1.0 INTRODUCTION

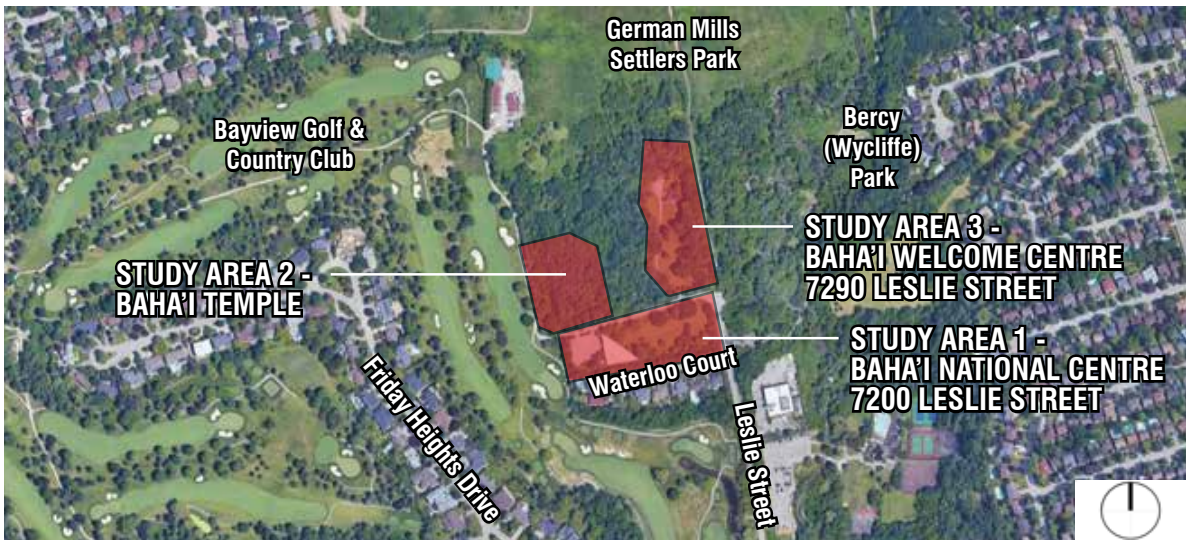

FIGURE 1 - KEY MAP (N.T.S.)

Schollen & Company Inc. was retained by National Spiritual Assembly of the Bahá'í of Canada ("NSA Bahá'í") to complete an inventory of the trees that are contained within the three Study Areas that are situated at 7200 & 7290 Leslie Street, Thornhill (Markham). The three Study Areas are illustrated on the Key Map above (Figure 1).

Study Area 1 (7200 Leslie Street) comprises approximately 1.16 hectares. The site is currently occupied by the Bahá'í National Centre and an at-grade parking lot. Approximately 70% of the property comprises open space and tree cover. The property is bounded by Leslie Street on the east, Waterloo Court on the south and the Bayview Golf & Country Club on the west. A woodland is located to the north and east of Study Area 2. The street trees that are located along the north side of Waterloo Court and west side of Leslie Street were assessed as components of Study Area 1. The existing building is proposed to be demolished and a building with at-grade and underground parking is proposed to be constructed within this area.

Study Area 2 comprises approximately 0.77 hectaresX. The site currently encompasses a woodlot with an existing mulched path. Approximately 90% of Study Area 2 comprises dense tree cover. Study Area 2 is bounded by a private driveway to the south and Bayview Golf & Country Club on the west. A woodland is located to the north and east of Study Area 2. Study Area 2 encompasses the site of the proposed Bahá'í Temple.

Study Area 3 (7290 Leslie Street) comprises approximately 1.34 hectares. The site currently encompasses a one storey log house with a detached log garage and driveway. The property is bounded by the private driveway on the south, the edge of the woodlot to the west, and the unopened Leslie Street right-of-way/public trail on the east. The Leslie Street right-of-way is owned by the City of Markham. The existing trees that are located between the right-of-way and the eastern property line of 7290 Leslie Street were assessed as a component of Study Area 3. The existing log house and garage are proposed to be relocated north of their existing position as a component of the development of the proposed Welcome Centre. The trees that are anticipated to be impacted along the northern edge of the property have been assessed. An at-grade parking lot and trail are proposed within the Study Area 3 property.

A trail is proposed within the wooded area that will connect the proposed Welcome Centre to the proposed Temple. The trail alignment will need to be confirmed in the field to limit the extent of required tree removals. Trees that are anticipated to be impacted by the proposed trail will be assessed in the future and an update will be made to this report as required.

The trees that were surveyed and assessed are located within and in the immediate vicinity of Study Areas 1-3. The trees that are located within the wooded area that have not been assessed in this report are to remain undisturbed.

The inventory has been prepared in support of an application for an Official Plan Amendment (OPA), Zoning By-law Amendment (ZBLA) and an application for Site Plan Approval (SPA).

The methodology for completing the tree inventory comprised the following steps:

- All trees with a DBH of 7cm or larger that are located within or adjacent to the three respective Study Areas were assessed on an individual basis by species, size and condition.
- Some dead trees were assessed as a component of this inventory. The dead trees will not require compensation for removal.
- Each tree that was inventoried was assigned a Tree Inventory Number and affixed with a numbered tag in the field. The tag numbers correspond with the numbers indicated on the Tree Inventory & Assessment Plans and Tree Preservation Plans TI-1 - TI-7 & TP-1 - TP-7 (Appendices C & D).
- Each tree between 20 & 40cm DBH that is proposed for removal will require the compensation planting of 2 trees. Trees proposed for removal that are greater than 40cm DBH will require financial compensation. Refer to the Tree Valuation & Compensation Matrix (Appendix B) for the results of the valuation excercise.

