

We have been delivering special fuels to customers throughout the world since 1990

Special Fuels

Customised fuel

Special Fuels is a department within Preem that develops and produces fuels specially adapted for unique customer requirements. Preem is the largest fuel company in Sweden and has its own refineries with production facilities in Gothenburg and Lysekil. Deliveries can be made in any quantity from one drum to large-scale deliveries by tanker.

Consultative partner

Our customers have demanding and specific requirements for the finalised product. Throughout the process, we serve as a consultative partner.

Examples of product groups:

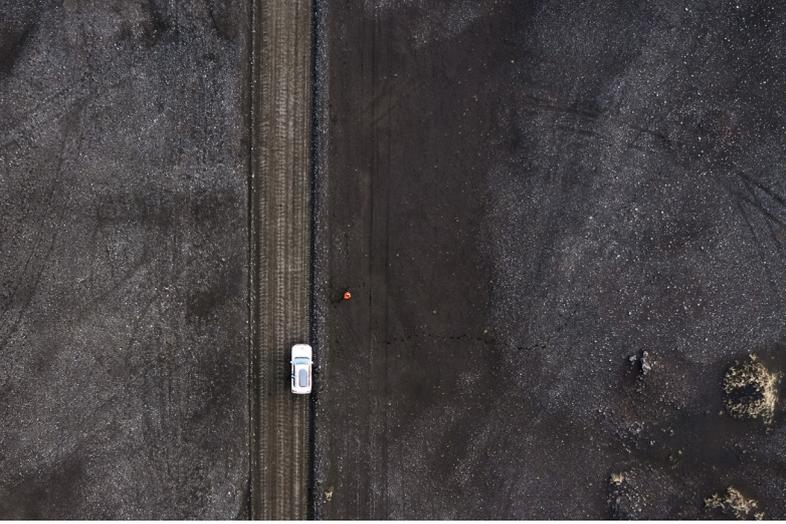

- Test and certification fuels
- Unique fuel blends
- Fuel for long-term storage
- Production line fuel (first fill)
- Alkylate gasoline
- Products with good cold performance
- Racing fuels

On the customers terms

We work closely with our customers. This ensures a fast and efficient process with a high level of service. Lead times for producing a fuel is short, as we have our own refineries who give us full support.

We deliver special fuels to customers throughout the world and are certified in accordance with ISO 9001 and ISO 14001. Our biggest area of activity is within the automotive industry. We also have several customers within research and development. Furthermore, we have clients who carry out engine testing or have other specific product requirements. We also deliver products and components to oil companies and special fuel suppliers.

Containers

We deliver special fuels in drums, IBC containers, ISO containers, and by tanker (truck or ship).

Examples of products

- Diesel EN 590 (all classes)
- Diesel EN 590 B7
- Diesel SD10 (RF-06-03)
- Diesel SD10 B10
- Diesel Euro 6 B7
- Diesel Euro 5 B5
- Diesel MK1 (fossil) Swedish
- Diesel Artic, good cold performance
- Diesel RF-03A-84
- Diesel 50-2000 ppm Sulphur
- Diesel USA 1065 ULS
- Diesel HVO 100%
- Diesel blended with HVO
- Fame, 100% RME
- Gasoline 91 Cert
- Gasoline 98 Cert
- Gasoline EN 228 (95 and 98)
- Gasoline 102 FIA racing
- Gasoline blended with Ethanol
- Gasoline Alkylate 2 and 4-stroke
- First fill: Diesel MK-1, EN 590 Low Cloud
- First fill: Gasoline alkylate 95
- Gas turbine fuels
- Components: for diesel blending
- Components: for gasoline blending
- Components: for chemical use
