

FTTP

The UK's next-generation full-fibre network.

Say hello to the fastest mass-market download and upload speeds available throughout the UK.

Partner fibre broadband

Next-generation full-fibre connectivity

Give your customers access to the UK's next-generation full-fibre network, offering faster download and upload speeds, reliable connectivity and consistently better performance than a standard ADSL broadband connection.

Faster speeds and greater reliability mean you can set your customers up to take advantage of additional products such as VoIP, all at a competitive price.

At a glance

Up to 1Gbps download
ultrafast full-fibre speeds

Full-fibre FTTP
no copper, delivered to the premises

12-month minimum contract
UK-based support included

Full-fibre, delivered

What is FTTP?

FTTP (Fibre to the Premises) is a full-fibre service delivered directly to your customer's premises, with no copper anywhere in the access connection.

That means consistent, ultrafast performance for cloud services, video calls, collaboration tools and other bandwidth-heavy applications. Where full fibre is available, it's the fastest, most reliable way to connect a business.

A purple icon of a cloud with a downward-pointing arrow, indicating a download.

1Gbps

Ultrafast full-fibre download

Subject to availability.

Pure full fibre, end to end

No copper in the access connection, for a consistent, reliable service at ultrafast speed.

Key features

Full-fibre FTTP, delivered direct to the premises

Download speeds of up to 1Gbps (subject to availability)

Multiple data options available

12-month minimum contract

Fast speeds and greater reliability

UK-based support

The benefits

How it will benefit your business and customers

Increased speed and reliability

Ultrafast full-fibre speeds of up to 1Gbps, perfect for hosted server access or cloud applications.

Host multiple users

Enough bandwidth to cater for multiple users simultaneously, with multiple free static IP addresses included as standard.

Enhanced control

Personalised access to your own connection management portal, with real-time diagnostics, bandwidth allocation and bill maintenance.

Improved performance

Ideal for high-bandwidth applications such as video, VoIP and large data transfers, so business-critical apps run more effectively.

Why choose Nasstar Channel?

We remove the complexity and keep it simple, with unrivalled support and experience you can't get anywhere else.

- ✦ Established provider with years of experience
- ✦ Fully flexible options
- ✦ Highly trained UK-based service and support team
- ✦ Simple on-boarding process
- ✦ Access to the best expertise and resources
- ✦ Dedicated partner portal
- ✦ Tried and tested, innovative products that deliver when you need them to
- ✦ Full commitment and dedication to the channel and its needs