The Tree Inventory & Assessment Report and all associated field work was completed by ISA Certified Arborist Jeremy Dilks ON-2543A. The Tree Inventory was conducted on various dates throughout February 2020, October 2021 and November 2021. Field work was temporarily paused in 2020 and 2021 due to precautions related to the ongoing COVID-19 pandemic.

The report encompasses the corresponding appendices including the Tree Inventory & Assessment Matrix (Appendix A), Tree Valuation & Compensation Matrix (Appendix B), Tree Inventory & Assessment Plans – Drawings TI-1 - TI-7 (Appendix C), Tree Preservation Plans - Drawings TP-1 - TP-7 (Appendix D) and the Tree Inventory Photo Sheets (Appendix E).

The report provides a description of, as well as specific comments related to, the form, structure, health, condition and location of each tree. In addition, the report sets out recommendations related to the potential for the preservation of the trees that are located within each of the three Study Areas. These recommendations are set out in Tree Inventory & Assessment Matrix. (Appendix A)

A topographic survey of the property was used as the basis for this assessment. The survey illustrates the locations of most of the individual trees and the dripline of trees in relation to existing buildings, structures, roads and property boundaries. In instances where inventoried trees are not illustrated on the survey, locations are shown as approximate. This information was utilized to create the Tree Inventory & Assessment Plans (TI-1 - TI-7). The Tree Inventory & Assessment Plan identifies each tree that was inventoried and delineates whether the tree is recommended to be “retained”, “injured” or “removed”.

The Tree Preservation Plans (TP-1 - TP-7) were prepared based upon the Preliminary Master Plan for the proposed Bahá’í National Centre, Temple and Welcome Centre as a means to locate trees that are recommended to be “retained,” as well as those that are required to be “removed” due to conflicts with the proposed development. The Tree Preservation Plan identifies the Tree Protection Zones (TPZs) for the trees that are proposed to be retained and the location of the required tree protection barriers. The diameter of each TPZ within the Study Area was determined based on the City of Markham’s Tree Preservation Details.

The following summary of the assessment describes the findings and recommendations of the inventory exercise. Refer to the corresponding drawings, Tree Inventory & Preservation Plan, Drawings TI-1 - TI-7 (Appendix C) for an illustration of the location of the existing trees. Refer to the Tree Inventory & Assessment Matrix (Appendix A) for the condition, rating and recommendations related to each.

Trees within the three Study Areas were evaluated based on the following parameters:

- Structure – Trees exhibiting major limb loss, structural defects, girdling roots, rubbing branches and situational hazards were designated to have poor structure and were assigned a lower rating. Trees that exhibit some of these characteristics but appear to be otherwise structurally sound were afforded a ranking of “fair”.
- Health – Trees exhibiting crown dieback, lack of vigor, splitting, trunk cavities and/or bark loss are designated to be in poor health and were assigned a lower rating. Trees that exhibit some of these characteristics but appear to be otherwise healthy were afforded a ranking of “fair”.
- Age/Size – Larger trees were assigned a higher merit for retention than saplings or over-mature specimens.
- Conflicts with Proposed Development – Trees that will be in conflict with the proposed grading, excavation and construction will be designated to be “removed”. A Landscape Plan will be prepared with the objective of compensating for the loss of the trees that are proposed to be “removed”.

Section 3.0 of the report also sets out the recommendations for the mitigation of potential impacts that could arise throughout the duration of the construction period on trees that are designated to be retained. The report provides recommendations to ensure that tree protection measures are implemented throughout the construction period. Generally, the trees to be retained are not in conflict (or near) the proposed area of disturbance.

2.0 SUMMARY OF ASSESSMENT

Tree cover within Study Area 1 (7200 Leslie Street) comprises a mix of planted deciduous and coniferous tree species. Some of the large overstorey trees include White Pine (*Pinus strobus*), Red Oak (*Quercus rubra*) and Black Walnut (*Juglan nigra*). There is a White Spruce (*Picea glauca*) hedgerow along the southern property line that comprises trees that are in poor condition. Many of the trees within the hedgerow are dead. Most of the living trees within the hedgerow exhibit poor form. The leaders of most of the trees were removed due to conflicts with an overhead utility line. The understorey of the hedgerow and associated vegetated areas typically comprise invasive European Buckthorn (*Rhamnus cathartica*), in both shrub and tree forms. Refer to Tree Inventory & Assessment Plans TI-1 & TI-2, and Tree Preservation Plans TP-1 & TP-2 for the trees associated with Study Area 1.

The vegetation community within Study Area 2 can be characterized as a Red Pine (*Pinus resinosa*) plantation. The plantation includes Scots Pine (*Pinus sylvestris*) at a lower frequency and an understorey primarily comprising invasive European Buckthorn (*Rhamnus cathartica*) and Sugar Maple (*Acer saccharum*). The pine plantation ends where the slope to down to the valley begins. The trees along the top of slope are predominantly mature Sugar Maple (*Acer saccharum*). Between the western edge of the woodlot and the plantation interior, the tree canopy density opens up. This area primarily comprises Black Walnut (*Juglan nigra*). There is a White Spruce (*Picea glauca*) hedgerow along the western edge of Study Area 2, adjacent to the Bayview Golf & Country Club lands. Refer to Tree Inventory & Assessment Plans TI-3, TI-4 & TI-5, and Tree Preservation Plans TP-3, TP-4 & TP-5 for the trees associated with Study Area 2.

