Xiamen Kingfeels Energy Technology Co.,Ltd

Add: Unit A, 7th Floor, Rihua Building, No.8, Xinfeng 2nd Road, Huli District, Xiamen, Fujian, China

Factory Add: Hengkeng Village, Hengkou Town, Yongchun County, Quanzhou, China

Email: info@kingfeels.com Tel: 0086-592-2393103

12 Years Products Warranty 25 Years Life Time

Xiamen Kingfeels Energy Technology Co., Ltd (the main subsidiary of Fujian Shuangheng Group)

Established time: Feb, 1992.

Employees: 1500

Registered Capital: 30 Million USD Covering Area: 2,000,000 square meters

27 years history company, 9 years in PV mounting industry, 4 years OEM service + 5 years experience for own brand

-Kingfeels Energy.

Product range: Solar mounting structures, Industrial aluminum extrusion, Construction aluminum extrusion, New building

materials and sanitary products.

Headquaters: Fujian Shuangheng Group Co., Ltd

Branch office in Xiamen: Xiamen Kingfeels Energy Technology

Co., Ltc

Branch office in Japan: 株式会社キングフィールズ・ジャパン

Take sharp

ISO9001 certification Thoroughly quality control Abundant corporate culture Service on demand

Gain trust by credit standing, get benefit by efficiency

Reorganize and expand

Expanding aluminum extrusion factory to better satisfy customer requirements

2014

Continuous improvement

Set up a new assembly factory
Set up Xiamen Kingfeels Energy Tec

Set up Xiamen Kingfeels Energy Technology Co,.Ltd

Promote overseas sales of aluminum profiles

Do everything possible to plan the layout and accelerate the developing-steps of the company

2016

Challenge for tomorrow

Set up branch office in Japan: 株式会社キングフィールズ・ジャパン A thoroughly understanding of customer needs, timely and continuously combine customer's feedback with our work

History of development

Sand Bag Test The only company in China passed the Sand Bag Test of SHARP ENERGY

Background: Sharp Energy requested manufacturer to do the Sand Bag Test, which is putting 13 tons of sandbags (equals to 2400mm snow load) on the mounting structure. Outstanding design makes Kingfeels the only company in China that has passed the test.

Kingfeels not only has excellent design theories, but also has very convincing test results.

Site: Miyagi, Japan Capacity: 14.0MW Heavy Snow & Slope Hill Approached the Audit by the Tohoku Economic Ministry

Site: South Korea Capacity: 3000.0KW

Site: South Korea Capacity: 10.0MW

Site : Dubai, UAE Capacity: 1000.0KW

Company Information

Xiamen Kingfeels Energy Technology is the main subsidiary of Fujian Shuangheng Group who has accumulated 27 years of experience in manufacturing aluminum products.

We have mold making center and develop all molds by ourselves. The whole processing procedures including extrusion, machining, anodizing, powder coating, inspection, and packing should pass our strict quality control management system and be completed in our own factory.

Therefore, we can guarantee "Higher quality & Shorter delivery" as promised.

Manufacturing Process

Advantages of Aluminum Mounting structure compared with Steel Mounting structure:

- a. Affordable price: With reasonable design, price of aluminum mounting system will not be very higher than Steel Mounting System (only about 25% price difference).
- b. Save installation time and labor cost: Aluminum mounting structure has higher machining accuracy, much lighter weight, and part pre-assembly in factory (save 30% installation cost).
- c. Save maintenance cost: With better anti-corrosion, aluminum mounting structure will have about 25 years duration lifetime, almost no need to maintenance cost. But Steel structure will have to be repainted and re-welded to keep its service life.
- d. High priced recycling: Scrap aluminum can be sold in high price after using (about 40% purchase price of aluminum mounting), while Steel structure will be valueless for years severe corroded.

