

Company Policy

- › DAS Environmental Experts GmbH develops, manufactures and sells plants and solutions for waste gas purification and waste water treatment within the framework of modern engineering with the highest environmental standards.
- › Customer satisfaction is the focus of our efforts.
- › Due to the high quality of our products, the comprehensive After Sales support as well as the fast reaction and flexibility we are a solid and long-term partner for our customers.
- › We commit ourselves towards our customers, employees and society to comply with all legal regulations and other requirements applicable to our company at all sites. We regularly inform ourselves about changes and innovations to existing laws and regulations and implement them in the company at an early stage.
- › In the development and manufacture of our waste gas and waste water treatment plants, we take into account the latest scientific and technical findings as well as experience gained in practical applications. We use these findings as quickly as possible to increase the efficiency of our plants and make a further, even more effective contribution to the protection of people and the environment.
- › In realizing our activities, products and services, we strive for sustainable management in order to protect the use of raw materials and minimize the negative effects on the environment and the health of our employees, customers and society.
- › Occupational safety and environmental protection require responsible employees at all levels. We attach particular importance to this responsibility in our claim „DAS Environmental Experts“. Through regular information and training, we try to develop and maintain this awareness and constantly improve our professional competence.
- › We draw our motivation from the challenging, international work tasks and the sustainable customer satisfaction to be achieved, the family environment, the social benefits offered and the health promotion measures.
- › Through active public relations (memberships, trade fairs, publications, lectures) we communicate our developments worldwide in order to be a competent contact and supplier in the field of environmental technology.
- › As a Saxon company, we feel closely connected to the region and are therefore committed to it,
 1. invest in science and education through cooperation agreements with schools and universities and participation in research projects; and
 2. to actively emphasize the importance of protecting people and the environment within these cooperations, and
 3. to favour cooperation with regional suppliers in order to promote the Saxon economy and keep the CO₂ emissions generated by the transport of goods as low as possible.
- › By regularly evaluating our business processes, we ensure the continuous improvement of the effectiveness of our Integrated Management System.
- › As the person with overall responsibility, the management undertakes to maintain the integrated management system and to increase the awareness of the employees through personal commitment.