Tree cover within Study Area 3 (7290 Leslie Street) comprises a woodlot featuring predominantly native deciduous and coniferous tree species. Some of the large overstorey trees include White Pine (*Pinus strobus*), Sugar Maple (*Acer saccharum*), Canadian Hemlock (*Tsuga canadensis*) and Black Walnut (*Juglan nigra*). The understorey of the woodlot features a mix of deciduous and coniferous native tree species and invasive European Buckthorn (*Rhamnus cathartica*), in both shrub and tree forms. Some of the trees within Study Area 3 are located on a steep slope. This Study Area includes trees that are owned by the City of Markham. Refer to Tree Inventory & Assessment Plans TI-6 & TI-7, and Tree Preservation Plans TP-6 & TP-7 for the trees associated with Study Area 3.

Each tree was assessed in the field based on the following inventory parameters:

- Tree Species - Each tree was identified and the common names and botanical names were provided.
- DBH - The size of each tree was determined by measuring the Diameter at Breast Height (in cm, measured at 1.4m above grade). A cumulative DBH was provided for trees that have multiple stems. The cumulative DBH was calculated by using the square root of all stems squared on multi-stemmed trees.
- Condition - Condition Ratings were provided for the overall health and structure of each tree. Condition ratings were assigned as Good, Fair and Poor.
- Ownership Categories - The Ownership/Regulation of each tree was identified based on the topographic survey and property delineations observed in the field.
- Notes - Additional notes/comments were provided in detail for each tree.
- Date of Assessment - The date of assessment for each tree has been specified.

2.1 General Composition

The following table provides a general description of the vegetation units found within the site, refer to the Tree Inventory & Assessment Matrix (Appendix A) for a detailed summary of the inventory and assessment.

A total of 1135 trees were inventoried. The following provides a summary of the key findings of the inventory and assessment exercise for Study Areas 1-3:

Common Name	Botanical Name	Composition of Inventoried Trees (# of Inventoried Trees)	Average Health / Condition Rating	Size Range (DBH, cm)	Comment
Sugar Maple	*Acer saccharum*	20.4% (232)	Good	7 - 97	Native deciduous tree species. Typically found as a woodlot over-storey and under-storey tree. Found in abundance throughout Study Area 2 and 3.
European Buckthorn	*Rhamnus cathartica*	20.0% (227)	Fair	7 - 33	Invasive deciduous tree species. Found in abundance throughout all 3 Study Areas.
White Spruce	*Picea glauca*	12.0% (136)	Good	7 - 59	Native coniferous tree species. Typically found in the hedgerows and in woodlots throughout all 3 Study Areas.
Eastern White Cedar	*Thuja occidentalis*	6.6% (75)	Good	<7 - 53	Native coniferous tree species. Typically found as planted hedges and in clusters throughout Study Areas 1 & 3.
Red Pine	*Pinus resinosa*	5.8% (66)	Fair-Poor	21 - 55	Native coniferous tree species. Typically found in abundance throughout the Red Pine Plantation in Study Area 2. The trees are generally in fair or poor condition.
Black Walnut	*Juglans nigra*	5.8% (66)	Good	7 - 60	Native deciduous tree species. Typically found in open areas and along forest edges throughout all 3 Study Areas.
Basswood	*Tilia americana*	3.2% (36)	Good	7 - 54	Native deciduous tree species. Typically found in woodlots as an over-storey and under-storey tree throughout Study Areas 1 & 3.
White Pine	*Pinus strobus*	2.9% (33)	Good	10 - 139	Native coniferous tree species. Typically found in open areas and woodlots throughout Study Areas 1 & 3.

- 591 trees were assigned a condition rating of 'Good.'
- 399 trees were assigned a condition rating of 'Fair.'
- 83 trees were assigned a condition rating of 'Poor.'
- 62 trees were dead.
- 508 trees were assigned Recommendation "**A**" - Tree to be retained where proposed grading allows.
- 259 trees were assigned Recommendation "**B**" - Removal of tree required due to conflicts with proposed development and grading.
- 222 trees were assigned Recommendation "**C**" - Removal of Invasive Species recommended.
- 52 trees were assigned Recommendation "**D**" - Removal of dead tree or tree in poor condition recommended.
- 59 trees were assigned Recommendation "**E**" - Tree to be retained with injury where proposed grading allows.
- 8 trees were assigned Recommendation "**F**" - Dead tree to remain.

- 27 Inventoried trees have been removed since the tree assessment has begun.

A Landscape Plan for the development will be prepared which will illustrate the proposed compensation trees that will be planted throughout the new development.

3.0 PROTECTION, MANAGEMENT & MONITORING

The following recommendations are set out to direct the protection, management and monitoring of existing trees and vegetation communities that are designated to be retained to compensate for trees that are proposed to be removed.

3.1 Construction Impact Mitigation Recommendations

1. Prior to the initiation of construction, trees that have been designated to be removed should be flagged in the field by the consultant in accordance with the approved plans.
2. Prior to the initiation of construction, trees identified for removal should be removed by a qualified tree care company in accordance with the Tree Preservation Plans TP-1 - TP-7.
3. Where selective tree removal is proposed adjacent to trees to remain, trees should be felled with the objective of minimizing damage to trees that have been designated to be retained. Any branches on trees that are to be preserved that are entangled with limbs of trees that are to be removed or that are anticipated to be damaged as a result of the felling process, should be removed utilizing approved arboricultural techniques.
4. The trunks of trees to be removed should be cut off at grade. Stumps and root systems may have to be left undisturbed where their removal impacts the root systems of adjacent trees.
5. Cut wood from Manitoba Maple, Norway Maple and Buckthorn species should be removed from the site to prevent repropagation of aggressive invasive species.
6. Where advised, when aggressive species such as Manitoba Maple and Buckthorn are located in close proximity to proposed construction, cut stumps should be treated with herbicide using a wick applicator by a licensed contractor to prevent suckering and regrowth from the cut stump.