Middle Clamp KS-IC2-F40

Application:

Pitched roof with tiles

Fastening:

Roof hooks onto rafters

Roof Pitch:

Up to 60°

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Low fitting costs

Every size of module array possible

For all common rafter distances

CR3# Rail KS-CR3-XXX

CR 1# Rail Splice Kit KS-CR1-SP

KS-HK-F01

Slate Tile Roof Hook 1# KS-HK-F01

End Clamp KS-EC2-F40

Middle Clamp KS-IC2-F40

Application:

Pitched roof with tiles

Fastening:

Roof hooks onto rafters

Roof Pitch:

Up to 60°

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Low fitting costs

Every size of module array possible

For all common rafter distances

Standing Seam Roof

CR Rail Clamp KS-CRC-2AN

Middle Clamp KS-IC2-F40

Application:

Standing Seam Roof

Fastening:

Roof hooks on Standing Seam Rib

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Low fitting costs

Every size of module array possible

For all common rafter distances

Standing Seam Hook #10 KS-HK-S10

Standing Seam Hook #4 KS-HK-S04

End Clamp KS-EC2-F40

Middle Clamp KS-IC2-F40

Application:

Standing Seam Roof

Fastening:

Roof hooks on Standing Seam Rib

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single layer

Advantages:

Low fitting costs

Every size of module array possible

For all common rafter distances

Tin Metal Roof

CR 1# Rail KS-CR1-XXX

CR Rail Splice Kit KS-CR1-SP

Tin Interface Kit L feet 1# Type KS-HK-L01-ZS80

Middle Clamp KS-IC2-F40

End Clamp KS-EC2-F40

Application:

Trapezoidal and corrugated sheet metal

Fastening:

Riveted or screwed onto raised corrugations

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Low fitting costs

Every size of module array possible

Height adjustable via elongated hole in the sheet

metal bracket

Tin Metal Roof

CR3# Rail KS-CR3-XXX

CR 1#Rail Splice Kit KS-CR1-SP

Hanger Bolt Hook #2 KS-HK-L02

Middle Clamp KS-IC2-F40

End Clamp KS-EC2-F40

Trapezoidal and corrugated sheet metal

Fastening:

Hanger bolts onto rafters

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Low fitting costs

Height adjustable

Suitable for large distances between rafters

Trapezoidal Metal Roof

CR 1# Rail Clamp KS-CRC-2AN

End Clamp KS-EC2-F40

Application:

Trapezoidal and corrugated sheet metal

Fastening:

Riveted or screwed onto raised corrugations

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single layer

Advantages:

Low fitting costs

Every size of module array possible

With rail / railess solution

Height adjustable via elongated hole in the sheet metal bracket

Trapezoidal Metal Roof

End Clamp KS-EC2-F40

Application:

Trapezoidal and corrugated sheet metal

Fastening:

Riveted or screwed onto raised corrugations

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single layer

Advantages:

Low material / Low fitting costs Every size of module array possible With rail / railess solution

Quick mounting

Tin Metal Roof-UR Solution

CR 1#Rail Splice Kit KS-CR1-SP

Middle Clamp KS-IC2-F40

Application:

Trapezoidal and corrugated sheet metal

Fastening:

Riveted or screwed onto raised corrugations

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single layer

Advantages:

Low material / Low fitting costs Every size of module array possible No Rails necessary Quick mounting

12 Years Product Warranty / 25 Years Life Time

CR 1#Rail KS-CR1-XXX

Triangle Bracket 1# KS-TR10-XX

Application:

Cements Roof / Metal Roof

Fastening:

Riveted or screwed onto raised corrugations, or mounted onto the Concrete block

Tilt angle:

Up to 60 degrees

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single layer

Advantages:

Highly pre-assembly, easy installation Perfect also for small systems of 1,2,4 or 8 modules

Fixed angle, adjustable angle both available

Load bearing reserve of the roof has to be checked prior to installation

Adjustable Tilt Solution

CR3# Rail KS-CR3-XXXX

End Clamp KS-EC2-F40

Middle Clamp KS-IC2-F40

Application:

Cements Roof / Metal Roof

Fastening:

Riveted or screwed onto raised corrugations, or mounted onto the Concrete block

Tilt angle:

KS-AJ-RL01: Adjustable rear leg 10-15° KS-AJ-RL02: Adjustable rear leg 15-30° KS-AJ-RL03: Adjustable rear leg 30-60°

Module Type:

Framed and frameless modules

Module orientation:

Portrait

Layers of Rails:

Single layer

Advantages:

Flexible tilt angle choices
Anti-slip and anti-out design
Double side lock, better strength
Cheapest solution for adjustable mounting

12 Years Product Warranty / 25 Years Life Time

Ballasted Tilt Solution

Middle Clamp KS-IC2-F40

Ballast Triangle Bracket KS-KTR15-XXXX

Application:

Flat Concrete Roof

Tilt angle:

5°-20°

Module Type:

Framed modules

Module orientation:

Landscape

Layers of Rails:

Single layer

Building height:

20m max

Edge clearance:

Fitting in the roof edge and corner regions possible

Advantages:

Simple structure with high strength

No need rails, save material cost and installation time

It's no penetration solution on concrete rooftop

Aluminum ground mounting system—Concrete foundation

VR Support Beam KS-VR4-XXXX

End Clamp KS-EC2-F40

Application:

Open Field Area

Tilt angle:

Up to 45°

Material:

Al6005-T5 for aluminum profiles and clamps. Stainless steel for fasten bolt and nut.

