The paper is manufactured by an ISO 14001 certified mill using renewable energy sources.

About Schiavello

Schiavello is a multi-disciplinary company dedicated to developing intelligent, inspiring, ecological and resilient solutions for the office, the home and public spaces.

Schiavello's concepts and products are developed in Australia by applying a design process that brings together the company's core design principles and engineering with the creativity of local and international designers.

The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation's needs and people, allowing us to consistently achieve our philosophy that 'Anything is possible'.