3.2 Construction Interface & Tree Protection Fencing

Where grading, servicing or site alteration is proposed on lands that are located at the interface of the proposed construction and adjacent properties, care must be taken to avoid potential impacts on trees that are located on adjacent properties. The following actions and recommendations are to be implemented with the objective of mitigating impact on trees that are located outside of the three Study Areas.

1. Tree protection fences should be installed along the proposed configuration indicated on the Tree Preservation Plans – Drawings TP-1 - TP-7. Disturbance should not encroach beyond the limit of the tree protection fence. The fences should be installed as per the Tree Protection Fence Details (T-1), City of Markham Streetscape Manual) on the Tree Preservation Plan or as otherwise approved.
2. Tree protection fences must be maintained in good repair throughout the duration of the construction period.
3. Sediment control fence may be installed along base of, or in conjunction with, the tree protection fences to prevent the migration of sediment and sediment laden runoff from the construction area. For a complete layout of all sediment control fencing for the proposed development, refer to the development Engineer's Plans and Details.
4. Where alterations are required within the limit of the drip line, a detailed assessment of the tree should be completed by an ISA certified Arborist. Recommendation to mitigate potential impacts should be provided and the implementation or remedial measures should be undertaken under the oversight of an arborist.
5. All tree care works that are recommended including root pruning, limb removal, etc. should be implemented in advance of grading and/or servicing activities. All works should be performed by qualified tree care personnel.

3.3 Woodland Edge Protection & Management

The following actions are recommended to be implemented to facilitate the long-term protection and enhancement of the vegetation within the existing woodlot.

1. Dead and dying trees within protected vegetated areas will be retained for wildlife and habitat purposes, except where they pose a threat or risk to humans. Dead limbs within 5.0m of the edge of the woodlot should be pruned by qualified tree care professionals.
2. Debris and garbage should be removed from the development edge abutting protected vegetation areas.
3. Woody debris on the forest floor should remain for wildlife and habitat purposes.
4. The natural occurring edge vegetation should be retained within the woodlot, and at the edges of the woodlot where possible, to decrease potential impacts from wind and sun scald.
5. As part of the woodland edge management strategy, Buckthorn trees (which are invasive, thorn-bearing plants) that are within the woodlot are to be selectively removed and treated with herbicide.
6. New woodlot edge plantings are proposed to compensate for any tree and understory removals that are in conflict with the proposed development and grading.

3.4 Root Pruning & Additional Protective Measures

In some cases, disturbance within the prescribed TPZ is unavoidable. When such instances occur, additional protection measures such as root pruning should be taken as a necessary measure to prevent severe damage to existing trees root systems. The following actions and recommendations are to be implemented with the objective of mitigating the injuries that may occur on trees that are located adjacent to existing excavation.

1. Where root pruning is required, prune in a horizontal line, indicated on the Tree Preservation Plan, drawing TP-6 - TP-7.
2. Where excavation is to occur within the TPZ of trees designated to be retained, first cut the roots using a air or hydro vac, air spade or an approved equal to a depth of 1.0m.
3. Any roots that must be exposed for a period of time shall be covered by wet tarp or burlap to prevent desiccation to the roots and periodically watered to be kept moist.
4. Exposed roots shall be cut back with pruners, loppers or hand saw. Cover the wounds of the roots with compost or topsoil to prevent desiccation.
5. Tree protection fence is to be erected in line with the root pruning line.
6. No roots greater than 60mm (2.5”) in diameter shall be pruned without authorization of the consulting arborist.

4.0 COMPENSATION REQUIREMENTS

The City of Markham requires that trees that are proposed to be removed are compensated for in accordance with the City’s Tree Protection guidelines. The City’s compensation requirements are indicated below.

DBH of Trees Removed	# of Replacement Trees Required	Financial Compensation Required
0-19cm	0	No
20-40cm	2	No
41cm +	0	Yes, Tree Valuation Required

4.1 Compensation Planting

The total number of trees required to be planted for compensation is **248** trees. Refer to the Tree Valuation & Compensation Matrix (Appendix B) for the results of the valuation excercise.

4.2 Tree Valuation

The City of Markham requires that trees proposed to be removed the are larger than 40cm DBH are compensated for financially with a Tree Valuation. A Valuation was completed on September 21, 2022 for 43 trees that are proposed to be removed that are larger than 40cm DBH. The appraised value of the trees was calculated using the Reproduction Method Trunk Formula Technique as outlined in the Guide for Plant Appraisal 10th edition (revised) by the Council of Tree & Landscape Appraisers. The collectice value of the trees was determined to be **$216,300.00**. Refer to the Tree Valutation & Compensation Matrix (Appendix B) for an itemized summary indicating which trees require compensation.

The appraisal was determined using the Replacement Method Trunk Formula technique, as outlined in the 10th edition (revised) by the Council of Tree & Landscape Appraisers. This method was determined to be the most suitable appraisal method as it is the most dependable and readily available appraisal technique used by tree care professionals. The unit tree cost for the valuation was set at $6.51, per the province of Ontario standard.

Subjective ratings between 0% and 100% were assigned to determine the average condition rating of the Subject Tree's health, structure, and form. Functional and external limitations were factored in for determining relevant factors that contribute to the depreciation of the applicable trees. Inflation and additional costs (clean up, replacement tree planting, after care) were not taken into consideration when appraising the trees. This appraisal method reflects the cost of replacing the tree with readily available trees of the same size.

Depreciation was taken into account due to limiting factors with the trees and the specific locations in which they are situated. Depreciation was taken into account for trees for factors that individually impact the health and growth of the tree. Invasive species and species that are prone to insects, pests and pathogens have a lower functional limitations rating. Some of the functional limitations of the trees internal to the site include limited growing space from sidewalks and roads.

5.0 MIGRATORY BIRDS CONVENTION ACT

Federal legislation prohibits the destruction of nests, eggs and young birds during the migratory bird nesting period between April 1st and August 31st.