Module Type:

Framed or Frameless modules

Module orientation:

Landscape/Portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Much Easier to install

Excellent wind resistant

Excellent anti-corrosion

Aluminum ground mounting system—ground screw foundation

VR Support Tube KS-JT132-T-XXX

BR1 Rail Clamp KS-BR1-2A-C50

Ground Screw KS-F76-XXX-T3

Application:

Open Field Area

Tilt angle:

Up to 45°

Material:

Al6005-T5 for aluminum profiles and clamps. Stainless steel for fasten bolt and nut.

Module Type:

Framed or Frameless modules

Module orientation:

Landscape/Portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Much Easier to install

Excellent wind resistant

Excellent anti-corrosion

Ground mounting system —Pile Mounting System

U Pile and Tube Connector

BR1 Rail Clamp KS-BR1-2A-C50

VR Support Beam KS-VR4-XXXX

BR5 Rail Splice

VR Connect Jacket KS-108H-XXX

Application:

Open Field Area, Level Ground or Slope Ground Tilt angle:

Up to 45°

Material:

Al6005-T5 for aluminum profiles and clamps Stainless steel for fasten bolt and nut Hot Dip galvanized Q235 for U Pile Post

Module Type:

Framed or Frameless modules

Module orientation:

Landscape/Portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Much better choice for uneven location Much Easier to install

Excellent wind resistant

Ground mounting system —Steel Mounting System

Steel Rail KS-CBCL-XXXX

Brace Bar KS-CBCL-XXXX

End Clamp KS-EC-CBC-001

Application:

Open Field Area

Tilt angle:

Up to 45°

Material:

Al6005-T5 for aluminum clamps Q235 for Steel Rail & "C" Support Leg Stainless steel for fasten bolt and nut

Anti-corrosion:

Anodizing for Al6005-T5

Hot Dip galvanizing for Q235

Module Type:

Framed or Frameless modules

Module orientation:

Landscape/Portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

High strength

Long durability

Low-cost /Eco-cost solution

Less base

Ground mounting system
—Carport Solution

Carport Rail Splice Kit KS-BR3-SP

Carport Rail Clamp KS-BR1-2AN-C35

Middle Clamp KS-CIC15-F40

End Clamp KS-CEC15-F40

Carport Support Beam KS-VR3-XXXX

Application:

Open Field Area, or Supper Mall Parking Area

Tilt angle:

Up to 20° or Customized tilt angle

Ground Clearance:

Over 2000mm

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Economic layout:

3 rows of modules with vertical assembly 6 rows of modules with horizontal assembly

Advantages:

Simple structure with high strength
Corrosion-resistant aluminum construction
(anodized aluminum alloy)

The customized solution makes good utilization of ground and sunshine resources.

Save installation time and labor cost on site

VR Support Tube KS-JT132-T-XXXX

VR Connect Jacket KS-108H-XXX

VR Support Beam KS-VR4-XXXX

Su KS

Support Tube Connect Jacket KS-UL-80

Support Beam Connect Jacket KS-85H100-NP-AN

Middle Clamp KS-IC2-F40

End Clamp KS-EC2-F40

Open Field Area, Above the planting land

Tilt angle:

Up to 30° or Customized tilt angle

Ground Clearance:

Over 1800mm

Module Type:

Framed and frameless modules

Module orientation:

Landscape/portrait

Layers of Rails:

Single/double layer, cross rail installation

Advantages:

Dual-use of land improve the economic benefit A solution with adjustable tilt angle, to increase the sunshine amount

A solution with enough space, benefits to the machine work

Pre-assembled components, to save the installation time and cost

Ground Screw

The most appropriate foundation for solar project installed on open ground. Featured with high anti-corrosion, high strength, short delivery time,

very competitive prices.

Clay soil(screw pile)

Sandy soil(double blade)
