

Registration for IGRC2027 Is Now Open!

Be part of the global conversation shaping the future of Gas innovation!

The countdown to the International Gas Union's 18th edition of the International Gas Research Conference has begun, and registration is now open! From 24–28 May 2027, IGRC2027 will bring the global Gas research and energy community to Budapest, Hungary, for five days of research, innovation, collaboration and exchange.

For the first time in its 54-year history, IGRC will take place in Central and Eastern Europe, bringing together perspectives from the global East and West at the heart of Europe. IGRC2027 continues a tradition of bringing together leading voices from across the global Gas community. With 500+ delegates, 100+ speakers, 300+ participating companies and representatives from 70+ countries expected, IGRC2027 will provide an international platform for exploring how Gas and gaseous fuels are evolving in a changing energy landscape.

Discover the ideas shaping the future of Gas

The IGRC2027 programme will showcase contributions selected through the Call for Abstracts, covering six key areas:

- **New Age of Natural Gas**
- **Emissions Management, Carbon Capture & Gas Certification**
- **Renewable Gases**
- **Lower Carbon Hydrogen**
- **AI & Digital Transformation**
- **Social, Commercial, Regulatory, Policy, Financial & Innovation Perspectives**

Why attend IGRC2027?

IGRC2027 is designed for those who want to discover the latest Gas research developments and technologies, exchange knowledge with leading experts, build

international connections and explore practical solutions for our currently evolving energy systems.

Whether you come from research, industry, infrastructure, technology, finance, government or policy, IGRC2027 offers an opportunity to connect perspectives and explore ideas that can contribute to real-world impact.

Detailed information on registration fees, eligibility and deadlines is available below on this page.

Register early and be part of the conversation in
Budapest!