All proposed tree removals are to be conducted outside of this window. When the clearing of trees is proposed within this designated period or is proposed to occur outside of this period when nesting activities have been observed in the vicinity, inspections of the trees that are proposed to be removed must be conducted to confirm that no nests are present. These inspections should be conducted by a certified biologist.

6.0 LIMITING TERMS AND CONDITIONS

The assessment of trees presented within this report have been undertaken using industry accepted arboricultural techniques. The above-grade parts of each tree were examined and assessed visually. The trees examined were not dissected or climbed and detailed root system examinations were not performed during this assessment.

The observations documented within this report are only true for the period that the arborist was on site. This report does not include any other activity that may have occurred before or after the field work was conducted.

Since the health of the trees were assessed during the dormancy period, there may be some inaccuracy in the assigned health condition ratings due to seasonal climate constraints of assessment. It must also be acknowledged that trees are dynamic living organisms and their health and condition are always subject to change over time. Trees are bound to their environment and the health and condition of trees can be altered by drastic changes in site conditions and seasonal weather variances. All trees are prone to the possibility of failure, and the behaviour of a specific tree cannot be accurately predicted in all situations.

7.0 LIST OF APPENDICES

Appendix A – Tree Inventory and Assessment Matrix
Appendix B – Tree Valuation and Compensation Matrix
Appendix C – Tree Inventory & Assessment Plans (TI-1 - TI-7)
Appendix D – Tree Preservation Plans (TP-1 - TP-7)
Appendix E – Tree Inventory Photo Sheet

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

Tree No.	Tag No.	Species		Condition Rating	DBH (cm)**	Cum. DBH (cm)***	Notes	Ownership Categories ****	Date of Assessment	Recommendations *
		Botanical Name	Common Name

PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

APPENDIX A: TREE INVENTORY & ASSESSMENT MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)
PROJECT NO. 17069

***Recommendations**

A - Tree to be retained where proposed grading allows. (508 trees)
B - Removal of tree required due to conflicts with proposed development and grading. (259 trees)
C - Removal of Invasive Species recommended. (222 trees)
D - Removal of dead tree or tree in poor condition recommended. (52 trees)
E -Tree to be retained with injury where proposed grading allows. (59 trees)
F - Dead tree to remain. (8 trees)
G - Inventoried tree has been removed. (27 trees)

LEGEND

(l): low, **(m):** moderate, **(h):** high severity
****DBH:** Diameter at Breast Height (1.4m off finished grade).
*****Cumulative DBH:** Calculated using square root of all stems squared on multi-stemmed trees.
***Ownership Categories**
SS1 - Tree is located within the Baha'i National Centre Site (7200 Leslie St.)
SS2 - Tree is located within the Proposed Baha'i Temple Site
SS3 - Tree is located within the proposed Baha'i Welcome Centre Site (7290 Leslie St.)
L St. - Tree is owned and situated within the City of Markham road allowance (Leslie Street)
W Ct. - Tree is owned and situated within the City of Markham road allowance (Waterloo Court)
City. - Tree is owned and situated within the City of Markham park lands
Boundary - Trees with trunk(s) growing across one or more property lines. Boundary trees are considered co-owned by both property owners.

APPENDIX B: TREE VALUATION & COMPENSATION MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)

PROJECT NO. 17069

No Compensation Required: Trees to be retained, trees to be removed <20cm DBH, invasive species, and dead trees included

Tree Compensation Required: Trees 20 - 4cm DBH to be removed

Trees > 40 cm dbh - Financial Compensation Required.

Appraisal Method: Reproduction Method: Trunk Formula Technique (10th Edition)

***Cross Sectional Area**:= ((DBH^2)*0.7854

****Condition Rating as a %**:= (Structure Rating + Form Rating + Health Rating) / 3

*****Unit Tree Cost**: $6.51 per Ontario Provincial Standard

******Basic Reproduction Cost**: = Cross Sectional Area * Unit Tree Cost

*******Depreciated Reproduction Cost**: = Depreciated Reproduction Cost * Condition Rating as a % * Functional Limitations * External Limitations

APPENDIX B: TREE VALUATION & COMPENSATION MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)

PROJECT NO. 17069

No Compensation Required: Trees to be retained, trees to be removed < 20cm DBH, invasive species, and dead trees included

Tree Compensation Required: Trees 20 - 4cm DBH to be removed

Trees > 40 cm dbh - Financial Compensation Required.

Appraisal Method: Reproduction Method: Trunk Formula Technique (10th Edition)

***Cross Sectional Area**:= ((DBH^2)*0.7854

****Condition Rating as a %**:= (Structure Rating + Form Rating + Health Rating) / 3

*****Unit Tree Cost**: $6.51 per Ontario Provincial Standard

******Basic Reproduction Cost**: = Cross Sectional Area * Unit Tree Cost

*******Depreciated Reproduction Cost**: = Depreciated Reproduction Cost * Condition Rating as a % * Functional Limitations * External Limitations

APPENDIX B: TREE VALUATION & COMPENSATION MATRIX

SCHOLLEN & Company Inc.

Baha'i National Centre, Markham, ON

Drawing Reference: Tree Inventory & Assessment Plan (TI-1, TI-7), Tree Preservation Plan (TP-1, TP-7)

PROJECT NO. 17069

No Compensation Required: Trees to be retained, trees to be removed <20cm DBH, invasive species, and dead trees included

Tree Compensation Required: Trees 20 - 4cm DBH to be removed

Trees >40 cm dbh - Financial Compensation Required.

Appraisal Method: Reproduction Method: Trunk Formula Technique (10th Edition)

***Cross Sectional Area**:= ((DBH^2)*0.7854

****Condition Rating as a %**:= (Structure Rating + Form Rating + Health Rating) / 3

*****Unit Tree Cost**: $6.51 per Ontario Provincial Standard

******Basic Reproduction Cost**: = Cross Sectional Area * Unit Tree Cost

*******Depreciated Reproduction Cost**: = Depreciated Reproduction Cost * Condition Rating as a % * Functional Limitations * External Limitations

																Total Number of Compensation Trees Required		248

CITY OF MARKHAM TREE PRESERVATION SPECIFICATIONS

ALL EXISTING TREES WHICH ARE DESIGNATED TO REMAIN SHALL BE FULLY PROTECTED WITH FENCES ERECTED AROUND THE ENTIRE PERIMETER OF THE TREE PROTECTION ZONE (TPZ) IN ACCORDANCE WITH DRAWINGS TP-1 - TP-7. GROUPS OF TREES AND OTHER EXISTING PLANTS THAT ARE TO BE PROTECTED, SHALL BE ADDRESSED IN A LIKE MANNER WITH FENCES ERECTED AROUND THE ENTIRE CLUMP(S).

TREE PROTECTION ZONE DETAILS ARE TO BE APPROVED BY THE CITY WITH BARRIERS INSTALLED PRIOR TO THE COMMENCEMENT OF ANY SITE ALTERATION OR CONSTRUCTION ACTIVITIES. BARRIERS ARE TO BE MAINTAINED IN GOOD CONDITION THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

TREE PROTECTION SIGNS SHALL BE MOUNTED ON ALL SIDES OF THE BARRIER AND ARE TO BE A MINIMUM SIZE OF 40CM X 60CM. ALL SIGNS MUST REMAIN IN PLACE AND IN GOOD REPAIR THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

THIS WORK SHALL BE COMPLETED TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN, PRIOR TO THE ISSUANCE OF BUILDING PERMITS FOR THE SITE DEVELOPMENT. THE DEVELOPER OR HIS/HER AGENT SHALL TAKE EVERY PRECAUTION NECESSARY TO PREVENT INJURY TO TREES OR SHRUBS THAT ARE DESIGNATED TO BE RETAINED.

NO RIGGING CABLES SHALL BE WRAPPED AROUND OR INSTALLED IN TREES; AND SURPLUS SOIL, EQUIPMENT, DEBRIS OR MATERIALS SHALL NOT BE PLACED OVER ROOT SYSTEMS OF THE TREES WITHIN THE PROTECTION FENCES. NO CONTAMINANTS WILL BE DUMPED OR FLUSHED WHERE FEEDER ROOTS OF TREES EXIST.

ROOT PRUNING SHALL OCCUR PRIOR TO THE START OF CONSTRUCTION, WHERE REQUIRED TO ACCOMMODATE CONSTRUCTION ACCESS.ROOTS SHALL BE PRUNED 15 TO 30 CM BACK FROM THE EDGE OF THE TPZ AND TO A DEPTH OF 1 METRE OR THE MAXIMUM DEPTH OF ROOT PENETRATION (WHICHEVER IS DEEPER). WHERE ROOT SYSTEMS OF PROTECTED TREES ARE EXPOSED DIRECTLY ADJACENT TO OR INJURED BY CONSTRUCTION WORK, THEY SHALL BE CLEANLY SEVERED BY AN ISA CERTIFIED ARBORIST AND THE AREA BACKFILLED WITH NATIVE MATERIAL TO PREVENT DESICCATION. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

IF UNFORESEEN GRADE CHANGES AROUND TREES TO BE PRESERVED ARISE, THE PROPONENT SHALL BE REQUIRED TO TAKE SUCH PRECAUTION AS DRY WELLING AND ROOT FEEDING TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN.

TREES TO BE PRESERVED THAT HAVE DIED OR HAVE BEEN INJURED BEYOND RECOVERY SHALL BE SUBJECT TO SUITABLE COMPENSATION AS DETERMINED BY THE CITY OF MARKHAM, UPON REVIEW OF THE TREE INVENTORY AND ANALYSIS.

AN ISA CERTIFIED ARBORIST SHALL BE ON-SITE FOR ANY WORK WHICH IMPACTS ANY TREE OR TPZ. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

WHERE LIMBS OR PORTIONS OF TREES ARE REMOVED TO ACCOMMODATE CONSTRUCTION WORK, THEY WILL BE CAREFULLY REMOVED BY AN ISA CERTIFIED ARBORIST. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

ROOT PRUNING SHALL OCCUR PRIOR TO THE START OF CONSTRUCTION. WHERE REQUIRED TO ACCOMMODATE CONSTRUCTION ACCESS, ROOTS SHALL BE PRUNED 15 TO 30 CM BACK FROM THE EDGE OF THE TPZ AND TO A DEPTH OF 1 METRE OR THE MAXIMUM DEPTH OF ROOT PENETRATION (WHICHEVER IS DEEPER). WHERE ROOT SYSTEMS OF PROTECTED TREES ARE EXPOSED DIRECTLY ADJACENT TO OR INJURED BY CONSTRUCTION WORK, THEY SHALL BE CLEANLY SEVERED BY AN ISA CERTIFIED ARBORIST AND THE AREA BACKFILLED WITH NATIVE MATERIAL TO PREVENT DESICCATION. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

IF UNFORESEEN GRADE CHANGES AROUND TREES TO BE PRESERVED ARISE, THE PROPONENT SHALL BE REQUIRED TO TAKE SUCH PRECAUTION AS DRY WELLING AND ROOT FEEDING TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN.

TREES TO BE PRESERVED THAT HAVE DIED OR HAVE BEEN INJURED BEYOND RECOVERY SHALL BE SUBJECT TO SUITABLE COMPENSATION AS DETERMINED BY THE CITY OF MARKHAM, UPON REVIEW OF THE TREE INVENTORY AND ANALYSIS.

AN ISA CERTIFIED ARBORIST SHALL BE ON-SITE FOR ANY WORK WHICH IMPACTS ANY TREE OR TPZ. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

WHERE LIMBS OR PORTIONS OF TREES ARE REMOVED TO ACCOMMODATE CONSTRUCTION WORK, THEY WILL BE CAREFULLY REMOVED BY AN ISA CERTIFIED ARBORIST. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

CITY OF MARKHAM TREE PRESERVATION SPECIFICATIONS

ALL EXISTING TREES WHICH ARE DESIGNATED TO REMAIN SHALL BE FULLY PROTECTED WITH FENCES ERECTED AROUND THE ENTIRE PERIMETER OF THE TREE PROTECTION ZONE (TPZ) IN ACCORDANCE WITH DRAWINGS TP-1 - TP-7. GROUPS OF TREES AND OTHER EXISTING PLANTS THAT ARE TO BE PROTECTED, SHALL BE ADDRESSED IN A LIKE MANNER WITH FENCES ERECTED AROUND THE ENTIRE CLUMP(S).

TREE PROTECTION ZONE DETAILS ARE TO BE APPROVED BY THE CITY WITH BARRIERS INSTALLED PRIOR TO THE COMMENCEMENT OF ANY SITE ALTERATION OR CONSTRUCTION ACTIVITIES. BARRIERS ARE TO BE MAINTAINED IN GOOD CONDITION THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

TREE PROTECTION SIGNS SHALL BE MOUNTED ON ALL SIDES OF THE BARRIER AND ARE TO BE A MINIMUM SIZE OF 40CM X 60CM. ALL SIGNS MUST REMAIN IN PLACE AND IN GOOD REPAIR THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

THIS WORK SHALL BE COMPLETED TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN, PRIOR TO THE ISSUANCE OF BUILDING PERMITS FOR THE SITE DEVELOPMENT. THE DEVELOPER OR HIS/HER AGENT SHALL TAKE EVERY PRECAUTION NECESSARY TO PREVENT INJURY TO TREES OR SHRUBS THAT ARE DESIGNATED TO BE RETAINED.

NO RIGGING CABLES SHALL BE WRAPPED AROUND OR INSTALLED IN TREES; AND SURPLUS SOIL, EQUIPMENT, DEBRIS OR MATERIALS SHALL NOT BE PLACED OVER ROOT SYSTEMS OF THE TREES WITHIN THE PROTECTION FENCES. NO CONTAMINANTS WILL BE DUMPED OR FLUSHED WHERE FEEDER ROOTS OF TREES EXIST.

ROOT PRUNING SHALL OCCUR PRIOR TO THE START OF CONSTRUCTION, WHERE REQUIRED TO ACCOMMODATE CONSTRUCTION ACCESS. ROOTS SHALL BE PRUNED 15 TO 30 CM BACK FROM THE EDGE OF THE TPZ AND TO A DEPTH OF 1 METRE OR THE MAXIMUM DEPTH OF ROOT PENETRATION (WHICHEVER IS DEEPER). CITY OF MARKHAM TREE PRESERVATION SPECIFICATIONS

ALL EXISTING TREES WHICH ARE DESIGNATED TO REMAIN SHALL BE FULLY PROTECTED WITH FENCES ERECTED AROUND THE ENTIRE PERIMETER OF THE TREE PROTECTION ZONE (TPZ) IN ACCORDANCE WITH DRAWINGS TP-1 - TP-7. GROUPS OF TREES AND OTHER EXISTING PLANTS THAT ARE TO BE PROTECTED, SHALL BE ADDRESSED IN A LIKE MANNER WITH FENCES ERECTED AROUND THE ENTIRE CLUMP(S).

TREE PROTECTION ZONE DETAILS ARE TO BE APPROVED BY THE CITY WITH BARRIERS INSTALLED PRIOR TO THE COMMENCEMENT OF ANY SITE ALTERATION OR CONSTRUCTION ACTIVITIES. BARRIERS ARE TO BE MAINTAINED IN GOOD CONDITION THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

TREE PROTECTION SIGNS SHALL BE MOUNTED ON ALL SIDES OF THE BARRIER AND ARE TO BE A MINIMUM SIZE OF 40CM X 60CM. ALL SIGNS MUST REMAIN IN PLACE AND IN GOOD REPAIR THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

THIS WORK SHALL BE COMPLETED TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN, PRIOR TO THE ISSUANCE OF BUILDING PERMITS FOR THE SITE DEVELOPMENT. THE DEVELOPER OR HIS/HER AGENT SHALL TAKE EVERY PRECAUTION NECESSARY TO PREVENT INJURY TO TREES OR SHRUBS THAT ARE DESIGNATED TO BE RETAINED.

NO RIGGING CABLES SHALL BE WRAPPED AROUND OR INSTALLED IN TREES; AND SURPLUS SOIL, EQUIPMENT, DEBRIS OR MATERIALS SHALL NOT BE PLACED OVER ROOT SYSTEMS OF THE TREES WITHIN THE PROTECTION FENCES. NO CONTAMINANTS WILL BE DUMPED OR FLUSHED WHERE FEEDER ROOTS OF TREES EXIST.

ROOT PRUNING SHALL OCCUR PRIOR TO THE START OF CONSTRUCTION, WHERE REQUIRED TO ACCOMMODATE CONSTRUCTION ACCESS.ROOTS SHALL BE PRUNED 15 TO 30 CM BACK FROM THE EDGE OF THE TPZ AND TO A DEPTH OF 1 METRE OR THE MAXIMUM DEPTH OF ROOT PENETRATION (WHICHEVER IS DEEPER). WHERE ROOT SYSTEMS OF PROTECTED TREES ARE EXPOSED DIRECTLY ADJACENT TO OR INJURED BY CONSTRUCTION WORK, THEY SHALL BE CLEANLY SEVERED BY AN ISA CERTIFIED ARBORIST AND THE AREA BACKFILLED WITH NATIVE MATERIAL TO PREVENT DESICCATION. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

IF UNFORESEEN GRADE CHANGES AROUND TREES TO BE PRESERVED ARISE, THE PROPONENT SHALL BE REQUIRED TO TAKE SUCH PRECAUTION AS DRY WELLING AND ROOT FEEDING TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN.

TREES TO BE PRESERVED THAT HAVE DIED OR HAVE BEEN INJURED BEYOND RECOVERY SHALL BE SUBJECT TO SUITABLE COMPENSATION AS DETERMINED BY THE CITY OF MARKHAM, UPON REVIEW OF THE TREE INVENTORY AND ANALYSIS.

AN ISA CERTIFIED ARBORIST SHALL BE ON-SITE FOR ANY WORK WHICH IMPACTS ANY TREE OR TPZ. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

WHERE LIMBS OR PORTIONS OF TREES ARE REMOVED TO ACCOMMODATE CONSTRUCTION WORK, THEY WILL BE CAREFULLY REMOVED BY AN ISA CERTIFIED ARBORIST. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

CITY OF MARKHAM TREE PRESERVATION SPECIFICATIONS

ALL EXISTING TREES WHICH ARE DESIGNATED TO REMAIN SHALL BE FULLY PROTECTED WITH FENCES ERECTED AROUND THE ENTIRE PERIMETER OF THE TREE PROTECTION ZONE (TPZ) IN ACCORDANCE WITH DRAWINGS TP-1 - TP-7. GROUPS OF TREES AND OTHER EXISTING PLANTS THAT ARE TO BE PROTECTED, SHALL BE ADDRESSED IN A LIKE MANNER WITH FENCES ERECTED AROUND THE ENTIRE CLUMP(S).

TREE PROTECTION ZONE DETAILS ARE TO BE APPROVED BY THE CITY WITH BARRIERS INSTALLED PRIOR TO THE COMMENCEMENT OF ANY SITE ALTERATION OR CONSTRUCTION ACTIVITIES. BARRIERS ARE TO BE MAINTAINED IN GOOD CONDITION THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

TREE PROTECTION SIGNS SHALL BE MOUNTED ON ALL SIDES OF THE BARRIER AND ARE TO BE A MINIMUM SIZE OF 40CM X 60CM. ALL SIGNS MUST REMAIN IN PLACE AND IN GOOD REPAIR THROUGHOUT THE DURATION OF THE CONSTRUCTION PERIOD.

THIS WORK SHALL BE COMPLETED TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN, PRIOR TO THE ISSUANCE OF BUILDING PERMITS FOR THE SITE DEVELOPMENT. THE DEVELOPER OR HIS/HER AGENT SHALL TAKE EVERY PRECAUTION NECESSARY TO PREVENT INJURY TO TREES OR SHRUBS THAT ARE DESIGNATED TO BE RETAINED.

NO RIGGING CABLES SHALL BE WRAPPED AROUND OR INSTALLED IN TREES; AND SURPLUS SOIL, EQUIPMENT, DEBRIS OR MATERIALS SHALL NOT BE PLACED OVER ROOT SYSTEMS OF THE TREES WITHIN THE PROTECTION FENCES. NO CONTAMINANTS WILL BE DUMPED OR FLUSHED WHERE FEEDER ROOTS OF TREES EXIST.

ROOT PRUNING SHALL OCCUR PRIOR TO THE START OF CONSTRUCTION, WHERE REQUIRED TO ACCOMMODATE CONSTRUCTION ACCESS.ROOTS SHALL BE PRUNED 15 TO 30 CM BACK FROM THE EDGE OF THE TPZ AND TO A DEPTH OF 1 METRE OR THE MAXIMUM DEPTH OF ROOT PENETRATION (WHICHEVER IS DEEPER). WHERE ROOT SYSTEMS OF PROTECTED TREES ARE EXPOSED DIRECTLY ADJACENT TO OR INJURED BY CONSTRUCTION WORK, THEY SHALL BE CLEANLY SEVERED BY AN ISA CERTIFIED ARBORIST AND THE AREA BACKFILLED WITH NATIVE MATERIAL TO PREVENT DESICCATION. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

IF UNFORESEEN GRADE CHANGES AROUND TREES TO BE PRESERVED ARISE, THE PROPONENT SHALL BE REQUIRED TO TAKE SUCH PRECAUTION AS DRY WELLING AND ROOT FEEDING TO THE SATISFACTION OF THE DIRECTOR OF PLANNING AND URBAN DESIGN.

TREES TO BE PRESERVED THAT HAVE DIED OR HAVE BEEN INJURED BEYOND RECOVERY SHALL BE SUBJECT TO SUITABLE COMPENSATION AS DETERMINED BY THE CITY OF MARKHAM, UPON REVIEW OF THE TREE INVENTORY AND ANALYSIS.

AN ISA CERTIFIED ARBORIST SHALL BE ON-SITE FOR ANY WORK WHICH IMPACTS ANY TREE OR TPZ. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.

WHERE LIMBS OR PORTIONS OF TREES ARE REMOVED TO ACCOMMODATE CONSTRUCTION WORK, THEY WILL BE CAREFULLY REMOVED BY AN ISA CERTIFIED ARBORIST. CERTIFICATION FROM THE ARBORIST OF THIS WORK SHALL BE MADE AVAILABLE TO THE CITY.
